

### **Reliable & Time Tested**

**Harvey Hubbell** Inventor, Entrepreneur, **Industrialist** 

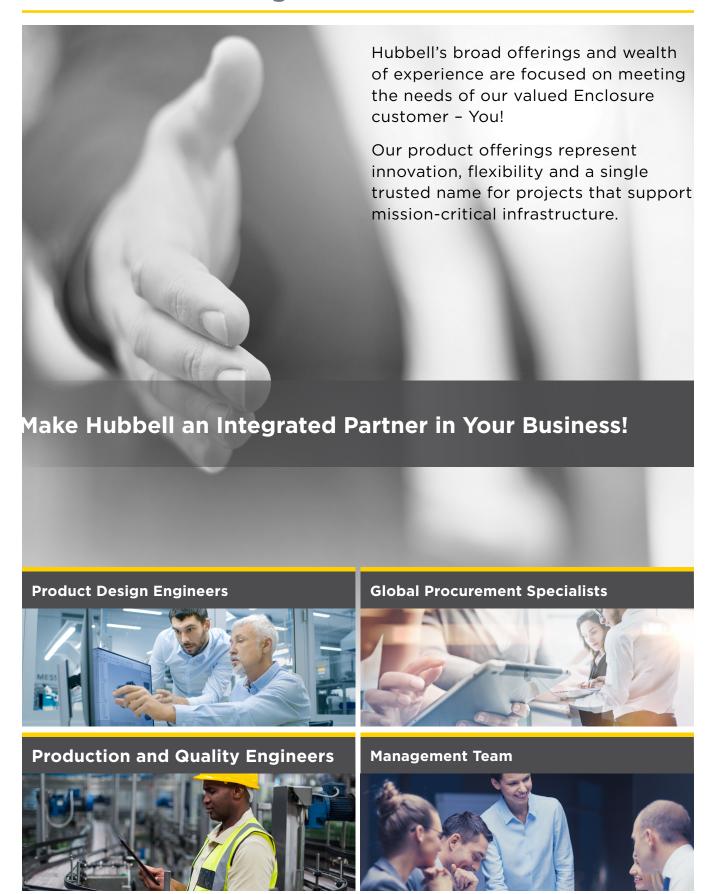

# "Enduring Products and People You Can Depend On"

Hubbell, Incorporated was founded in 1888 by Harvey Hubbell. Hubbell worked with ideas, dedicating his life to finding better ways. While Thomas Edison was discovering the potential of electricity, Harvey Hubbell created the first practical method to control it. His pull chain light bulb socket remains unchanged today. Later he developed the electrical plug and wall device arrangement that is so familiar to each of us.

As a leader in product innovation in the power industry, we carry on Harvey Hubbell's legacy by continually making investments in new product development, automation and equipment. Our efforts in research and development afford us greater strength in a global marketplace. Hubbell is committed to delivering products to support that demand through global expansion. We manufacture a variety of products that support the power utility, communications, civil construction, transportation, gas and water markets.

# **Pad-Mounted Equipment Solutions**

## **Pad-Mounted Equipment Solutions Selection Guide**

By utilizing an array of designs, materials and sizes, Hubbell has developed a comprehensive product offering tailored to meet your needs. We can provide a pad-mounted equipment foundation or mounting solution for virtually any piece of electrical equipment; from single and three-phase transformers, to sectionalizing cabinets and switchgear.

#### **Box Pads and Ground Sleeves**

Hubbell Box Pads and Ground Sleeves provide a means to securely anchor and support the weight of padmounted electrical equipment. The large, open interior also affords for additional cable looping and ease of installation. They are designed to be directly buried and protect against frost heave where applicable. Hubbell provides a full line of Box Pads and Ground Sleeves utilizing different materials to meet your needs.

#### **Polymer Concrete Box Pads and Ground Sleeves**

Hubbell's polymer concrete Box Pads and Ground Sleeves offer high strength and durability while being 1/10th to 1/3rd the weight of precast concrete alternatives.

#### **Fiberglass Box Pads and Ground Sleeves**

Hubbell's fiberglass Box Pads and Ground Sleeves feature a cosmetically appealing smooth exterior and flat mounting surface. Geometric bracing and deck support elements maintain structural integrity in this lightweight product line.

#### FRP Hard-Top Box Pads and Ground Sleeves

Hubbell's FRP Hard-Top Box Pads and Ground Sleeves combine a 4" tall impactresistant mounting surface made of polymer concrete with the lightweight body design of fiberglass units. Available in limited sizes.

#### **Equipment Flat Pads**

Hubbell's equipment Flat Pads are designed to work with an array of pad-mounted distribution transformers, switchgear, communication enclosures and metal-enclosed devices while featuring a variety of benefits. Functioning as a foundation, Flat Pads support equipment weight while being lightweight, non-conductive and remaining stable under freeze and thaw cycles. The available SPLITT-PAD equipment flat pad design makes retrofit installations easy and eliminates the need to discontinue service during installation.

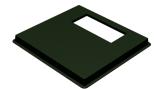

#### **Polymer Concrete Flat Pads**

Hubbell's polymer concrete equipment Flat Pads offer high strength and durability while being 1/10th to 1/3rd the weight of precast concrete alternatives.

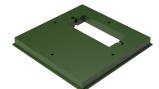

#### **Fiberglass Flat Pads**

Hubbell's fiberglass reinforced composites equipment Flat Pads feature a cosmetically appealing smooth exterior and flat mounting surface. Encapsulated support elements maintain structural integrity in this lightweight product line.

#### **High Density Polyethylene (HDPE) Flat Pads**

PenCell Plastics Transformer Pads are produced of High Density Polyethylene (HDPE) in a structural foamed injection molding process. Characteristics of outstanding compression strength and durability highlight some of its benefits.

#### **Cable Vaults and Pads**

Hubbell Cable Vaults and Pads are a two piece system designed to work with padmounted switchgear. They provide both a foundation for cabinet mounting as well as a ground sleeve for cable looping and protection. Derived from a corrugated fiberglass base and polymer concrete flat pad top, Hubbell Cable Vaults and Pads are a lightweight alternative to pre-cast or pour-in-place concrete.

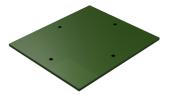

#### **Transformer Box Pad Covers**

Hubbell Transformer Box Pad covers are designed for secure yet temporary protection prior to a transformer being placed in service. Transformer Box Pad Covers are lightweight, non-corrosive and non-conductive and also allow box pads to be used as handholes. Available in limited sizes.

#### **Fiberglass Box Pad Covers**

Hubbell's fiberglass reinforced composites Transformer Box Pads Covers feature a cosmetically appealing skid-resistant gel coated surface.

#### **Hill Holders**

Hill Holders are designed for use in conjunction with single-phase pad-mounted distribution transformers where sloping terrain requires support from potential washout or erosion. Exposed surfaces are coated with a UV stabilized gel coat to match the surrounding landscape and electrical equipment.

#### **Fiberglass Hill Holders**

Hill Holders are made of fiberglass reinforced composites using fire-retardant resin and a combination of chopped glass spray-up and hand lay-up woven roving glass reinforcement. This process ensures structural integrity.

## **Above Ground Enclosures - Product Types and Materials**

Attention to quality, durability and performance have been hallmarks of every Hubbell above ground enclosure product and solution for more than 45 years. Our comprehensive product offering is tailored to ensure that we meet your specifications and needs while often exceeding applicable industry standards.

Our customers experience superior functionality and the unique benefits of refined processes and material types in every Hubbell above ground enclosures product. Whether it's Hubbell Fiberglass Products, Polymer Concrete Products, FRP Hard-Top Products or PenCell® Plastics Products, Hubbell has a product for your above ground enclosure needs.

#### **Hubbell Fiberglass Products**

Hubbell Fiberglass Products are manufactured with a fire retardant resin and a combination of chopped glass spray-up and hand lay woven roving glass reinforcement to ensure structural integrity. In addition, the fiberglass is protected by a marine grade UV stabilized gel-coat finish, which ensures longevity.

#### **Hubbell Polymer Concrete Products**

Hubbell Polymer Concrete Products are made from select-grade aggregates in combination with a polymer resin system. When combined through a process of mixing, molding and curing, an extremely powerful cross-linked bond is formed. Precast polymer concrete is reinforced with fiberglass to give it additional strength and rigidity.

#### **PenCell Plastics Products**

PenCell Plastics Products are produced through either an injection or rotational molding process. High Density Polyethylene (HDPE) is used for the structural foamed injection molding manufacturing process. The main benefit this process offers is allowing the forming of large heavy walled parts which provide outstanding compression strength and durability. Linear Low Density Polyethylene (LLDPE) is used in the rotational molding manufacturing process. This material and process provide complex shaped thinner walled parts which provide superior impact strength and durability.

#### **Hubbell FRP Hard-Top Products**

Fiberglass-reinforced polymer, also called FRP, is a special combination of polymer concrete and fiber-reinforced polymer. This hybrid construction, formed from an FRP shell and a polymer concrete ring, delivers a high strength, lightweight, abrasion resistant product that is protected from ultraviolet rays.

#### **Leveling Technology**

#### Taking Fiberglass Pads To a Whole New Level

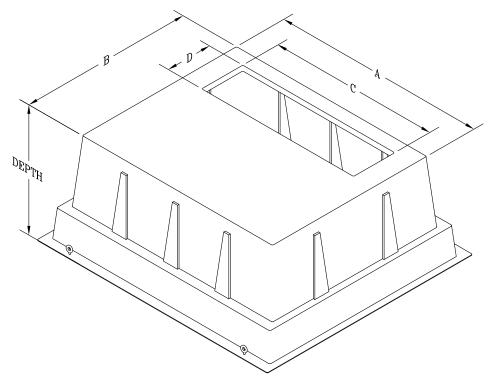

- Leveling becomes an effortless part of pad installation.
- Installers can evaluate levels instantly while standing on the ground.
- Levels are precisely molded into pads to ensure accuracy.
- Recessed mounting design protects levels from damage during shipment, storage, handling and installation guaranteed.
- Leveling option available for most fiberglass ground sleeves and single-phase box pads.

