FOR IMMEDIATE RELEASE

RACO Expands Plenum Electrical Box Line

South Bend, Indiana June 23, 2020 – RACO introduces an expanded line of electrical boxes designed for plenum applications. These new products provide additional options for above-ceiling installations. RACO, part of Hubbell's Commercial Construction brands, provides innovative electrical products to commercial, institutional and residential markets.

RACO's new plenum rated boxes are used in above-ceiling applications where air-tight enclosures are required, for use in air returns or required by code. 15 new models are offered, including three different box styles—4" square, 4-11/16" square and 4" octagon. Two models feature shallow 1-1/2" depths.

Knockouts on these new plenum boxes are airtight. The 4" square models provide a variety of 1/2" and 3/4" knockout options. The 4" octagon models offer 1/2" and 3/4" knockouts. The 4-11/16" square models offer knockouts that range from 1/2" to 1-1/4."

These cULus Listed boxes are constructed of drawn steel. To maintain the plenum seal, no ground screw holes are provided. Also available are PVC foam gasketed flat blank covers and extension rings for the 4" and 4-11/16" square boxes.

The company's plenum boxes maintain code-compliance in a variety of commercial and industrial applications. Availability of RACO's new Plenum Box Line begins July 2020. Find more information at www.hubbell.com.
