

<u>Columbia</u> LIGHTING

LLHV VERSABAY® LED HIGH BAY

PRACTICAL AND VERSATILE OPTIONS

LLHV offers a wide range of options and accessories that can be shipped with the product or easily installed in the field. Sensors and cord sets are plug-and-play for ease of installation. Wire guard and occupancy/daylight sensor shown at left.

ALL THE RIGHT CHOICES

LUMENS PER WATT

or lumens per watt (LPW). LLHV maximizes lumens per watt to provide effective lighting, increase operating profit, and promote quick payback for relight projects.

48% less watts than metal halide

33% less watts than fluorescent

13% less watts than typical LED high bays

Simple payback analysis demonstrates that return on investment to replace HID sources is typically under two years. When utility rebates and maintenance savings are factored in, the payback is even more dramatic.

LONG LIFE

60,000 hours L80 lumen maintenance to take the stress out of facility maintenance.

DESIGNLIGHTS® CONSORTIUM QUALIFIED

DLC® (DesignLights Consortium) Qualified for utility rebate eligibility and specification compliance - see www.designlights.org.

Overall performance of LED lighting is measured in efficacy,

WATTS

VersaBay® LED operates at low input wattage to reduce lighting power density and energy expense.

On average, VersaBay® LED uses:

CASH FLOW POSITIVE

Hubbell Lighting's unique financing option, providing flexible and easy access funding solutions for commercial lighting projects. www.hubbelllighting.com/resources/financing

CONTROLS COMPATIBLE

LLHV offers occupancy, daylight sensing, 0-10v dimming, or ControlScope® enabled wireless radio options. Sensors can be ordered with the product or easily retrofitted later with plugand-play connectivity.

AMBIENT OPERATING TEMPERATURE

LLHV operates in environments as low as -20°C and as high as +65°C. See specification sheet for configurations and details.

Drivers include 6kV surge protection.

Fixture to be suspended a minimum of 28" from solid surface.

CRI

LLHV provides 83+ CRI. Color rendering is important for crisp vision with clear detail recognition. When CRI is 80 or higher, labels stand out. It becomes easier to differentiate between different materials, textures and patterns. Whether it's a warehouse rack or a convention center with signage, CRI makes an important difference in lighting quality.

NARROW OR WIDE DISTRIBUTION

VersaBay® LED offers a choice of narrow distribution for stacks or wide distribution for open areas. Many LED High-Bay products do not offer this choice, and take a one-size-fits-all approach that does not provide good lighting in all areas.

GOOD FINANCIAL SENSE

VersaBay® LED provides excellent return on investment.

Luminaire	400W Metal Halide	LLHV High Lumen
Watts	455	194
Annual Energy Cost	438	187
Controls	_	0ccupancy
Simple Payback	-	1 Year

1.3 YEAR
ROI

8760 hours, in-aisle occupancy 25%, 0.11 kWh rate; estimated results shown for general information only. Estimate does not include utility rebates or maintenance savings.

CRITICAL NEED

Well lit racks Even, vertical illumination Visibility of labels Efficiency of operation

LLHV Solution

Optically efficient linear LED array to reduce shadows Narrow distribution to focus light in rack areas 83 CRI color rendering Optional occupancy and daylighting controls

MANUFACTURING

Productivity and maintenance benefits combined with energy savings make a substantial contribution to operating profit. VersaBay® LED improves productivity by providing comfortable, effective lighting, with very attractive ROI.

CRITICAL NEED

Task visibility Lighting uniformity Ability to discern materials Wide temperature range

LLHV Solution

Choice of lumen packages Wide/narrow distribution to light work & storage areas 83+ CRI color rendering

Product configurations from -20°C to +65°C operation

GYMNASIUM

VersaBay® LED meets the challenges of gymnasium lighting by providing all the right features to keep the gym attractive and efficient for many years, with a timely payback for the lighting investment.

CRITICAL NEED

Safety features High light levels Even illumination Install-and-forget operation

LED lumen packages for mounting heights up to 40' Wide distribution to spread light across large areas

150/250 MH	250/400 MH	400 MH	400-750 MH	750-1,000 MH	1,000 MH	S	HID	
2T5HO	4T5HO	6T5HO				Replaces		T5H0 ■=
4T8	6T8	8T8					Fluorescent	T8

Matrix above is provided as a general quideline only. Mounting height information shown above applies to both narrow and wide distributions. Each application should be individually evaluated with lighting design software to confirm light levels. Photometric files are available at columbialighting.com

OPERATING TEMPERATURE

LLHV ambient operation is between -20°C and +65°C according to product configuration and rated life. See specification sheet at columbialighting.com for details.

Χ	32,502 - 39,650	287	138
U	37,936 - 52,434	368	142

Actual lumens will vary according to color temperature and other factors. For exact lumens and watts see specific photometric test(s).

- ¹ Side panels increase height to 21/8".
 ² Lens reduces max ambient operating temperature (see table).
- ³ Using a Wire Guard may cause shadowing.
- 4 Side panels only; does not include lens or wire quard options. ⁵ ELL14 reduces max ambient temperature (see table).
- ⁶ Not available with 347V or 480V.
- 7 For use only with L, M, H Lumen packages.
 8 Registered trademark of Daintree Networks, used by permission.
- ⁹ Consult factory for V, X, U lumen packages.
- ¹⁰ Not available with ELL14.
- ¹¹ Consult manufacturer for compatiblity.
