

The ACC-FPV180 wire management clips are made of corrosion resistant 304 stainless steel, which makes them a durable, long lasting and reliable solution for all environments. The ACC-FPV180 is easy to install and can be installed straight on or at 180 degrees on to module frames of various thicknesses. The ACC-FPV180 accommodates 1 to 2 PV cables up to 8mm in diameter. The rolled edges are designed to help protect cable insulation from damage. ACC-FPV180 clips are the perfect solution for keeping the PV installation neat, clean, and free from ground faults.

Catalog Number	ACC-FPV180
Item Number	50076887
Material	304 stainless steel
Width	12.5mm [0.49"]
Overall Length	16.5mm [0.65"]
Wire Type	1 to 2 PV cables
Wire Diameter	4.1mm - 8mm (each wire)
Compatible on modules/purlins with a flange thickness range of 1.3 to 3mm	

Rolled edges are flared up and away from the cable to protect cable insulation from damage.

- Innovative design that allows for quick and easy installations
- High quality, long-lasting, labor saving wire management solution
- Corrosion resistant 304 stainless steel provides outstanding durability and performance in all environments
- Can be installed straight on or 180 degrees on to module frame or purlin
- Snake tongue tabs securely anchor clips to module frames or purlins
- Compatible on modules/purlins with a flange thickness range of 1.3 to 3mm
- Generous lead in for installation without tools
- Accommodates all types of PV cable from 4.1mm to 8mm in diameter
- Rolled edges protect cable insulation from damage
- Lasts for the lifetime of the Solar PV system
- Recommended for outdoor use
- RoHS Compliant
- Custom designs are available upon request
- UL1565
