## CMANCE Insulated Hand Tools

Catalog 2100 March 2020

## Grip-All Clampsticks External Control Rod

- External Operating Rod Type
- Tested per OSHA \& ASTM F711
- Versatile tool puts an easy-to-control "finger" on an insulated pole
- Primarily designed for installing hot-line and grounding clamps
- Also serves both overhead and underground circuits with various end fittings

## Operation

- Operating mechanism (or "shotgun") incorporates a sliding hand grip that opens the hook to grasp a clamp eyescrew and retract it into tool head
- Latch must be depressed to release locked hand grip that opens the hook
- For smooth operation, investment-cast stainless-steel components include Jaw, Jaw Holder, Safety Stop, Lockbar and Latch illustrated below
- Lexan ${ }^{\circledR}$ tool head is designed for close-quarter operations
- Worker must maintain recommended work distance based solely on the Epoxiglas ${ }^{\circledR}$ pole section of the handle, as the hook and its actuator are metal parts
- Easy-care Grip-All Clampsticks do not require field stripping to clean
- All insulated parts, including the operating rod, are outside the main pole, readily accessible to wipe dry

To accept grounding clamps with long eyescrews, all Grip-All clampsticks feature $63 / 4$ inches of head travel.

Notch in tool head aligns the clamp while the operator places it.

## ELBOW PULLER TOOLS

Note: Grippers are not included with tools on this page. To order grippers interchangeable for 15, 25 and 35 kV , see REPLACEMENT GRIPPERS table on page 2105.

## Features \& Applications

- Tested per OSHA \& ASTM F711
- Facilitate removing elbow connectors from transformer bushings and other apparatus
- Elbows can be difficult to remove when silicone grease on the interface of elbow and bushing dries out and hardens over time
- Special integral hook on tool head fits through rubber eye of elbow or metal hook of bushing cap
- Used in this manner, hook adds extra control and pulling power to grippers

## IMPACT Elbow-Puller Tools

## Features \& Applications

- Lightweight tool uses slide-hammer mechanism to easily disengage and replace elbows
- Tool and grippers help operator to control elbow and stiff underground cable lead
- For sure, balanced grip, 5-lb. slide hammer is plastisol coated and flared at both ends
- For secure handling, both front and rear handgrip areas of pole are coated with Griptread
- Available in three lengths, tools are made of 1-1/4"-diameter orange Epoxiglas® pole
- $6^{\prime}$ to $8^{\prime}$ foot units meet OSHA requirements
- 4-1/2' unit, labeled "For Rubber Glove Use Only", has 5"-long insulation length

## Operation

To pull an elbow connector:

- Insert hook through eye on elbow
- Close down grippers on elbow by rotating pole
- Support tool with one hand on front grip behind handguard and other hand on slide hammer
- Slide hammer from front to rear anvil
- Resulting impact should release elbow with sufficient momentum to withdraw it from bushing without extended arcing
To install an elbow connector:
- Follow the same procedures for pulling, EXCEPT use slide hammer impact against front anvil to help seat the elbow

## WIRE-HOLDING STICKS

Head of the tool locks in three positions . . . enables lineman to handle conductor from any angle.

With handle positioned as shown in photo above, the knurled nut can be turned to adjust the gripper to the exact wire size.

## Wire Holding Stick

C4033068

## Features \& Applications

- Tested per OSHA \& ASTM F711
- Used on or around energized lines for forming, bending and positioning jumper wires
- Also used for holding conductors during splicing operations
- Gripper, with an eye for extra sticks, will handle No. 6 copper through 1590 kcmil ACSR

## Operation

- Grips like locking-type pliers
- By tightening the knurled nut at control lever, wire-holding jaws can firmly grip conductor
- When doing this, tightening control lever must be in relaxed position about 1" from pole
- To secure conductor grip, push lever down to the pole
- To release conductor, simply move the control lever all the way up along the rod
- Head of tool locks in three stop positions, allowing lineman to easily position conductors
- Knurled screw handle below jaw opening adjusts head position from straight to right to left

Conductor Capacity: \#6 to 1590 kcmil ACSR ( $0.162^{\prime \prime}$ to $1.5^{\prime \prime}$ )

## TELESCOPING DISCONNECT TOOLS

## Features \& Applications

- Tested per OSHA \& ASTM F711
- Allow linemen to perform many routine jobs from ground level
- Universal end fitting on insulated top section accepts a wide variety of attachments
- This allows lineman to disconnect switches and replace cutout tubes
- Also allows lineman to remove pole covers, prune trees, plus other overhead tasks
- Sticks retract to approximately 5 ft . for easy truck transport (even in most cab sections)
- Heavy-duty, spring-loaded plastic buttons keep extended tool sections locked in place
- As each section extends and slightly twists, buttons also pop securely into place

