For metal stud applications RACO® Box-Loc® products mean a fast, secure installation the first time - every time.

Box-Locs are pre-assembled and riveted, so no on-site assembly is required.

Application

RACO® Boxes are installed in walls or ceilings for lighting fixtures, switches or receptacles. Square boxes are used where multiple conductor runs are split into two or more directions to bring power to a number of electrical devices.

Product Features

- BOX-LOC® (MS) Bracket Box is a snap to install. Place the bracket on the open side of the stud first. Slots in the bracket engage the lip of the stud and actually crimp it as you press the bracket on the stud, quickly locking it in place
- Combination screw heads provide for faster installation
- TKO® knockouts offer greater flexibility with RACO® patented combination 1/2" and 3/4" knockout
