FOR IMMEDIATE RELEASE

Wiegmann Introduces Industrial Enclosures with Removable Hinge Pins

South Bend, Indiana October 10, 2017 – Hubbell Commercial Construction’s Wiegmann brand has introduced a line of freestanding electrical enclosures with removable hinge pins. These new products simplify installing sub-panels. Hubbell Commercial Construction provides innovative electrical products to commercial and residential markets.

Wiegmann’s new freestanding enclosures provide NEMA 4 and IP66 protection for electrical components from dust, dirt and water. Removable hinge pins allow end users to remove enclosure doors in seconds, perfect for installing sub-panels or making door modifications. Just as quickly, the door can be reinstalled to provide protection and security.

The WRD-FS4 series includes 14 different single door enclosures to cover a variety of sizes. The WRD-FSD4 series includes 12 different double door enclosures with different sizes.

The WRD-FS4 and WRD-FSD4 series enclosures are perfect for machine tool applications, housing motors, drives and PLCs. Adding 19” rack mount accessories make them ideal for protecting sensitive electronic components in harsh industrial environments.

The new patent-pending removable hinge pins are fabricated of heavy duty 316 stainless steel. Wiegmann enclosures are built of carbon steel with gray powder coat. Unites include heavy duty lifting eyes for easy handling and Uni-strut mounting channels welded to the interior sides. Doors open 170° and are sealed with poured in place gaskets.

Wiegmann’s innovative new products provide facility managers, OEMs and electrical contractors an effective way to reduce time spent in installation or modification. Known for quality, the company also offers customized product with superior customer service.

These products are available now. Find more information at www.hubbell.com. Follow the brand on [LinkedIn](#) and [Twitter](#).
