

FUELING THE FUTURE

Tailored solutions built to excel in the world's most demanding environments.

A legacy of quality and service

Hubbell's portfolio of brands is known for its history of quality and unsurpassed service. We consistently set the benchmark for excellence and reliability. Trusted products work seamlessly together to drive operational efficiencies and promote safety.

POWEROHM®

Engineering solutions for the fuels industry

Hubbell is your trusted global provider of products for harsh and hazardous environments, offering products built to withstand extremes in the toughest climates. Our complete engineering solutions are designed to enhance operational efficiency, safety, and reliability for companies in the fuels industry. Hubbell continues to innovate and provide cutting-edge solutions that drive success and sustainability for our clients worldwide.

Our products and services support many segments within the Fuels industry, including:

- Oil & Gas Companies
- EPC Contractor/Engineering Firms
- Oil Field Services & Companies
- Safety/IT Directors

The Hubbell Advantage

Offering comprehensive end-to-end solutions, our portfolio of brands provide a complete range of products and services. Every stage of your project is supported, from initial design to ongoing maintenance and aftermarket support.

This synergy guarantees that every product and service is tailored to your specific requirements with precision and expertise.

Brands work together to deliver cohesive solutions, combining their specialized knowledge into one project to enhance overall performance and safety.

Hubbell brands integrate seamlessly, working side-by-side to meet engineering demands, enhance safety and offer trusted support at every stage.

Global Certifications

Engineering products that exceed standards for applications across the globe.

Safety

Hubbell's commitment to safety and compliance is unwavering. Our teams provide comprehensive support. We can conduct surveys and audits to ensure compliance with the latest global safety standards.

Field Services

Our expert engineering teams offer extensive on-site support. We can perform various field services, including terminations and electrical checks, to ensure the highest levels of safety and operational efficiency.

Customized Solutions

Specialized support and integrated up-front design using lighting design software, acoustic design software, and specification writing technology. We also offer custom-designed solutions.

Engineered for the journey

Hubbell brings comprehensive expertise to every stage of the fuels industry, delivering customized solutions that perform under the most extreme conditions. Our innovative products support upstream, midstream and downstream operations with proven durability, precision and reliability.

In upstream exploration and production, Hubbell offers advanced solutions designed to meet global certification standards. Efficiency, safety and performance are central to our value, ensuring we remain essential to the evolving energy landscape. For midstream operations, our rugged systems enable secure transport and storage, maintaining product integrity and minimizing loss.

As the journey reaches its final phase, Hubbell supports downstream refining, processing and distribution with world-class solutions tailored to project needs. From start to finish, our technologies are engineered to keep energy moving safely and efficiently.

- Beacons / Strobe Warning Lights
- Cable Glands
- Cable Management
- Civil Anchors
- Conduit Fittings
- Controls AC/DC Components
- Drag Chains / Festoons
- Driller's Intercom
- Electrical Connectors, Lugs, Installation Tools
- Electrical Enclosures
- Fire Pump Controls
- Grounding & Bonding, Lightning Protection
- Lighting (Egress)
- Lighting (LED)
- Medium Voltage Connectors
- Motor Controls / Motor Starters
- Plugs & Receptacles
- Public Address / General Alarm
- Resistors, Braking & Chopping

We're with you at every stage

Upstream Applications

Oil Field Development | Onshore Drilling Rigs | Drilling Rigs | Shale/Fracking
Offshore Drilling Rigs | Offshore Platforms | FPSO

Midstream Applications

Storage Farms | Pipelines | Oil Tankers | Shipping Terminals | Compressor Stations

Downstream Applications

Oil Treatment Facilities | Refineries | Petrochemical Facilities | Distribution Facilities

Biofuels Applications

Storage Silos | Milling | Evaporation | Fermentation, Distillation and Rectification

Hydrogen Applications

Storage | Separators | Compressors | Dryers | Pipelines | Ammonia