<sup>\*</sup> Additional cable openings (throat sizes) are available. The number of sidewall reinforcing ribs varies by model.

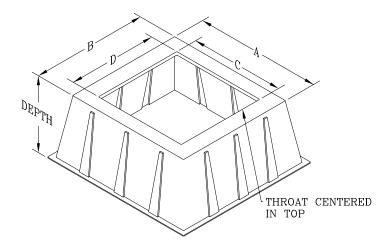

Three phase transformer box pads are custom designed to fit your needs. Please supply a footprint of the transformer and the transformer weight to allow us to recommend the correct size and strength box pad. The transformer footprint should show the tank and cabinet dimensions and the preferred cable opening size. As a guideline for the box pad sizes listed, the transformer weight should not exceed 350 pounds per square foot of box pad overall top area (length by width). The transformer cabinet should be within three inches of the box pad top edge on all four sides.

 $<sup>^{</sup>st}$  We offer pads with smooth and skid resistant surface. Make reference to the part numbering system table on page 38.

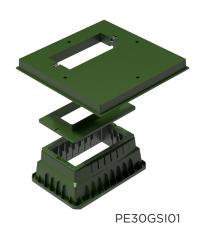

- A "PH" style pad may be made SPLITT-PAD Equipment Flat Pad simply by a change in the part number.
- To order a "PH" style pad as SPLITT-PAD Equipment Flat Pad, replace the "H" with "J" ex: PJ42421225A3S.

- Hill Holders are designed to help hold back dirt when a transformer needs to be installed on a hill.
- These heavy duty Hill Holders are manufactured using fire retardant resin and a combination of chopped glass spray-up and hand lay-up woven roving glass reinforcement to ensure structural integrity.
- In addition, the Hill Holders are protected by a marine grade UV stabilized gel-coat finish, which ensures longevity.
- The available sizes work for most single phase transformer installations.

|             |  |                      |                      | See Note 2                    |              | 8                     |

#### Note:

- 1. For pads larger than 99 x 99, the first two of the three digits of the length and width will be used to form the part number (example: A telephone equipment pad that is 133 x 150 will be designated as PK1315).
- 2. Dimensions run parallel to each other.
- 3. On some 500# pads where multiple throats are present, the large throat is designated in the part number.

# **Primary Pedestals**

## **Primary Pedestals (Sectionalizing and Deferral Cabinets) Selection Guide**

#### **Primary Pedestals, Sectionalizing and Deferral Cabinets**

Hubbell's Primary Pedestals, Sectionalizing and Deferral Cabinets are not only strong, durable and easy to install, but they also emphasize security and convenience. Manufactured from fiberglass, they are designed to meet the most rigorous industry standards. Hubbell also offers locking options for further maximized protection.

Offering the industry's broadest line of aesthetically pleasing Primary Pedestals, Sectionalizing and Deferral Cabinets Hubbell is sure to have a core product that satisfies even your toughest application requirements. In addition, Hubbell can also help customize a solution to meet your goals.

#### **Fiberglass Sectionalizing Cabinets**

Hubbell Fiberglass Sectionalizing Cabinets employ a robust design with geometric bracing, fire-retardant resin and self-extinguishing filler. They are finished with a UVstabilized gel-coat to provide a product unaffected by corrosive agents.

#### **Fiberglass Transformer Deferral Cabinets**

Hubbell Fiberglass Transformer Deferral Cabinets come in two styles with construction similar to our fiberglass sectionalizing cabinets. They are designed for temporary placement on a box pad and to provide feed through use prior to transformer installation.

### **Hubbell Fiberglass Sectionalizing and Deferral Cabinets**

Strength - Hubbell Fiberglass Sectionalizing Cabinets employ a robust design with geometric bracing to resist sidewall deflection and are built with a fire-retardant resin and self extinguishing filler.

- Cabinets are tested to flammability criteria of both ASTM D635 and UL-94.
- Cabinet sidewalls are load tested to 130 pounds per square foot.

Resilient - Hubbell Sectionalizing Cabinets are finished with a marine grade UV-stabilized gel-coat finish, which provides a durable product unaffected by corrosive agents.

- Cabinets are tested to chemical resistance criteria of ASTM D543 and ANSI/SCTE 77.
- Secure Hubbell Cabinets utilize a "Z Step" cover fitment design, RUS / ANSI double locking hasp and tamper resistant hardware to help prevent unauthorized access.
- Cabinets meet ANSI C57.12.28 Pad-Mounted Enclosure Integrity Standard.
- RUS Listed.

Efficient - Hubbell Sectionalizing Cabinets utilize a one-piece design with an integral ground sleeve which saves the installer both time and money.

Options - Hubbell Cabinet options include factory-installed junctions, caution or warning and a copper ground wire or bar.

Colors - Standard colors for Hubbell Cabinets are Munsell (medium) green and Willow (light) green. For additional color options, see page 51.

#### **Uncompromising Design:**

Pivoting Cover - Rotates more than 90 degrees giving operators unfettered access to elbows. Wind locks are included as standard hardware.

Cut Away Sides - By removing unnecessary material, Hubbell cabinets provide the user with unsurpassed access to elbows and junctions.

Mounting Brackets\* - Single and Three Phase Sectionalizing Cabinets have 0°-25° angle adjustable mounting plates standard for all junction mounting bar designs. This makes hot stick operation for all installations easier.

Junction Mounting\* - Hubbell junction mounting bars are designed to accept all 2-4 way junctions available on the market. Note: Contact factory for fitting information on 35kV, 4-way junctions.

Mounting bars are tested to withstand a 400 lb pulling force.

Low Profile - Internal hardware placement is located as high as possible making elbows easily accessible without compromising the installed cabinet profile. Cabinets maintain a 30" installed above grade height at suggested burial depth.

Locking Hasps - Hasps designed with fully captive hardware keep locking hasp and operator tools out of surrounding dirt.

Extended Base - The integral ground sleeve is extended and utilizes a 10° rake to give maximum room for looping cable for all phases.

<sup>\*</sup> For use on Sectionalizing Cabinets.

# **Fiberglass Cabinets**

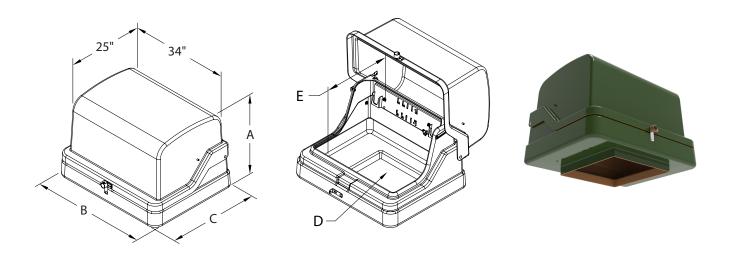

#### Features

- Multiple sizes and depths
- UV stabile gel coat
- 3" base flanges for stability
- Sidewall geometry or ribbing for strength
- Double locking non-corrosive hasps
- Full range of options available

This product is also available with sliding parking stands. See part numbering table for reference.

### **Options**

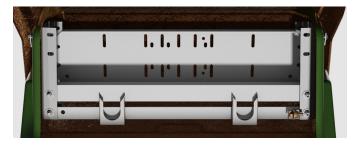

#### **Fiberglass Single Phase Junction Mounting Bars**

All single phase mounting bar designs feature:

- Stainless steel parking stands.
- Compatability with all grounding options.
- 0° 25° fully angle adjustable mounting plates with detents.
- Captive stainless steel hardware.
- In-Line Parkings Stands Offer a low cost option with rigidly mounted parking stands in between junctions. Removes easily with four carriage bolts. Mounting bar material is aluminum. These only work with junctions 13" wide or less; contact the factory for fitment information.
- Sliding Parking Stands Available both above or below the junction mounting bar, these offer extremely versitile feed thru and parking options. Removes easily with four carriage bolts. Mounting bars and parking stand rails are aluminum.

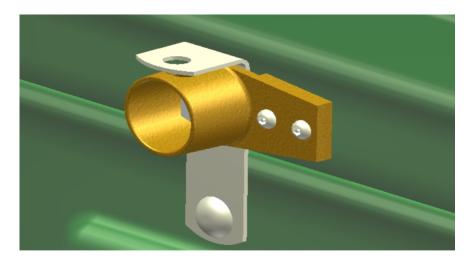

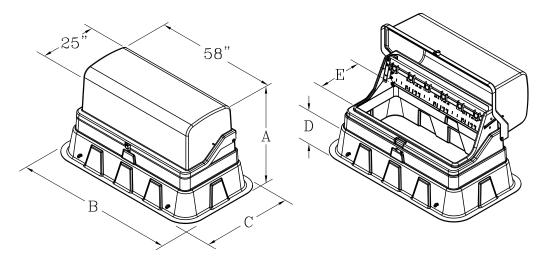

#### **Double Locking Hasps**

The standard DF3 penta is a traditional horizontal mount design. The hasp is cast aluminum-bronze for high strength and corrosion resistance. Padlock retainer and captive harware are 18-8 stainless steel.

# 58" X 25" Three Phase Sectionalizing **Cabinet**

Dimensions/Data

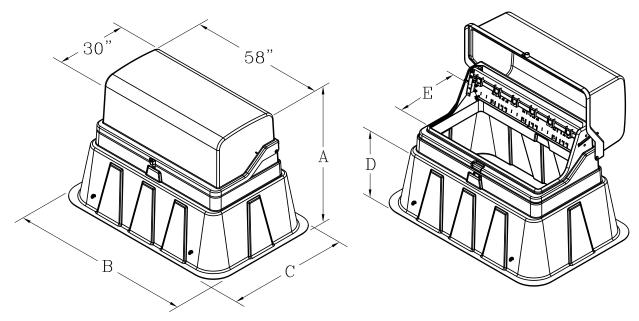

All mounting plates are fully adjustable from 0°-25°. Detents exist for 0°, 5°, 12°, 20° and 25°. This unit does not accommodate 200 Amp taps off 600 Amp service.

