

RACO® Ball Type, KWIK-HANG®

Hands-free Swivel Fixture Hanger Covers

Applications

RACO KWIK-HANG Swivel Fixture Covers help protect commercial lighting fixtures from limited wind and vibration damage. KWIK-HANG Covers allow one person alone to hang a high bay lighting fixture, reducing the amount of labor and time required. This design makes for a safer installation and permits large, heavy fixtures to be securely set in place while installation is completed - no fumbling with fixture high in the air when securing to a box.

Product Features

- Unique, open gate design allows for easy, safe installation of high bay lighting fixtures
- Design permits fixture to rest in position while wiring is completed
- For use with 4" steel square boxes (897KH) or 4" steel octagon boxes (894KH)
- Permits 20 Degree swing from vertical
- Accommodates either 1/2" or 3/4" straight threaded stem sizes. 1/2" reducer bushing is included
- Steel body with malleable iron swivel hub
- Designed for 50 lbs. maximum fixture support (not designed for ceiling fan support)
