## INTRODUCTION

The original lighting foundation prototypes were developed by A.B. CHANCE Company in the late 1960's, and the CHANCE® brand Instant Foundations™ continue to be an economical solution to all lighting foundation requirements. These immediate installation anchors have high-strength pipe shafts to resist bending moments and installation torque.

Lighting applications include street, roadway, parking lot, signage, sports lighting, airport, decorative, and various architectural uses. CHANCE® foundation products are designed to resist both lateral forces and overturning moments from wind loads.

Other benefits include:

- Variable base plate design to accommodate various bolt circle poles
- Wire holes for 1" conduit
- Ground lug hole - no ground rod needed