<sup>&</sup>quot;Munsell Green" part numbers listed. To order other colors, visit page 51 to view the options. To order junctions pre-installed in the unit, visit page 51 to view the options.

### **Options:**

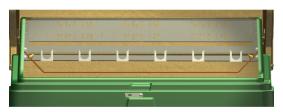

#### **Fiberglass Three Phase Junction Mounting Bars**

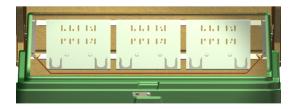

All Three phase mounting bar designs feature:

- Stainless steel parking stands.
- Compatability with all grounding options.
- 0° 25° fully angle adjustable mounting plates with detents.
- Captive stainless steel hardware.
- In-Line Parkings Stands Offer a low cost option with rigidly mounted parking stands in between junctions. Removes easily with four carriage bolts. Mounting bar material is aluminum. These only work with junctions 13" wide or less; contact the factory for fitment information.
- Sliding Parking Stands Available both above and below the junction mounting bar, these offer extremely versitile feed thru and parking options. Removes easily with four carriage bolts. Mounting bars and parking stand rails are aluminum.
- Modular Junction Plates Allows each junction to be removed individually with two bolts. Stainless steel parking stands are located below the junctions. Material is hot dip galvanized mild steel.

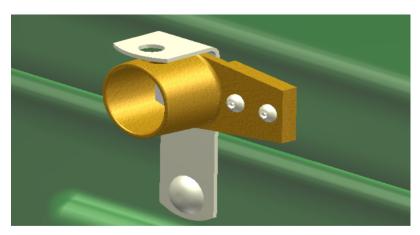

#### **Double Locking Hasps**

The standard DF3 penta is a traditional horizontal mount design. The hasp is cast aluminum-bronze for high strength and corrosion resistance. Padlock retainer and captive hardware are 18-8 stainless steel.

<sup>\*</sup> This is an example part number and to reference Catalog Number System for more details. Note: Hubbell junctions are installed (when requested) unless otherwise specified.

### **Cable Accessories**

#### 15 kv Load Break Junctions

215J2U 215J3U 215J4U

#### Features

- Red snuffer nose for 15kV Class product recognition.
- Yellow seating indicator ring molded in for positive indication that mating product is fully seated.

#### RATINGS

Max. continuous voltage Continuous current

8.3 kV phase-to-ground 14.4 kV phase-to-phase

: 200 A rms

#### SHORT-TIME CURRENT RATINGS

0.17 seconds duration 3.00 seconds duration : 10,000 A rms symmetrical : 3.500 A rms symmetrical

#### INSULATION WITHSTAND VOLTAGES

Basic Impulse Level (1.2 x 50 µsec.\wave)

: 95 kV crest

60 Hertz (one minute)

: 34 kV rms

Corona Extinction Voltage (5 pC) : 11 kV rms

#### SWITCHING

1-phase and 3-phase circuits : 10 loadmake/loadbreak operations 8.3 kV phase-to-ground, 14.4 kV maximum across the open contacts.

#### FAULT CLOSURE

One fault-close operation at 8.3 kV phase-to-ground, or 14.4 kV phase-to-phase; 10,000 A rms symmetrical, 10 cycles, (0. 17 seconds).

#### PRODUCTION TESTS

100% factory test for partial discharge and either AC HI-POT (34 kV for 60 seconds) or impulse (BIL) (95 kV 1.2 x 50  $\mu sec.\$ 

#### 25/28 kv Load Break Junctions

228J2U 228J3U 228J4U

#### Features

- Blue snuffer nose for 25/28kV Class product recognition.
- Yellow seating indicator ring molded in for positive indication that mating product is fully seated.
- Vented seating indicator to reduce partial vacuum flashovers.

#### RATINGS

Max. continuous voltage

Continuous current : 200 A rms

#### SHORT-TIME CURRENT RATINGS

3.00 seconds duration

: 10,000 A rms symmetrical : 3,500 A rms symmetrical

#### INSULATION WITHSTAND VOLTAGES

Basic Impulse Level (1.2 x 50 usec.\wave)

: 125 kV crest

60 Hertz (one minute)

: 45 kV rms : 21.5 kV rms

Corona Extinction Voltage (5 pC)

#### **SWITCHING**

1-phase and 3-phase circuits 15.2 kV phase-to-ground, 28.0 at 200 A with 70-80% lagging power factor.

#### **FAULT CLOSURE**

One fault-close operation at 16.2 kV phase-to-ground, or 28.0 kV phase-to-phase; 10,000 A rms symmetrical, 10 cycles, (0.17 seconds).

#### PRODUCTION TESTS

100% factory test for partial discharge and either AC HI-POT (45 kV for 60 seconds) or impulse (BIL) (125 kV 1.2 x 50 µsec. wave).

### **Cable Accessories**

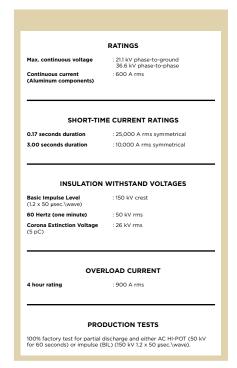

#### **Deadbreak Junctions**

| # of Positions | 600A   | 900A   |
|----------------|--------|--------|
| 2              | 635J2U | 935J2U |
| 3              | 635J3U | 935J3U |
| 4              | 635J4U | 935J4U |

#### Features

- Current carrying components are aluminum for 600A and copper for 900A
- Available for 150 and 200 kV BIL

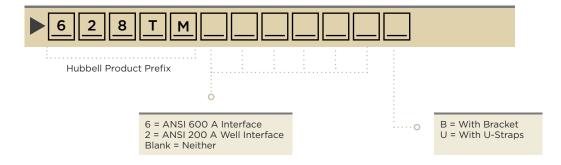

#### **Tapmaster™ Multi-Point Junction**

The 25/28 kV Junction offers a complete change in design approach, addressing the issues of space savings in vaults and enclosures, mounting flexibility and the flexibility of locating parking stands to accept accessory products required to operate and maintain a distribution system.

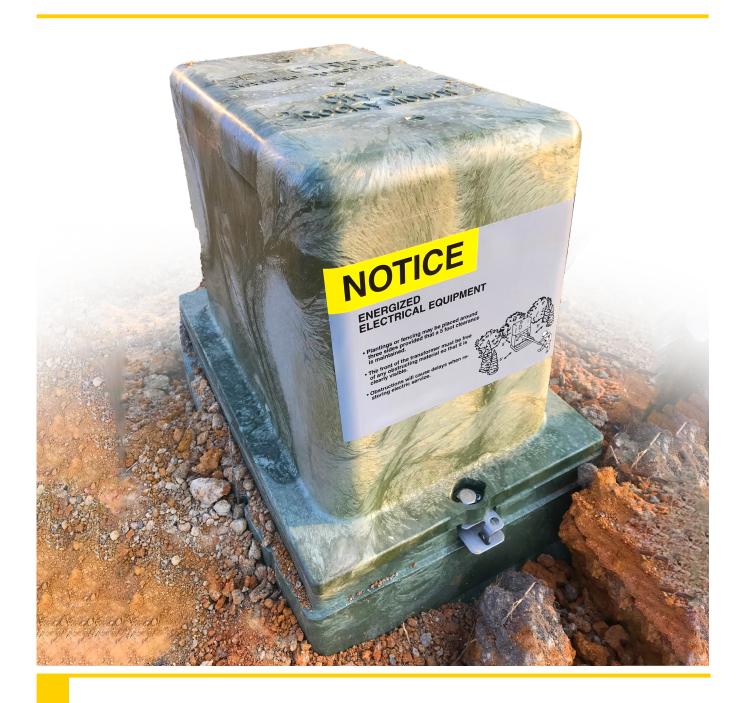

3.4.5. or 6 pt junction with any configuration of 600 A interfaces and 200 A wells needed for any project.

Note: Not all part numbering combinations are possible. Check with Hubbell to verify existence.

# Secondary and **Looping Pedestals**

## **Secondary and Looping Pedestals Product Selection** Guide

#### **Secondary Pedestals**

Hubbell provides a complete line of pedestals in fiberglass or structural foamed, injection molded, High-Density Polyethylene (HDPE). Our line includes Secondary pedestals, Feed-Thru pedestals, Looping pedestals and Advanced Metering Infrastructure (AMI) pedestals. Many of our PenCell brand Secondary pedestals are capable of being quickly converted for flush to grade use with the unique PenCell Option System. High and Low back pedestal designs offer maximum flexibility for internal hardware. Connector sets are available preinstalled or as hardware kits.

All Hubbell and PenCell brand pedestals incorporate the latest technology, giving them an unmatched combination of strength, durability and easy installation. As with all Hubbell products, our pedestals stress security, convenience and value.

#### **Fiberglass**

Hubbell fiberglass secondary pedestals models are available in either traditional fiberglass or matched tool molded compound for the smoothest possible finish.

#### **HDPE**

Structural foamed, injection molded, High-Density Polyethylene (HDPE) is used to create these rugged pedestals. The flared base designs create a bell jar effect if flooding should occur.

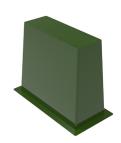

#### **Feed-Thru and Looping Pedestals**

Fiberglass Feed-Thru and Looping pedestals are designed for looping of primary or communications cable at locations where future plans call for the installation of a transformer or splice cabinet. The fiberglass, gel coated construction is lightweight while providing excellent environmental resistance.

