NYLON TROLLEY FESTOON KITS - WIRE ROPE

Kits feature Lock 'n Roll trolleys and include all necessary wire rope and hardware for complete festoon system. Cable or hose not included and must be ordered separately to suit application. Wire rope supplied for 48" loop depth plus extra for fastening at both ends.

Kit Selection Procedure: You must know:

- 1- CABLE or HOSE: Use appropriate model chart for type (round or flat) cable/hose. If round, choose correct saddle size (FR04, FR05 or FR06)*.
- 2- LOOP DEPTH (LD): 30" loop and 48" loop shown for planning purposes. Final loop depth should be between these two examples. With a given number of trolleys, longer loop depth = longer travel. However, loop depth is often dictated by available clearance beneath wire rope.
- 3- ACTIVE TRAVEL (AT): Select kit which best fulfills requirements. If your system length must be longer than system length specified for active travel length you require, order by system length so wire rope supplied with kit will not be too short.

NOTE: Cable or hose are NOT INCLUDED. Order, separately, footage shown on model chart plus length needed at each end for hook-up.

(1) MINIMUM CABLE REQUIRED length listed in chart is enough for ACTIVE TRAVEL only, measured centerline to centerline; see diagrams below. ADD cable or hose to each end as required for hook-up to your system.

(2) ACTIVE TRAVEL, SYSTEM LENGTH and MINIMUM CABLE values on charts are for 30" or 48" loop depths and are provided as planning guide only. Kits include necessary components for festoon system with 48" loop depth at system length shown. Loop depth may be varied to suit application.

Definitions

- AT = Active Travel: Distance moving end must travel to do job.
- **SL** = System Length: Anchor-point to anchor-point of wire rope.
- **SD** = Storage Distance: Wire rope hardware and trolleys butted together.
- LD = Loop Depth: Maximum height of loop formed by cable or hose.
 - \mathbf{D} Loop Depth. Maximum height of loop formed by cable of hose.

Kit Components

- 1 Wire Rope, length to suit SL
- 2 Hardware as required
- 3 Intermediate trolleys, by model
- 4 End Clamp (1)
- 5 Tow Clamp/Clip (1) 6 Bumper Stop (2)
- 7 Tension Bracket, optional.
- 8 Tow arm bracket, optional.

STEEL TROLLEY FESTOON KITS - WIRE ROPE

The guickest way to select a Tag Line festoon system is to use kits. For single cables or hoses, select the number of trolleys (middle two digits) for your travel - all the necessary parts come in the box. Add exact cable/hose for your job and it's finished. Steel Trolleys fit wire rope up to 1/4" diameter max.

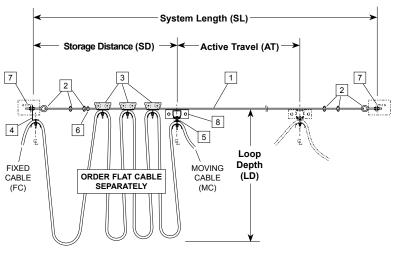

SELECTING A KIT:

FESTOONS

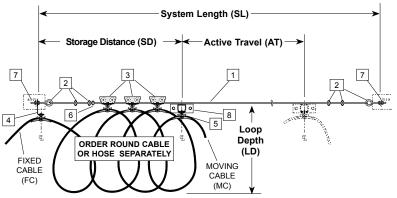

- STEP 1 Determine Active Travel (AT) required and choose the appropriate kit from either the Flat Cable (WF) or Round Cable/hose (WR) table.
- STEP 2 Loop depth is assumed at 36" for all kits. Adjust to suit. Longer loop depth provides greater Active Travel, shorter loop depth provides less Active Travel. NOTE: Wire rope in kits is sufficient for System Length (SL) shown plus amount needed for securing at each end. If longer loop depth is to be used, order longer kit.
- STEP 3 Cable/hose NOT INCLUDED. Order separately length shown on table plus amount needed at each end for hook up to your system.
