LED Bollards

“As distance to architecture decreases, luminaire height and scale should also decrease.”

Kim Lighting’s Theory of Relativity

Blending light fixtures into the cohesive design of the site’s architecture has always been a guiding force in developing and implementing Kim’s Theory of Relativity. With the introduction of Kim’s Luminate Bollards in the late 70’s, design elements transitioned to replace all tall poles that resided close to buildings with the use of more complimentary and less obtrusively scaled luminaires providing a more pleasant pedestrian experience and balanced visual plane.

Kim continues its tradition of providing the latest innovation in product design and technology to deliver the next generation of bollard illumination to meet the growing demands of today’s environments. Our wide array of bollards incorporate the latest in LED, battery and control technologies; feature state of the art optical systems; and improved vandal resistance, brightness controls and architectural compatibility.

Today’s pathway has never looked so good.

Vandal Resistant Bollard

Rugged construction, yet stylish design make the VRB the “go to” solution for public areas where vandalism may occur. Full high-angle louvers provide low level brightness with broad light distribution. The optional dual function model offers high-angle louvers for controlled downlight and vertical louvers for uplight. This options provides both path and accent lighting.

ORDERING INFORMATION*				
1 Fixture:	VRB1		VRB2	
	VRB1C		VRB2C	
	C = Concrete Shaft			
2 Source:	TYPE		COLOR	VOLTAGE
	10L Type I 15L Type III 20L Type V		2K, 3K, 4K, 5K	UV 120-277 Volt
3 Finish:	BL	Black	PS	Platinum Silver
	DB	Dark Bronze	WH	White
	SG	Stealth Gray	CC	Custom Color
4 Option:	EM Battery Back-up, DR Duplex Receptacle, and DR-GFI Duplex Receptacle with ground fault circuit interrupter			
5 Concrete Riser:	CH-C	Charcoal	NG-C	Natural Gray
	BR-C	Brown	WH-C	White
Example: VRB1C / 10L5KUV / SG / EM / NG-C

Features

Kim Lighting’s LED Bollard Collection offers a versatile, stylish and energy efficient low level lighting solution for both contemporary, and traditional architecture. Kim’s bollard collection features the latest in LED technology and optics offering improved lumen output and energy efficacy.

- Seamless construction with no visible fasteners or screws
- Vandal resistant options
- Aluminum and concrete shafts
- 3000K, 4200K, and 5100K color temperatures
- Two light engine systems
- Multiple distributions - Louvers, Non-Louvered designs, Controlled Up-light
- Battery back-up options available for stand by illumination
- Full Cutoff & Dark Sky compliant

Mid-Power LED Board shown above and the Vertical High Power LED Light Engine below.

Bounce® Bollard

The Bounce bollard’s unique transitional design allows it readily adapts well to a wide range of architectural designs from traditional to contemporary. The bounce family includes site/area, and wall mounted luminaires for a consistent appearance throughout an entire site.