# **HDPE Secondary Pedestals**

#### Features

- Meets requirements of typical Electric and Communications applications.
- Made of high density polyethylene structural foam.
- Various domes (covers) available.
- Non-Ferrous hardware, including captive securing bolt.
- Excellent environmental resistance.
- Available with or without connectors.
- Temporary service access doors available.

|                                      | Results     | Units       | Test Method |

| Dielectric Strength                  | 450         | Volts / mil | ASTM D149   |

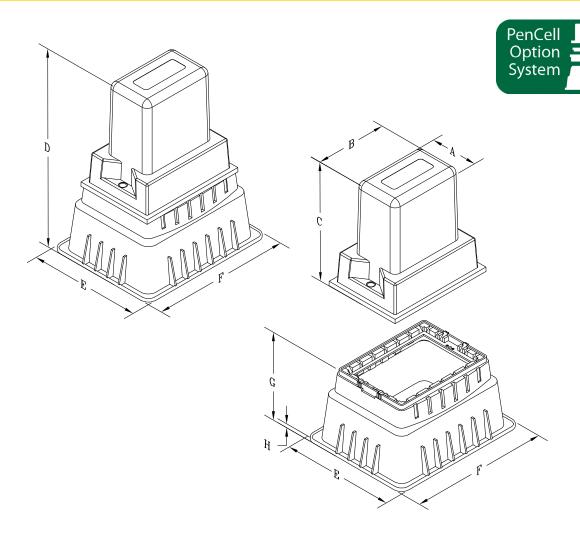

#### Features

- Multiple sizes and depths.
- UV stabilized gel coat.
- Base flanges for stability.
- Sidewall geometry or ribbing for strength.
- Double locking non-corrosive hasps.
- Full range of options available.

# **PenCell Option System**

#### **Exclusively from PenCell**

Only PenCell Plastics offers a system that accommodates your future planning.

- Change cover material.
- Add above ground pedestal.

# **PenCell Color Options**

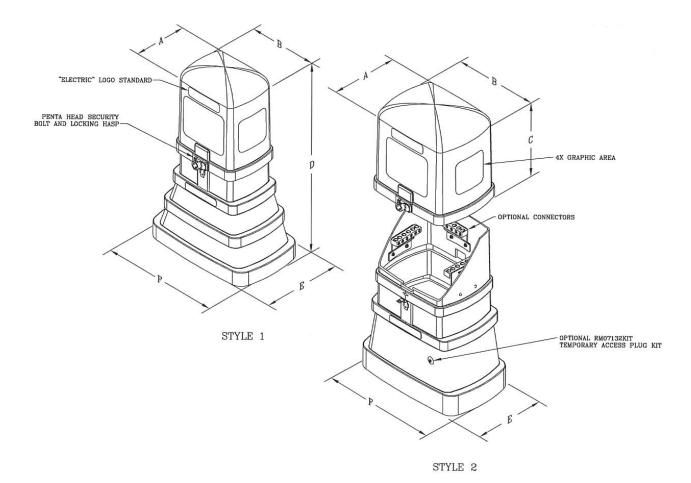

Most PenCell HDPE Pedestals are available only in PenCell green, with a few offered in gray. PenCell LLDPE Pedestals are offered in a wide variety of colors. The three general colors are PenCell green, medium green and light green. Other colors shown below are available for LLDPE Pedestals; they have minimum order quantities.

#### **Features and Benefits**

- Two sizes available.
- Linear Low Density Polyethylene.
- Antioxidant and chemical resistant.
- Nesting attribute.
- Flared base for stability.
- Integrated structural ribbing.
- No exposed internal hardware.
- Full range of options available.
- IEEE compliant double locking non-ferrous hasp.

### **LLDPE Secondary Pedestals**

#### **Features**

- Two sizes available.
- Linear Low Density Polyethylene.
- Antioxidant and chemical resistant.
- Nesting attribute.
- Flared base for stability.
- Integrated structural ribbing.
- No exposed internal hardware.
- Full range of options available.
- IEEE compliant double locking noncorrosive hasp.

|  | Results | Units  | Test Method |

#### **Fiberglass Secondary Pedestals**

Hubbell fiberglass pedestals provide a secure, maintenance free enclosure for secondary connections. Pedestals are available to accommodate floating connectors and have an optional high back design for easy connector mounting. These are available in both traditional fiberglass and a match tool molded compound for the smoothest finish possible.

#### **Benefits**

- UV stable gel-coat exterior
- Non-ferrous hardware resists corrosion.
- Glass fiber and resin construction for maximum flexural resistance

#### **HDPE Secondary Pedestals**

These injection molded high density polyethylene pedestals are designed to be rugged while providing the maximum ease of use and security. Available in four sizes, they feature a standard high back which eliminates the need for extra cumbersome brackets, extra wide bases for stability missing and cable training. With cover removed, the wide open design makes it easy to access wires for service.

#### Benefits

- Base flange provides stability and resists frost heave.
- Wide flared base assists with wire training and stability.
- Single piece base design provides fewer seams and better security.
- Sidewall ribbing will not bow under soil pressure when properly installed.
- UV stabilized material resists fading.
- "ELECTRIC" identification is molded into the dome.
- Non-ferrous hardware provides maximum corrosion resistance.
- Double locking hasp provides security and peace of mind.
- Graphics available.
- High and low back designs offer maximum flexibility for options.
- Connectors available mounted or as hardware kits.

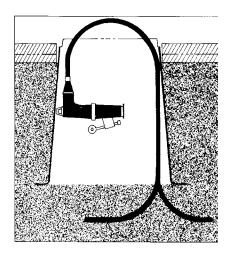

#### **Feed-Thru and Looping Pedestals**

Feed-Thru and Looping Pedestals provide convenient low-cost housing when preliminary work on URD installations gets underway. They eliminate the need for installing pads and transformers until they're actually needed and they can serve as a source for future pad-mount transformers or sectionalizing cabinets.

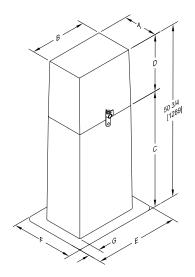

#### **AMI Pedestals**

Advanced Metering Infrastructure (AMI) pedestals are specifically designed for AMI initiatives. They're able to expedite the installation of remotereceiving units strategically located in high-density areas in order to collect electronic data sent out from SMART meters.

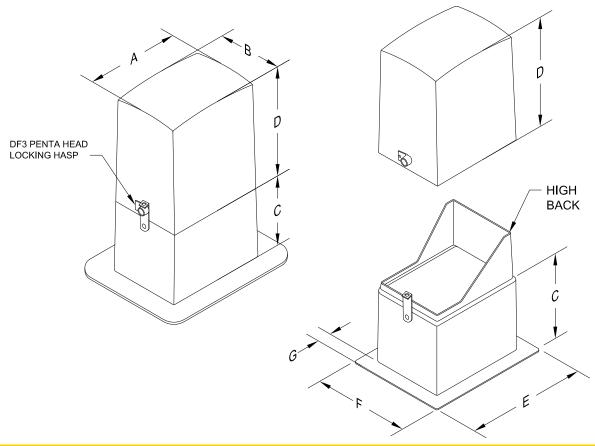

#### Benefits include:

- Strength Hubbell pedestal designs incorporate the use of fire-retardant resin, chopped glass that is injected into the resin and then projected onto the surface of the cabinet mold and a process called hand lay-up woven roving, which involves building up layers of fiberglass and resin using hand rollers, brushes and spray equipment when necessary for extra reinforcement.
- Resilient Hubbell pedestals are built to withstand the most extreme environmental conditions, whether natural or man-made. Pedestals are protected with a marine-grade UV-stabilized gel-coat finish, which provides a sturdy product finish unaffected by such corrosive agents as fertilizer spray, salt air, chemicals or ultraviolet rays. Combined with Hubbell's unique manufacturing processes, customers are assured of a product impervious to rust and corrosion.
- Efficient The lightweight nature of Hubbell pedestals allows for easy installation by a single individual and no field assembly is required.
- Secure As always, Hubbell's top priorities include security. The non-conductive nature of fiberglass used in the production of Hubbell pedestals reduces the potential for accidents. Security is bolstered by impact resistance - the ability to hold up under external force - and a double-locking hasp, which prevents unauthorized access into pedestals. Large flanges at the base of the pedestal provide excellent stability below grade.
- Proven Reliability Hubbell Pedestals are accepted by the Rural Utilities Service (RUS).
- Colors The two standard colors for Hubbell Enclosures are Willow (light) green and Munsell (dark) green.

### **CMC Connectors**

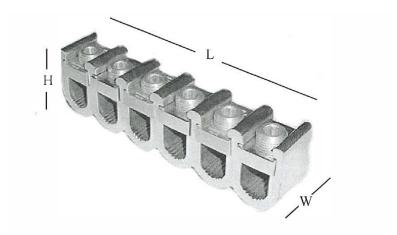

#### **Lay-In Pedestal Connectors**

600V

#### TYPE LI

**DUAL-RATED CONNECTORS** FOR ALUMINUM OR COPPER CONDUCTORS

- Unique lay-in feature reduces frustration of feeding multiple conductors through standard connectors.
- Each outlet has a removable "keeper" that allows conductors to be laid into the outlet, solving the problem of trying to bend in confined areas. The "keeper" is then slid over the conductor and the set-screws are tightened. It is fast and easy at initial installations, and for later service additions.
- Connectors are fabricated from 6061-T6 aluminum alloy and clear plated for high conductivity and strength.
- Fully tested ANSI CI 19.4 for Class 'A' connectors.
- CMC® recommends the use of a 9" insulated wrench for installations.

