

Style. Design. Control.

Downlighting Solutions for Architectural Ceilings

kurt versen 

Taking architectural lighting design to new levels

Seamless Integration...

Unparalleled Performance

Round and Square solutions for ceilings up to 30'. The full product family includes downlights, directional downlights and lensed wall washers to address multiple design elements within a space with a consistent aesthetic. Whether it be

matching products in multiple ceiling heights, slope ceiling applications or accent lighting, the elegant transition between product functions allows continuity from below the ceiling creating complementary design effects.