## Standard Versus Heavy Duty

- Both units feature same telescoping tube design
- Heavy-duty units have slightly larger tip sections: 1-1/4" versus 1-1/8"
- Each heavy-duty telescoping tube is also slightly larger
- This results in more rigidity, important for managing heavyweight maintenance tasks
- Both tip sections feature proven Chance Epoxiglas ${ }^{\circledR}$
- This unicellular foam-core material prevents moisture trapping voids between foam and tool

When space is extremely limited for truck storage, a 23 ft . Telescoping Tool that compacts to 4 ft . is available as Catalog No. C4031739.

# Telescoping <br> Measuring/Disconnect Tool 

## - One tool does it all • English AND Metric Scales Tested per OSHA \& ASTM F711

## Features \& Applications

- Tested per OSHA \& ASTM F711
- English and metric scales for measuring pole heights and conductor clearances from ground
- Easy-to-read scales feature large black characters on Chance orange fiberglass sections
- English scales are marked with 1' increments
- Each inch is marked in bold numbers and half inches are indicated with intermediate bars
- Removable disconnect head for operating switches and cutouts
- End fitting on insulated top section accepts other Universal Tool Accessories (Pages 2120-2127) for energized conductor applications, all from the ground
- Positive spring-load locking-button mechanism and plug feature prevent tool separation
- Once snapped into place, buttons securely lock into position - no unexpected tool retractions

Both scales are marked: (on the right) English feet, inches, half inches

AND
(on the left) Metric meters, decimeters, centimeters.

## Operation

- To extend tool to desired length, pull out top section and rotate it until button engages in next section
- For measuring aerial distances, continue this process until tip reaches desired height
- Next, set butt of tool on ground and read scale at eye level for exact distance of tip above ground
- To retract, depress button of largest section first, then rotate it to disengage and collapse section
- Continue this process by taking each next smaller section in turn

Heavy-Duty Adjustable Sticks

## - Two-section telescoping tool <br> - Two sizes and three styles

## Features \& Applications

- Tested per OSHA \& ASTM F711
- For substations and close-clearance worksites
- Clearly marked at each 1' extension lock
- One of these tools can replace as many as eight singlelength hotsticks
- Adjustable sticks can be stored in short collapsed lengths and to avoid difficulties of maneuvering extra-long sticks through busswork structures
- Heavy-duty construction
o Classified as Heavy-Duty due to its large (1-1/4"-diameter) insulated top section and 1-1/2"-O.D. epoxy-reinforced fiberglass base tube
- 24 " overlap at usable-length extremes
o In each size, a 2' section of Epoxiglas $®$ foam-core top section remains inside the base section at the longest locked, usable length
o At the shortest locked length, insulated top section extends a full 2 ' beyond base

## Operation

- Easy to use, yet rugged mechanism
- High-strength plastic buttons - same as those in other Chance telescoping tools - keep tools locked at each length
- As top section is extended and twisted, lock button pops into place
- One worker can quickly adjust length with a convenient alignment dot at each 1 ' setting on the insulated section that matches another dot at the top of the base section

## Epoxiglas ${ }^{\circledR}$ POWER-FUSE LIFT STICK <br> - Storage Bag Included

## Features \& Applications

- Tested per OSHA \& ASTM F711
- Removes and installs power fuse holders up to 50 lbs .
- Unlike hookstick, operator never has to balance and lift dead weight when lifting fuse
- Epoxiglas® pole is tested to ensure insulating strength
- Operating lines are made with polypropylene rope
- Plastisol-coated carrier bands and shepherd hook attachments
- Disconnect prong is located on bottom ferrule of tool

How To Remove A Power Fuse - Hook carrier prong into the eye on the inverted lower end of fuse holder. Lift the fuse holder out of the contact trunnions, then lower carrier.

## WARNING

Operating lines must be kept clean and dry to avoid dangerous current flow in the rope.

## Operation

- During fuse holder removal and replacement, fuse mount supports weight of fuse holder and tool
- Ropes and pulleys for lowering and raising power fuse holder much like flag on flagpole
- Operator has complete control of fuse holder at all times
- Pole hangs free so operator can easily steady it during raising/lowering operation
- Only during the actual opening and closing of power fuse does operator support tool weight
- To remove power fuse, hook carrier prong into eye on lower inverted end of fuse holder, lift fuse holder out of contact trunnions, then lower carrier