600V

#### TYPE NA

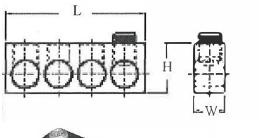

**DUAL-RATED CONNECTORS** FOR ALUMINUM OR COPPER CONDUCTORS

- Clear plated for low-contact resistance.
- Fully tested to ANSI C119.4 for Class 'A' connectors.
- Supplied with radial-tipped set-screws.
- 105°C rated black plastisol cover available.
- Connector fabricated from 6061 T6 aluminum alloy for conductivity and strength.
- Includes CO-OX oxide inhibitor in all conductor holes.
- Each unit individually wrapped and labeled for ease of identification and cleanliness.
- For installation, CMC® recommends the use of a 9" insulated Allen wrench.

#### NOTE

- For omission of CO-OX oxide inhibitor; delete suffix 'I'
- 2. Street light tap available add suffix "SL" to catalog number.
- 3. To order connector and cover add "C" to description. eg: NA350-6CI

# Service **Pedestals**

## **Service Pedestals Product Selection Guide**

#### **Service Pedestals**

In order to meet your most specialized needs, Hubbell offers a wide variety of service pedestals to satisfy even your toughest application requirements. In addition to a wide range of core products and options, Hubbell can help customize a solution to achieve your goals.

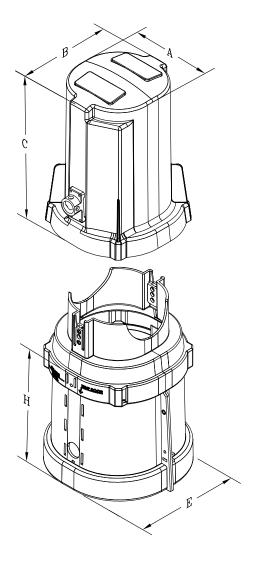

#### AG - Style

Pedestal dome, base and adapter (if applicable) are constructed of high-density Polyethylene (HDPE) structural foam. Flared base walls prevent frost heave.

#### **AV - Style**

Pedestal dome is low-density polyethylene (LDPE) roto-molded, with base constructed of high-density polyethylene (HDPE) structural foam. Flared base walls prevent frost heave.

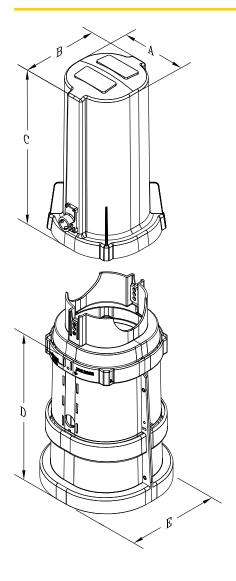

- Designed to meet requirements of Communications, CATV and Electric Service.
- The pedestal dome and base are constructed from High Density Polyethylene structural foam.
- Double lock option available.
- Excellent environmental resistance.
- Complete unit includes base, dome and bracket.
- RDUP accepted material.
- 360° access.

#### **Options Available**

# **Traffic Signal Bases**

## **Traffic Signal Cabinet Bases - Product Selection Guide**

#### **Traffic Signal Cabinet Bases**

Efficiency, strength and resistance have been the hallmarks of Hubbell Traffic Signal Base solutions for more than 40 years. As an industry leader, Hubbell is known for manufacturing safe and cost-effective solutions for Traffic Signal Cabinet Bases while providing peace of mind for utility contractors and municipalities across North America.

Offering the industry's broadest line of Traffic Signal Cabinet Bases, Hubbell offers a variety of core products to satisfy even your toughest application requirements. In addition, Hubbell can also help customize a solution to meet your goals.

#### **Combination Traffic Signal/Battery Backup -Polymer Concrete**

Made from reinforced polymer concrete, Hubbell's box pads, flat pads and traffic control bases offer high quality, specification-driven products with years of proven performance. Polymer concrete offers superior strength to standard concrete, while weighing 1/10th to 1/3rd of traditional precast parts.

## **Traffic Signal Base Standards**

IEEE C57.12.28

Recognized as an American National Standard (ANSI) IEEE Standard for Pad-Mounted Equipment - Enclosure Integrity Section 4 - Enclosure Mounting

IEEE C57.12.29

Recognized as an American National Standard (ANSI) IEEE Standard for Pad-Mounted Equipment - Enclosure Integrity for Coastal Environments Section 4 - Enclosure Mounting

#### Features - A Distinctive Advantage

With stronger, more cost-efficient equipment, Hubbell Pad-Mounted solutions offer a number of advantages over competitor's products made of conventional materials. Hubbell materials are stronger, lighter, more corrosion resistant, better able to withstand freeze/thaw cycles and easier to handle. These are the hallmarks of Hubbell's Pad-Mounted Equipment Solutions.

- Lightweight 1/10 to 1/3 of the weight of concrete.
- High strength Compressive, flexural and tensile strengths three to five times that of traditional concrete.
- Cost-Effective Easy to handle, no special equipment required to install. Outperforms conventional materials for longer service and lower life-cycle costs.
- Stable under freeze/thaw conditions.
- Impact Resistant Tested per ASTM D-2444.
- Low Water Absorption Less than 1% per ASTM D-570.
- Chemical, Corrosion and UV Resistant Resistant to alkalines, acids, weathering and other forms of deterioration.
- Nonflammable Will not support combustion.
- Nonconductive No grounding required.

#### **Using This Selection Guide**

Follow the steps outlined in this guide to select the appropriate traffic signal cabinet base for your application. For more information or for answers to any questions you might have, call your local Hubbell representative. Detailed product drawings are included in this section and also can be accessed from the website.

#### 1. Determine Type of Cabinet

Hubbell offers a variety of traffic signal cabinet bases that work with most NEMA and 170E cabinets manufactured today.

The footprint of the cabinet will determine which base to install. Please see the Traffic Signal Cabinet Base Cross Reference Guide on pages 102 - 109 to choose the proper base for your application. If your cabinet is not listed, feel free to contact your local Hubbell representative. Throat sizes and insert locations can be tailored to meet your requirements.

#### 2. Determine Work Pad Requirements

Hubbell offers work pads to accompany all of the traffic signal cabinet bases. If the cabinet is to be installed on a surface other than a sidewalk, a work pad may be necessary to provide stable, dry footing.

An alternative option to using a flat work pad in front of the traffic signal cabinet base is to use an enclosure instead. An enclosure serves as a splice box and the work pad also provides a skid resistant walking surface. Hubbell offers a wide variety of enclosure sizes and depths to choose from. Your local Hubbell representative is available to assist you in selecting the appropriate enclosure and options to suit your application.

Many Departments of Transportation choose Hubbell traffic signal cabinet bases when they have projects requiring new and retrofit installations of traffic control cabinets. Hubbell traffic signal cabinet bases are less expensive than concrete to install, can be quickly installed by employees, can be relocated and can reduce potential injury and/or liability if struck by a vehicle.

In the application pictured, the DOT had previously poured concrete in place for each traffic signal foundation. The installation process using concrete could take up to a week or more depending on weather and involved having to schedule around other work crews. The cost of the Quazite base was approximately half the cost of the cast-in-place concrete method and installation time was reduced to one-half day.

#### 3. Determine Type of Cabinet

Hubbell traffic signal cabinet bases are constructed of strong polymer concrete and reinforced with a heavyweave fiberglass. Unlike concrete bases, polymer concrete bases are designed to break away when subjected to severe impact. This feature helps reduce the risk of serious injury or fatalities resulting from these incidents.

Hubbell polymer concrete traffic signal cabinet bases also resist UV rays, chemicals and water absorption. Concrete bases are susceptible to damage caused by freeze/thaw cycles. Thermoplastic fiberglass bases can become brittle and eventually crack when exposed to the weather. The durability that Quazite provides means lower maintenance and life cycle costs.

| Traffic Signal Cabinet Base Performance  |  |                              |                                    |  |                                |  |  |

### **Traffic Signal Cabinet Base Reference Guide**

#### 4. Determine Installation Requirements

Installing Hubbell traffic signal cabinet bases is easy and cost effective because it requires no special equipment to set the base. A backhoe is all that is necessary to lift the base in place. Hubbell traffic signal cabinet bases also save time during installation. Unlike cast-in-place bases that take days to form, pour, set and remove the forms, Hubbell traffic signal cabinet bases can be installed quickly, allowing the cabinet and equipment installation to begin immediately after setting the base.

| Traffic Signal Cabinet Base Performance                                    |  |                              |                                    |  |                                |  |  |  |  |

# **Shelters**

### **Shelters Product Selection Guide**

#### **Shelters**

Hubbell Shelters can be used in a myriad of pad-mounted equipment applications. Whether they're completely outfitted as a sectionalizing cabinet or housing switchgear, fused-gear, transformers, metering equipment, pumps or other equipment, they stand ready to protect and secure your valuable infrastructure. Hubbell Shelters are also designed for convenient access if any equipment outage occurs.

#### **Fiberglass**

Shelter construction is of fiberglass, resulting in superior impact resistance while the marine-grade UV stabilized gel coat finish ensures best-in-class protection from natural elements as well as harsh chemical environments.

### **Application Standards for Hubbell Shelters**

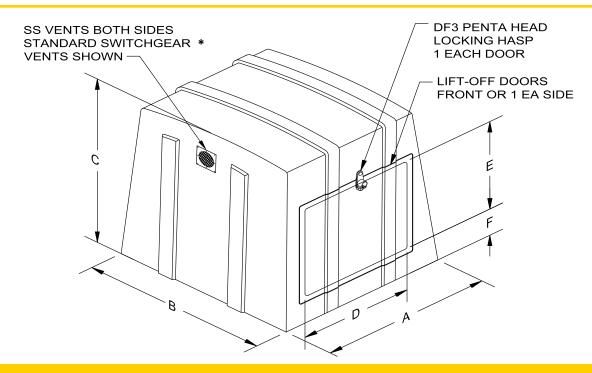

IEEE C57.12.28

Recognized as an American National Standard (ANSI) IEEE Standard for Pad-Mounted Equipment - Enclosure Integrity

IEEE C57.12.29

Recognized as an American National Standard (ANSI)

IEEE Standard for Pad-Mounted Equipment - Enclosure Integrity for Coastal Environments

Standard features include Electric warning logo, stainless steel hex or penta head locking hardware, and orange colored LDPE pedestal. Contact Customer Service for specific color options.

