

Stud Mount Transformer Connectors

Whether you're looking for savings or convenience, CMC® has a connector that meets your need.

For everyday stud mount connections at a low price

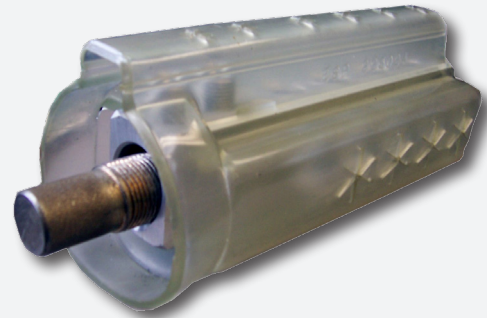

Lower Cost Option.

- CMC offers our RLS (screw on) and RLSS (patented Keyhole™ and Slip Fit) designs.
- Ideal for stud mounted connections requiring 5/8 or 1" studs.
- Punched, lock-on PVC insulating cover included.
- Available in 350 MCM size for 5/8" connections.
- Available in 500 and 750 MCM sizes for 1" connections.

For maximum convenience and versatility

Stock one connector to cover all your connection needs.

- CMC offers the patented Sharkbite™ RLB Series.
- Dependable connections with 5/8" - 11 and 1" - 14 transformer studs. **Both sizes fit in the same hole.**
- Sharkbite™ mounting hole feature increases surface area contact on transformer stud by over 1000% compared to traditional connectors.
- Sharkbite™ feature securely locks the connector onto the stud to eliminate wobble.
- Available in 500 and 750MCM sizes.
- Range taking mechanical connection and Dual Rated for Copper or Aluminum Conductor.
- Allows for left or right-hand mounting.
