Outdoor Living

Powering outdoor recreation spaces with style,
safety and convenience.

Reliable Outdoor Connectivity

Our range of weatherproof devices offer safe, stylish solutions to power outdoor recreation spaces. Create a welcoming ambiance, enhance security and power your devices. From cooking in your outdoor kitchen to relaxing by your fire pit, transform your outdoor living spaces with convenient power exactly where you need it.

Devices to power your outdoor living space

Weatherproof Switches

Unsightly weatherproof covers are no longer needed to protect switches from the elements. A snap-on wallplate provides additional protection with an aesthetically pleasing finish. The result is a device that's meant to get wet and withstand cleaning.

USB Receptacles

Weather resistant USB receptacle for outdoor use in protected enclosure. Perfect for charging electronics on the front porch or back patio.

Recessed Receptacles

Weather resistant recessed receptacles are ideal for today's outdoor living spaces. Integrated receptacle and cover saves installation time. Recessed design provides clearance for TV mounting brackets and also features two receptacles, ideal for televisions and a streaming device or soundbar.

Expandable In-use Covers

Design expands from 1" to 3" in-use. Rugged polycarbonate and neoprene won't rot, crack or deteriorate in sunlight. Quick-Fit keyhole mounting system allows installation in under a minute.

Deck Outlet Kit

Complete weatherproof outlet kit for raised outdoor floors lets you place convenient power access where you need it! Get safe, code-compliant power protected from water spray, rain or snow. Suitable for lights, fans, device charges and other electric appliances.

ParkPost™

Provide electrical power "behind the fence" near patios, spas, outdoor kitchens, shade structures, or fire pits. Easily replace the standard cover with Bluetooth speaker, dimmable LED area light, pagoda light, or directional spotlight. Unique electrical contacts provide power to the cover with no additional wiring.