These temporary light pole bases are manufactured with an HDPE structural foam base and an LDPE rotomolded pedestal. The light pole base can be secured with stainless steel penta head bolt locking option and provide excellent environmental resistance.

# Locking Accessories

### **Tools and Locking Accessories Product Selection Guide**

#### **Hubbell Tools**

Hubbell offers tamper resistant standard penta-head sockets for qualified customers. 3/8" and 1/2" drive sizes are available to open all Hubbell and PenCell brand enclosures or pedestals. These socket tools are made of plated alloy steel resulting in long tool life.

#### **Locking Accessories**

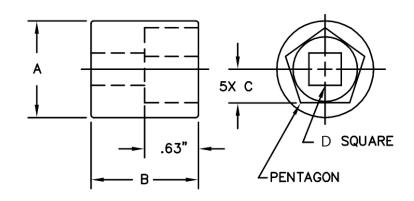

Hubbell exclusive cable locks can be used in place of traditional shackle and padlocks. They are constructed of high quality aircraft cable with a black anodized, corrosion resistant, electroplated finish. There are no parts to lose with the innovative one-piece design and the L-shaped steel break-off bolt means no installation tools are required.

# Installation Instructions

### **Box Pads and Ground Sleeves Installation**

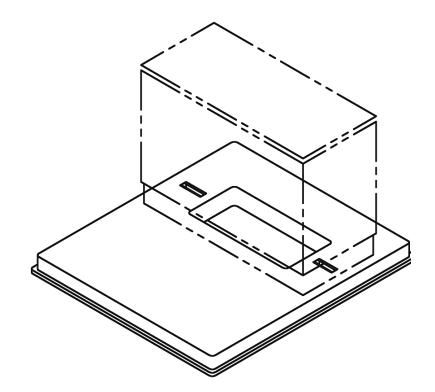

Hubbell Box Pads and Ground Sleeves can be easily installed by following these simple guidelines:

- Determine the cable or conduit entry position and then excavate a hole for the base.
- 2. Make the hole 1 to 2 feet longer and wider than the base and approximately 8 inches deeper.
- 3. Put eyebolts into lifting inserts on top of the base. (Four bolts are shipped with the foundation base.) Attach lifting chain or straps to the bolts. Once chain or straps are attached, lift and position the base into the hole using a backhoe or other equipment. Insure orientation of box pad or ground sleeve meets the plan.
- 4. Place gravel in the base to a depth of approximately 6 to 8 inches. Lift base to proper elevation, allowing gravel to run out under the base. Check the elevation of the base, make the necessary elevation adjustments with the bucket and then recheck the elevation.
- 5. Once the base is set to proper elevation, remove the bolts and place backfill around the box pad using normal utility practices for backfilling. If compaction is required, internal bracing (see page 134) must be used enclosures to prevent deflection and premature failure.

### **Equipment Support Pads Installation**

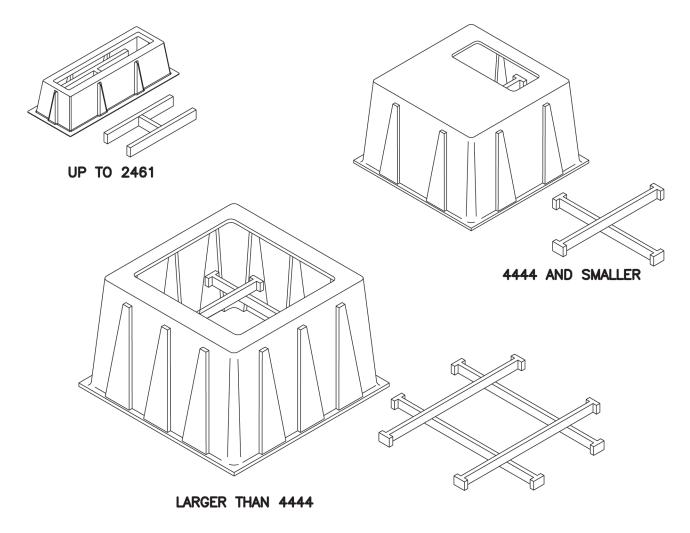

Follow these simple guidelines to install **Hubbell Support Pads:** 

- Determine the cable or conduit entry position and then dig a recess so the top surface of the pad will be level with the surrounding area.
- 2. Level the dirt around cable opening and then level and tamp down dirt in the area to be occupied by the foundation pad.
- 3. Backfill and tamp in trench area leading to cable opening. Place pad in a prepared, level area with opening in pad (throat) directly over cable entry position.
- 4. Attach equipment to the foundation pad with bolts, brackets and/or lugs provided by the equipment manufacturer. Backfill and tamp earth around the pad so it is level with surrounding landscape.

### **Internal Bracing**

Hubbell recommends internal bracing for box pads, extensions or any product that is subject to deformation caused by backfill compression. If compaction is required, or if heavy vehicles will be present during construction and/or throughout the life of the enclosure, internal bracing during backfilling operations will ensure minimal box sidewall deflections. This applies to all enclosures regardless of material. Supports should be 2 x 4s or similar material. Internal bracing supplied and installed by contractor or utility.

### Cable Vault and Pad Installation

Hubbell Cable Vault and Pad can be easily installed by following these simple guidelines:

#### Note:

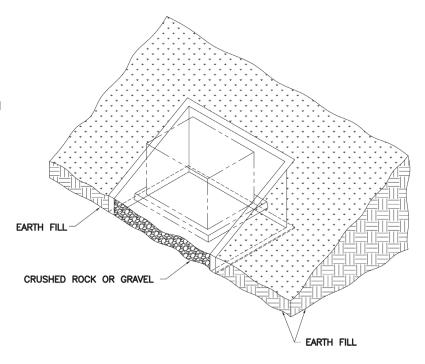

Before beginning excavation work, investigate the possibility of other buried utility lines or enclosures. Hubbell vaults are normally shipped assembled and complete. These are equipped with studs near each corner where a lifting sling can be attached for handling with suitable lifting equipment. Excavating equipment is required, as is equipment or tools to lift and place the vault into the excavated area. Hand tools that may be required to assemble the enclosure include: hammer and/or mallet, hex-socket (3/4-in.), rasp or coarse file pliers, band cutter or shears and penta-socket wrench. Workers handling the enclosure during installation should wear work gloves to prevent injury. For new work, excavate approximately 10 inches around the outer width of the vault being installed and 6 inches deeper than actual depth of the vault.

- For new work, excavate approximately 10 inches around the outer width of the vault being installed, and 6 inches deeper than actual depth of the vault.
- 2. Place six inches of free-draining granular fill in the bottom of the excavation and level it. Grade the granular fill so that the top of the vault will be at the correct final grade.
- 3. Remove the bolts holding the pad onto the vault. Remove the pad and set it aside. Place the vault into the excavated area. Adjust fill as required to obtain correct line and grade for the top of the box.
- 4. Install a temporary 2x4 brace across the vault each way at the midpoints of the upper pad-supporting ring prior to backfilling.
- 5. Begin placing and compacting fill around the enclosure per specifications or instructions.

### **Hill Holders Installation**

Hubbell Hill Holders can be easily installed by following these simple guidelines:

- Prepare a level base area approximately 3 inches below the finished grade. Set the Hill Holder in position and install 3 inches of crushed rock inside the Hill Holder.
- 2. Set the pad and transformer in place.
- 3. Complete by backfilling behind the Hill Holder. Re-install the equipment pads and bolt them securely into place. The pad is now ready for equipment installation.

### **Hubbell Sectionalizing Cabinets and Primary Pedestal Installation Instructions**

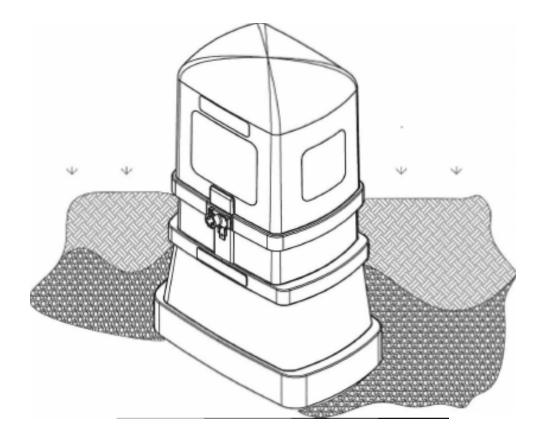

Hubbell Sectionalizing Cabinets and Primary Pedestals are easy to install by following these simple instructions:

- Excavate hole, make area 1-2 feet longer and approximately 6 inches deeper than the suggested burial height of the cabinet or pedestal being installed.
- 2. Compact soil and place gravel in the base to a depth of approximately 6 8 inches.
- 3. Using a sling, lift and position the cabinet or pedestal in place, then lower the product into place to the recommended burial depth. Check elevation, level and make any necessary adjustments.
- 4. Place backfill around the cabinet or pedestal using normal utility practices for backfilling. If mechanical compaction is used, install internal bracing prior to prevent deflection or premature failure.

### **LLDPE Secondary Pedestals**

- 1. Excavate hole, make area 4-6 inches longer and approximately 6 inches deeper than the suggested burial height of the pedestal being installed.
- 2. Place 4 to 6 inches of crushed stone or gravel in the hole and tamp. This helps with drainage properties and provides a solid base to help combat movement and settling of the installed unit.
- 3. Place the unit, WITH COVER INSTALLED, into the hole on top of the tamped gravel.
- 4. Place the excavated dirt back in the hole around the installed unit and tamp lightly with foot. Ensure that the unit remains level and at the correct height.
- 5. Remove cover and then reinstall cover to ensure proper fit and that locking capability has not been compromised.

