HORTICULTURAL QUESTION LIST

Ask your customers the following questions to help them find the proper solutions and requirements for their applications.

1. Do you know how much DLI (Daily Light Integral, mol/m²/d) your plants need from the artificial lighting?
2. If no, do you know how much DLI you already have in your grow room?
3. What light are you currently using for your plants?
4. How many hours a day do you plan to have the lights on?
5. Please answer the following questions:
 - a. What plants do you grow?
 - b. Where are you located?
 - c. What season do you need supplemental lighting for your plants?
 - d. What grow stage do your plants need lights?
6. What type of facility do you have (permanent green house, tube green house, warehouse, etc.)? What is the size of your facility (L x W x H)?
7. If you grow plants indoor, what is the color of the wall?
8. What is the size of your grow area/beds/benches (L x W x H)? How many beds/benches do you need the LEDs lighting in your facility?
9. What is the average height of the foliage above the floor?
10. Please attach or send digital pictures of the application so we may fully understand what we are trying to find a solution for (phone pictures will suffice).

Answer the above questions as fully as possible.
