FOR IMMEDIATE RELEASE

Wiegmann Introduces New Stainless Steel Wire Troughs

South Bend, Indiana October 9, 2018 –Wiegmann has introduced the T-CHSS line of stainless steel wire troughs. These new hinged cover enclosures provide superior protection for electrical wiring in corrosive environments. Wiegmann, part of Hubbell Commercial Construction, provides innovative electrical products to OEM, industrial and commercial markets.

Wiegmann's new products are based on the company's existing T-CH product line. Adding stainless steel to this design provides corrosion resistance. The NEMA 4X rated T-CHSS models provide greater protection than painted steel products for electrical components.

Additional T-CHSS enclosure design features include:

- Continuous hinge and easy-to-operate external clamps
- Continuously-welded seams that are ground smooth
- Oil-resistant strip gasket
- External mounting feet

Wiegmann's new UL and CSA Listed wire troughs protect electrical wiring from dirt, dust, oil and water in corrosive environments. A wide range of sizes and lengths are available for use in almost any commercial or industrial application.

Availability of Wiegmann T-CHSS stainless steel enclosures begins late 3Q2018. Find more information at www.hubbell.com.

About Hubbell Commercial Construction

Hubbell Commercial Construction includes five brands that provide innovative and cost-effective electrical products with superior customer service for commercial and/or residential markets. RACO creates electrical boxes, covers, and fittings. TayMac crafts "while in use" covers for outdoor electrical applications. Bell produces weatherproof boxes, covers and outdoor lighting. Wiegmann offers the most complete line of electrical enclosures for OEM, Commercial Construction, and MRO markets. Acme manufactures power conversion and conditioning equipment for industrial, commercial and OEM applications.

These historic brands are part of Hubbell Incorporated, one of the largest electrical manufacturers in North America. The company's history of innovation extends back to 1889. Founder Harvey Hubbell invented the pull chain light switch and duplex receptacle.