### **Traffic Signal Cabinet Base Installation**

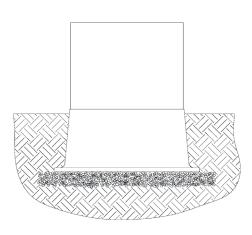

#### **Installation Instructions**

#### **Description and Use**

- The foundation base is constructed of polymer concrete and reinforced by a heavy-weave fiberglass mat.
- The types and sizes of the bases vary depending on the size of the cabinet to be installed.
- Inserts (1/2-inch anchors) are molded into the base and must align with the cabinet footprint.
- Base is resistant to most chemicals.

#### Installation

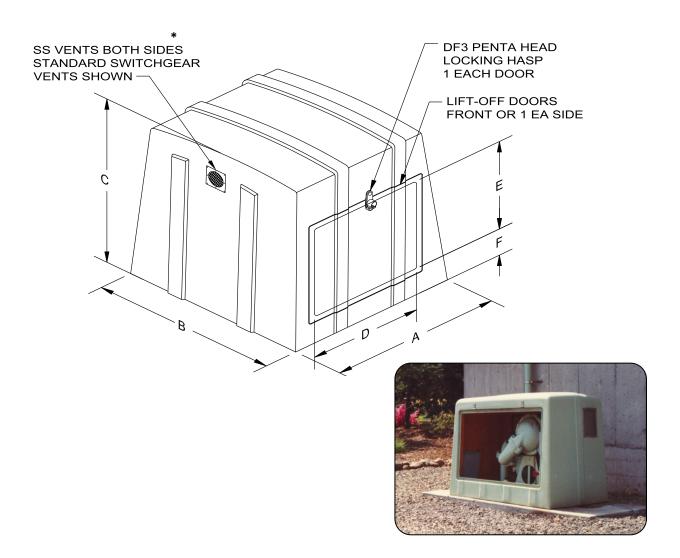

- 1. The following installation procedure is the same for all sizes of foundation pads.
- 2. Determine cable/conduit entry position.
- 3. Excavate to the proper depth for traffic cabinet signal base. (The base should extend no more than 50 percent above grade level.)
- 4. Excavate the site to the proper depth as determined by the final grade. The work pad may be installed directly on undisturbed soil. (If the soil compaction is substandard, or if you wish to provide drainage, you need to lower the excavation 4 to 6 inches to accommodate pea gravel.)
- 5. Install conduit, 90° bends, to extend at least 2 inches above final grade of the base.
- 6. Compact the soil or pea gravel base.
- 7. Install the traffic signal cabinet base. When lowering the base in place, be sure the conduit is straight in line with the opening on the top surface of the base. After setting the base, check for alignment and plumb.
- 8. Backfill evenly around the base to maintain alignment and plumb. Tamp backfill after each 4-inch fill. Fill 1 to 2 inches above grade and tamp to grade.
- 9. Set the cabinet.

## **Hubbell Equipment Shelters Assembly and Installation Guidelines**

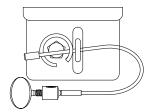

- Remove the nuts securing the shelter to the pallet. Remove and save the large flat washers at each hold down position. These washers will be required when bolting the shelter to the pad.
- 2. Remove shelter from pallet. Remove all doors from units with lift off doors. Open doors and install door holders on units with hinged doors.
- 3. Lift the shelter off the pallet by using one of the following methods:
  - Smaller shelters may be lifted by two or more people.
  - Slings may be passed through the shelter and joined above for connection to a hoist. On longer shelters, these slings must be separated by a spreader.
  - Set the shelter aside until the equipment has been installed on the pad and all service connections made.
- 4. Install equipment and make all service connections. Bolt equipment frame (when applicable) to pad.
- 5. Install shelter. Lift the shelter over the equipment to be protected and lower it over the anchor bolts on the pad.
- 6. Place the flat washers saved when the shelter was removed from the pallet onto the anchor bolts and secure the enclosure to the pad.
- Replace or close shelter doors. Installation is now complete.

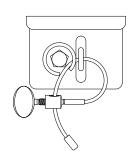

### **Cable Locks - Installation Instructions**

Cable Locks are easy to put in place and remove by following these simple instructions:

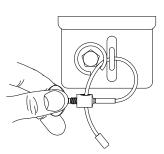

Slip the loose end of the cable through the item to be locked.

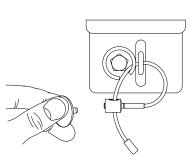

2. Place the loose end through the eye of the lock body itself.

3. Temporarily secure the lock by tightening the bolt with your fingers.

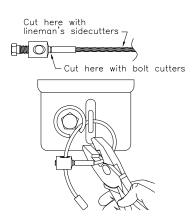

4. To permanently lock the Cable Lock, either grasp the lock body with pliers and turn set bolt with a wrench until the bolt head breaks off or, twist the bolt head with your fingers until it breaks off.

#### **Removal Instructions**

To remove a lock, cut it at the groove with a grinder or heavy-duty pair of bolt cutters or cut the cable with high-quality lineman's cutters. Commonly available tools such as pliers, snips and cutters will not be effective against the high quality cable.

## **Hubbell Lenoir City, Inc. | Armorcast Products Company** Inc. - Terms & Conditions of Sales

Hubbell Lenoir City, Inc. and its affiliate to specifically include Armorcast Products Company Inc. (hereinafter called Seller) hereby gives notice of its exception to any different or additional terms and conditions other than as stated herein. All sales are expressly made conditional on Buyer's assent to the following terms and conditions. Buyer's acceptance of the provisions of Seller's terms and conditions as recited herein shall be conclusively presumed upon Buyer's receipt of the goods, or if no written objection is received by Seller within fifteen (15) days from the date on Seller's order acknowledgment, whichever event shall first occur. These terms and conditions constitute the entire agreement between Seller and Buyer, and supersede other communications between the two parties, whether written or oral.

#### **Pricing**

Refer to appropriate Price Schedule, unless otherwise quoted.

#### **Terms**

Seller's payment terms are net 30 days. Invoices will be dated the day of shipment. A service charge of 1-1/2% per month or, if such rate exceeds the maximum lawful rate, the maximum lawful rate shall be assessed on all past due accounts and shall be payable on demand.

#### **Quotations**

Unless otherwise stated in writing, Seller's quotations are subject to acceptance by the Buyer within thirty (30) days from the date of issue.

#### **Sales and Similar Taxes**

Seller's prices do not include any sales, use, excise or similar taxes. Consequently, in addition to the price specified herein, the amount of any present or future sales, use, excise or other similar tax applicable to the sale or use of the goods hereunder, shall be paid by the Buyer, or in lieu thereof the Buyer shall provide Seller with a tax exemption certificate acceptable to the taxing authorities.

#### **Acceptance of Orders**

All orders are subject to acceptance by Seller at its principal office located at 3621 Industrial Park Drive, Lenoir City, TN, 37771 USA, for Hubbell Lenoir City, Inc and 9140 Lurline Avenue, Chatsworth, CA, 91311 USA for Armorcast Products Company Inc and Buyer's assent to these Terms and Conditions of Sale. Any other terms proposed by Buyer are rejected unless expressly accepted in writing. Acceptance of any order is subject to the product's availability and the Seller's ability to deliver. Orders will be billed at prices in effect at the time of shipment unless otherwise agreed. Unless otherwise stated in writing, Seller reserves the right to ship plus or minus 10% of specified quality for special products made to order.

#### Sales by Agents

Sales by agents or through overseas representatives shall be at prices, terms and conditions of sale specified by Seller. All invoices will be issued by and payment remitted to Seller.

#### **Delay**

Seller will use reasonable efforts to meet shipment or delivery dates specified by Seller, but such dates are estimates only. Seller shall in no event be liable for any delay or non-delivery if such delay or non-delivery is caused directly or indirectly by Acts of God, fire, flood, strike or lockout or other labor dispute, accident, civil commotion, riot, war, governmental regulation or order, whether or not it later proves to be invalid, or from any other cause or causes (whether or not similar to any of the foregoing) beyond Seller 's control. In no case will Seller be liable for loss of profits or any special or consequential damages on account of any delay in delivery or non-delivery whether or not excused hereunder.

#### **Shipping Deferment**

Buyer requests for shipping deferment must be approved by Seller and are subject to price negotiation.

#### **Limited Warranty**

Material: Seller warrants all products sold by it to be merchantable (as such term is defined in the Uniform Commercial Code) and to be free from defects in material and workmanship for a period of one (1) year (or as otherwise specified) from the date of original shipment by Seller when stored, installed, operated or maintained in accordance with recommendations of Seller and standard industry practice and when used under proper and normal use. Buyer must notify Seller promptly of any claim under this warranty. NO OTHER WARRANTY, WHETHER EXPRESS OR ARISING BY OPERATION OF THE LAW, COURSE OF DEALING, USAGE OF TRADE OR OTHERWISE IMPLIED, SHALL EXIST IN CONNECTION WITH SELLER'S PRODUCTS OR ANY SALE OR USE THEREOF. SELLER SHALL IN NO EVENT BE LIABLE FOR ANY LOSS OF PROFITS OR CONSEQUENTIAL OR SPECIAL DAMAGES INCURRED BY BUYER. Seller's warranty shall run only to the first Buyer of a product from Seller, from Seller's Buyer, or from an original goods manufacturer reselling Seller's product, and is nonassignable and non-transferable and shall be of no force and effect if asserted by any person other than such first Buyer. This warranty applies only to the use of the product as intended by Seller and does not cover any modification, misapplication, alteration, repair or misuse of said product by Buyer or others, or for damage caused thereto by negligence, accident, or improper use by Buyer or others. This warranty does not include reimbursement for the expenses of labor, transportation, removal or reinstallation of products. Products may contain certain cosmetic imperfections that do not impact the Product's performance; these cosmetic imperfections are not considered defects in material or workmanship and shall not be covered by any Seller warranty.

