look book

be bold. be inspired. be seen.

kurt versen 

Resilience: the inspiration to adapt, to redefine, to reemerge.
The need to stand and be seen. This is Kurt Versen. This is KV.

the end / 38

sometimes, it's ok

to be a tool.

A great tool is one made with purpose. One that knows why it's used, how it's used, by whom it's used. A great tool comes from knowledge, collaboration and honesty.

Artists pick the tools they trust. Tools that do what's asked of them and make the results better; the job easier.

KV is designed to be the right tool for the right artist.

welcome to your space

take a look around.

It's not about our fixture, it's about our fixture's contribution to your environment.

KV's scale, reflector and flange allow the focus to be your design. Our colors and textures complement your architectural vision. Our attention to detail reinforces your attention to detail.

It's your space; we look forward to being a part of it.

shallow plenum environments

Shallow plenum environments are a key area of focus for KV. They're hard to work with so we design our products specifically for these spaces. You don't have the time. We hear you.

open ceilings

Open ceiling spaces have many of the same challenges as shallow plenum environments. Overlook something and it's very visible. We have the options to allow you to be confident in the result.

technology that works

for you.

- 2 step color consistency
- Dim-to-dark
- Warm dim
- SpectraSync™ Color Tuning & NX Distributed Intelligence™
- Linear or logarithmic dimming

(matching bowls & curtains sold separately)

2 STEP Color Consistency

Shared LEDs
across all fixtures

we are...
where you want to be seen.

Noni™

kurt versen 

If it looks like a duck and quacks like a duck, then it's probably a small aperture family of light fixtures.

easy peasy lemon squeezy

The Noni portfolio is designed to be easy.
Easy to specify and easy to install, just... easy.

Shared apertures, design language
and finishing.

As the result our products look great
together. Almost like you planned it
that way.

*Fixtures and citrus fruit shown at actual size.

“The examined open ceiling is worth lighting.”
-Socrates (sort of)

the philosophy of open ceilings

Our open-ceiling portfolio has it all — surface, pendant, cable, downlight, and wall washer.

Did we mention they'll look just like your recessed products?

deep down

we're all the same.

Our recessed and cylinder reflectors are the same. Not the same design, THE SAME. Since KV makes the same parts, the same way, every time, we ship quickly & correctly.

TRUE TO SIZE

2"

shenanigans above

serenity below.

A circus above can't mean compromise below. Noni is designed specifically for spaces in which there is no space.

True 2" deep housings for downlights and wall washers.
3.5" deep for accents. Internal components hidden. All the functionality.

textures

Smooth or textured (we like the textured),
depending on what's right for the space.
Contrast vs. consistency – your call.

colors

Introducing our latest colors: Pink
Panache and Grasshopper. Through
color and trend forecasting we will
consistently offer new colors to keep
your pallet choices fresh. Our standard
colors of black, gray, graphite, white,
and copper will always be available.

correctcut technology

Worried about cutting a precise hole for a 1/4" flanged product?
That changes today with KV's CorrectCut technology..

KV's housing is the template for the installer. Cut the hole too big?
Nope. A downlight that looks just as pretty installed as it does on your conference room table?
Yup.

us →

CorrectCut allows KV to safely utilize 1/4" flange.

them →

Large flange to safely cover hole or trust contractor to be perfect.

you told us what you want

what you really really want.

downlights designed

with your ceiling in mind.

We toiled over installations most product people discount.

5/8" ceiling: we have a downlight reflector designed for it.

Doubling-up: we have a downlight reflector designed for it.

*shallow reflector (shown) optimized for 5/8", but compatible with ceilings up to 1 1/4" thick.

aloe there

let's relax.

What complements a great downlight?

An exceptional wall washer.

Noni's unique wall wash optics allow for a soft and uniform wash of light on the wall, creating an elegant layer of light to transform any space.

there's more brewing

think of us as your lighting barista.

We hope we perked you up.

Noni is the first step in a new beginning for Kurt Versen.

We look forward to creating more tools for your spaces.

Those spaces in which you want to be seen.
In a way that's refreshingly easy for all of us.

However you like it, KV is here to delight you.

be bold. be inspired. be seen. be Kurt Versen.
