

Prescolite and Lutron have teamed up to offer the best quality CFL downlights and dimming ballasts in the industry. Three popular Lutron dimming ballast models (Hi-lume®, Compact SE™, and Tu-Wire®) are now available as standard options for the Prescolite Architektūr CFL family of downlights, allowing for easy specification of both.

Prescolite Architektūr CFL downlights

- Superior brightness control to eliminate glare
- Virtual Source® Optics allow symmetrical appearance and distribution of light in the space
- Available in four-, six-, eight- and nine inch apertures
- Same housing accommodates downlight, wall wash, and regressed lens trims
- UL, CSA listed for damp location and through wiring

Lutron dimming ballasts

- World's only 100% to 1% T4 fluorescent dimming with Hi-lume
- Save electricity, maintain lamp life, and save the environment
- Add flexibility to any room by providing the right light level for a variety of activities
- Give employees control of lights for increased comfort and productivity
- Continuous dimming and ultra-quiet operation with no visible lamp flicker
