MD8LED

A high-output LED downlight delivering more than 15,000 lumens, suitable for the large commercial and architectural interiors, this 8" downlight is also available in a cylinder with multiple mounting options and finishes. With high ceilings and low watts per square foot, Megalum is the perfect solution to ever tightening energy codes and is available with Variable Intensity Technology and DMX dimming.

MD6LED

A 6" answer to smaller aperture needs, the MD6LED comes with all the performance of the Megalum family and high output up to 9,000 Lumens, but in a size that may be more suited to application needs.

LC6HL

Liteframe Commercial LED HIGH LUMEN (HL) is designed to provide high outputs and high efficacies at a price that makes LED the right choice over traditional sources. Applicable for mounting heights up to 30-40 ft., this downlight family comes in both 6" and 8".
