SiteSync™
LIGHTING CONTROL

Introducing a wireless technology that makes outdoor lighting control simple, reliable, and affordable

Simple, Reliable, and Affordable.

SiteSync™ Lighting Control delivers **flexible control** strategies for **reducing power consumption** and **minimizing maintenance costs** while **delivering the right light levels** with a simple and affordable wireless solution. With SiteSync Lighting Control's **pre-programmed** approach, installation becomes a quick and easy process, greatly **reducing the complexity, time, and cost** compared to typical field commissioning.

SiteSync Lighting Control is based on a **wireless mesh network** architecture that enables luminaries to **operate independently** without the need for web based connectivity. This provides a cyber safe platform that delivers **reliable communication and control** versus other gateway based systems. With a **complete offering** of Hubbell Lighting site and area, decorative, garage, wall, and flood LED luminaires available with SiteSync Lighting Control, you have the flexibility to create an intelligent outdoor lighting package that will **meet a wide variety of application needs.**

AUTO DEALERSHIPS / AREA & SITE / PARKING / RETAIL / SECURITY / PATHWAY

Specify
Specify with Design Flexibility

- Provide Hubbell Lighting with a completed pre-commissioning worksheet
- Basic information required:
  - Quantity, Catalog No., Type No., Pole No.
  - Fixture dimming and time schedules by group
  - Fixtures with motion sensor and delay settings by group

Install
Simply Install, Set Date & Time

- Luminaires are shipped pre-commissioned from the factory
- Each luminaire arrives onsite with an identification label; install in the appropriate location
- Use SiteSync software (Windows PC or Tablet with bridge node required) to wirelessly broadcast current date and time

Save
Enjoy the Immediate Benefits of SiteSync Lighting Control

- Once the three-step installation is complete, SiteSync Lighting Control starts working to:
  - Deliver significant energy savings
  - Maximize the life of lighting assets
  - Decrease maintenance related costs
  - Meet key energy code compliance requirements
  - Create a safer environment
  - Provide the right light levels when and where needed
  - Reduce your total cost of ownership

SiteSync Lighting Control provides the **industry's simplest means to install** and reap the immediate benefits of implementing an outdoor controls solution.

HUBBELL®
Control Solutions

HUBBELL **HUBBELL® Lighting**

Design Flexibility

- User defined dimming schedules, for each day of week and up to 24 special dates
- Luminaires are grouped but each luminaire may still maintain unique schedules
- Supports multiple complex dimming schedules using real or astronomical time
- Motion detection support using master & satellite grouping
- Lumen maintenance compensation.
- Automatic adjustment for Daylight Savings Time

Installation Simplicity

- Factory pre-commissioning removes complexity and reduces time and cost
- Luminaires are tagged for quick and easy identification and installation
- Simply set date and time to complete install process
- Modify schedules in the field at any time using software and bridge node (USB radio)
- Software and bridge node work with any Windows PC or use SiteSync Windows tablet

System Capabilities

- Distributed Intelligence - removes need for web access, central controller or gateway
- Semi-autonomous wireless mesh network provides peace of mind with cyber-safe and reliable architecture
- No reoccurring fees for service, support or licenses
- Offers advanced security options for encryption and channel selection
- Manual control functions (dimming level, flash, reboot)

A growing list of Hubbell Lighting outdoor LED luminaires offered with SiteSync Lighting Control provides greater design flexibility to meet all your project needs.