Application: Seller does not warrant the accuracy of and results from product or system performance recommendations resulting from any engineering analysis or study. This applies regardless of whether a charge is mad e for the recommendation, or if it is provided free of charge. Responsibility for selection of the proper product of application rests solely with the Buyer. In the event of errors or inaccuracies determined to be caused by Seller, its liability will be limited to the reperformance of any such analysis or study.

Buyer Inspections: Tests, inspections and acceptance of all material must be made at the factory. Buyer's inspectors are welcome at the factories and are provided with the necessary facilities for carrying out their work. Name and phone number of who should be contacted for inspection should be given to Seller no later than two weeks prior to scheduled shipment date.

Disclaimer of Warranty: THE FOREGOING WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER WRITTEN, ORAL, EXPRESSED OR IMPLIED. THERE IS NO WARRANTY OF FITNESS OF ANY PRODUCT FOR A PARTICULAR PURPOSE.

#### **Limitation of Liability**

IN NO EVENT AND UNDER NO CIRCUMSTANCES. WHETHER AS A RESULT OF BREACH OF CONTRACT OR WARRANTY OR ALLEGED NEGLIGENCE, SHALL SELLER BE LIABLE TO BUYER OR ANY OTHER PERSON FOR ANY INDIRECT, SPECIAL OR CONSEQUENTIAL, OR INCIDENTIAL LOSSES OR DAMAGES INCLUDING, WITHOUT LIMITATION DAMAGE TO OR LOSS OF PROFITS OR REVENUE, LOST SALES, LOSS OF USE OF THE GOODS OR ANY ASSOCIATED GOODS, OR DELAY OR FAILURE TO PERFORM THIS WARRANTY OBLIGATION, LOSS OF CAPITAL, COST OF SUBSTITUTE GOODS, FACILITIES OR SERVICES, DOWNTIME COSTS, OR CLAIMS OF THIRD PARTIES OF THE BUYER FOR SUCH DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE SALE, INSTALLATION, USE OF, INABILITY TO USE, OR THE REPAIR OR REPLACEMENT OF, SELLER'S PRODUCTS. Any warranty claim by Buyer shall be deemed waived by Buyer unless submitted to Seller in writing within thirty (30) days from the date Buyer discovered, or by reasonable inspection should have discovered the alleged breach. Any warranty claim shall be brought within one year of discovery of alleged defect or nonconformity. Upon prompt written notice by the Buyer that a product is defective or non-conformity, Seller's liability shall be limited to repairing or replacing the product, at Seller's option.

#### Freight Allowance and F.O.B. Point

All shipments are F.O.B. origin. Risk of loss and title of goods shall pass to Buyer upon delivery to the designated carrier. Freight is prepaid and allowed on all shipments of products with a net order value of \$12,000 and above to destinations within the Continental United States and Canada. Shipments to Alaska and Hawaii are F.O.B. Pacific Coast docks, collect beyond. Tool trailers will be F.O.B. Seller's dock - no freight allowed.

All shipments destined for locations outside of the United States, excluding Canada, are F.C.A., Hubbell Facility (Incoterms® 2010) with risk of loss and title to products passing to Buyer upon delivery to the designated precarrier in the United States. Freight to the carrier will be paid by Seller in cases where freight allowance has been met. Freight terms for shipments to Alaska and Hawaii are F.C.A., Hubbell Facility (Incoterms® 2010). Freight will be paid by Seller, in cases where freight allowance has been met, to the Pacific Coast docks; collect beyond. All shipments destined to locations in Canada shall be F.C.A., Hubbell Facility (Incoterms® 2010) with risk of loss and title to products passing to Buyer upon delivery to the designated carrier in the United States. Freight will be paid by Seller in cases where freight allowance has been met. When eligible, Seller will also assume the taxes, duties & clearing of the goods through customs.

Seller reserves the right to route all qualified freight allowed shipments via least expensive surface route within the Continental United States and Canada. Buyer will assume all charges for transportation specified via more expensive means. Acceptance of a specified routing does not constitute a guarantee of ship date, transit time or arrival date. Seller will not be responsible for any cartage or storage charges at destination.

Seller responsibility for exception-free delivery ceases when the transportation company receives shipment in good condition. Claims for loss or damage must be reported directly to the carrier. Seller's willingness to assist does not indicate liability for claim or replacement.

#### **Partial Release**

If an order has multiple releases specified by the Buyer, each release will be treated as individual orders, relative to freight allowance and minimum billing.

#### **Back Orders**

Back orders that are the responsibility of Seller will be shipped F.O.B. factory or point of shipment with freight prepaid and allowed via the most cost-effective method, providing the original order qualified for freight allowance.

#### **Minimum Billing**

Standard Orders -- \$750 net per order. \$75 surcharge for below minimum orders. Hardware Orders -- \$250 net per order. \$25 surcharge for below minimum orders.

#### **Delivery Schedule**

Shipping dates provided by Seller are estimates only. Based on these estimated shipping dates, Seller makes every reasonable effort to meet Buyer's shipping requirements provided Seller promptly receives all necessary information from Buyer and approved drawings if required by Seller. Seller will not assume liability because of delayed shipment for any reason. Seller's responsibility ceases upon acceptance of shipment by carrier.

#### **Cancellations**

Cancellation of an order for current stock product requires a minimum of five (5) days' notice prior to actual ship date. Stock item orders shipped after cancellation notice is received, but before expiration of the five-day requirement, will be subject to all standard Returned Goods conditions, noted below.

Cancellation on non-stock items may be made only if no work has been performed or material purchased. If cancellation is requested after work is in progress, there will be a cancellation charge as established by Seller.

Orders may not be canceled unless Seller gives its written consent, and then only upon agreement as to applicable cancellation charges.

#### **Returned Goods**

GENERAL CONDITIONS applying to all transactions in which Buyer seeks to return goods to Seller:

- 1. Merchandise is not returnable without the written consent of Seller
- 2. Request for permission to return merchandise must be made in writing within one year from date of shipment, and Buyer must provide original Seller invoice number with request
- 3. Material to be returned must be considered standard material by Seller
- 4. Seller reserves the right to refuse returns of any special or made-to-order material, regardless of condition
- 5. All returned goods must be in excellent, resaleable condition, and packaged in the original carton. Products will be inspected upon return; and any service or repair needed to place them in first class, saleable condition will be charged and added to the restocking charge
- 6. A 30% restocking charge will be deducted from all credits issued on authorized returns
- 7. Return Goods Authorization (RGA) Packing List, supplied by the factory, must accompany the return shipment
- 8. Return freight must be prepaid. Material must be received by Seller within sixty (60) days of issuance of RGA
- 9. Net value of the return must not be less than \$750
- 10. Seller reserves the right to deduct for any damage sustained in transit
- 11. Unauthorized returns will be refused. Goods returned without proper authorization from Seller will, at the sole option of Seller, be returned to the Buyer freight collect or scrapped immediately with no issuance of credit. Unauthorized material included in a return will not be credited

#### **Broken Package Policy**

Shipments will be made in standard package quantities or multiples thereof. Seller Customer Service will notify the Buyer of any orders that do not comply. The Buyer must authorize an adjustment to comply with standard package quantities before the order will be entered.

#### **Quotation Price Protection**

All prices shown in the price lists are subject to change without notice.

All quotations on special products or modifications to catalog items are binding only if confirmed in writing by the factory for the period shown on the quotation. Price protection will be provided for a period of thirty (30) days from date of quotation from Seller.

#### **Orders**

All orders are taken and prices quoted only with the understanding that each order shall be subject to the acceptance of Seller at its principal office upon such terms as we may specify when order is received. Prices to cover amount of any sales or excise tax which now or hereinafter may be imposed by any taxing authority upon this merchandise or the sale or manufacture thereof.

#### **Product Specification**

Seller reserves the right to discontinue items, modify designs, and change specifications or prices without incurring obligation.

#### Invoicing

All invoices are due and payable per the standard terms stated herein. In the case of an apparent discrepancy in a line item charge, Buyer is obligated to advise Seller Customer Service in writing of the nature of the claimed discrepancy within five (5) days of receipt of the invoice. This includes all requests for proof of delivery. A claim of discrepancy does not relieve Buyer of the absolute obligation to pay the remaining balance of the invoice in accordance with the standard terms of payment. Seller, after review, will have sole discretion to resolve the discrepancy; and the Buyer expressly agrees to abide by Seller's decision. Seller will promptly advise Buyer of its decision regarding any disputed items or charges.

#### **OSHA**

Seller warrants that at time of shipment, the goods will conform to the applicable occupational safety and health standards promulgated pursuant to the Federal Occupational Safety and Health Act of 1970, which are in effect on the date that Seller enters its acknowledgment of Buyer's order. The Buyer's exclusive remedy and Seller's liability for breach of this warranty is limited to replacement of the nonconforming goods.

#### **Fair Labor Standards Act As Amended**

Seller represents that any goods to be delivered hereunder will be produced in compliance with the requirements of the Fair Labor Standards Act of 1938, as amended.

#### **Governing Law**

All orders shall be governed by and construed in accordance with the laws of the State of New York without giving effect to any choice of law rules that would cause the application of laws of any other jurisdiction.

NOTE - These Terms and Conditions of Sales supersede all those published and issued previously by Hubbell Lenoir City, Inc., Armorcast Products Company Inc., Quazite, CDR Systems, CDR, PenCell, Pen-Cell Plastics, Inc., Polycast, Electrimold, Custom Composites, Western Power Products, Comcore, Hot Box, Windbreaker, and Jandec.
