Notes:

Conditions of Acceptability:

Certificate: 70039997

Master Contract: 178267

Project: 70182522

Date Issued: 2018-10-25

1. Outlet boxes Type PL are for use with terminal blocks rated for 600V ac max, 80A max. Detail electrical ratings for designated terminal blocks for each type of outlet box are covered in the body of the report.
2. Installer shall follow North American electrical rating of internal components.
3. Outlet boxes Type ZPL are identical to Type PL minus the terminal block(s) and are certified as component only where the final installation acceptance is determined by CSA Group.
4. Do not allow dust layers to build up on this product.
5. Unused cable entries must be fitted with stopping plugs as listed on the ZP5** component certificate IECEx BAS 14.0120U or unused entries may be fitted with alternative stopping plugs and or breather drains to those listed in the schedule. The user is responsible for ensuring that the protection concept, temperature class and relevant IP rating are maintained.
6. The breather/drain devices must be installed in their correct orientation in the bottom face of the enclosure. The ingress protection rating and operating temperature range of the junction box is limited to that of the breather/drain and adaptor/reducer device fitted.
7. All terminal screws, used and unused, shall be fully tightened down by the end user.
8. No more than one single or multi-stranded lead shall be connected to either side of any terminal unless multiple conductors have been joined in a suitable manner, e.g. two conductors into a single insulated bootlace ferrule, or any method indicated on the terminal certificate.
9. Terminals shall be installed in such a manner that the creepage and clearance distances between the terminal and adjacent components, enclosure walls and covers complying with the requirements of IEC 60079-7 for the rated voltage of the equipment.
10. Terminal temperatures must not exceed the operating range specified on the component certificate.

PART B:

**Ex e IIC, T4, T5, or T6 Gb; Ex tb IIIC T80°C Db; IP66,
Class I, Zone 1 AEx e IIC Gb, T6 or T5; AEx tb IIIC T80°C Db;IP66, Type 4X (where applicable)
Class I Division 2 Group A, B, C, D T4, T5, or T6; Type 4X (where applicable):**

- S* range (Size 1 to 17) and M* range (Size 1 to 9) where S designates Stainless Steel, and M designates Mild steel junction Boxes
- SFI*, SFE*, MFI* and MFE* range (Size 1 to 9). Where FI designates a internal flange construction and FE indicates an external Flange box design
- EA* and MEA* range is a wedge shaped box construction
- EJB* and MEJB* range stainless and Mild junction boxes

Nomenclature:

Model Number XY

X may be (Series)	S	Stainless Steel
	M	Mild Steel
	SFI	Stainless Steel with internal flange design
	MFI	Mild Steel with internal flange design
	SFE	Stainless Steel with external flange design
Y may be (Sizes)	MFE	Mild Steel with external flange design
	1 to 9	
	15, 17	

Certificate: 70039997

Master Contract: 178267

Project: 70182522

Date Issued: 2018-10-25

Notes:

1. Sizes 1 through 9 enclosures have a -60°C lower operating ambient temperature.
2. Size 1-9 may be followed by the letter “L” to designate a landscape orientation
3. Sizes 15 and 17 enclosures have a low operating ambient of -20°C
4. Optional EMC gaskets available upon request - NEMA4X

Notes:

Conditions of Acceptability:

1. Suffix S denotes stainless steel construction, whereas suffix MS denotes mild steel construction.
2. Outlet boxes sizes 1S through 5S and 1MS through 17MS contain terminal strips. Sizes 1ZS through 17ZS and 1ZMS through 17ZMS are empty boxes intended to be fitted with Exe approved terminals in accordance with manufacturer's schedule drawings and are certified as components only where the final installation acceptance is determined by CSA Group.
3. Suffix L indicates enclosure with longer length.
4. Installer shall follow North American electrical rating of internal components
5. Unused entries may be fitted with alternative stopping plugs and or breather drains to those listed in the schedule. The user is responsible for ensuring that the protection concept, temperature class and relevant IP rating are maintained.
6. The breather/drain devices must be installed in their correct orientation in either the bottom face or bottom face gland plate of the enclosure. The operating temperature range of the enclosure is limited to that of the breather/drain device fitted.
7. All terminal screws, used and unused, shall be tightened down by the end user.
8. Insulation of conductors must extend to within 1 mm of the metal of the terminal throat unless specified otherwise on the terminal certificate.
9. No more than one single or multi-stranded lead shall be connected to either side of any terminal unless multiple conductors have been joined in a suitable manner, e.g. two conductors into a single insulated bootlace ferrule, or any method indicated on the terminal certificate.
10. Terminals shall be installed in such a manner that the creepage and clearance distances between the terminal and adjacent components, enclosure walls and covers complying with the requirements of IEC 60079-15 for the rated voltage of the equipment.
11. Terminal temperatures must not exceed the operating range specified on the component certificate.
12. All terminals, and accessories such as cross-connectors, shall be installed in accordance with the terminal manufacturer's instructions. Hawke International will supply the relevant terminal manufacturer's instructions with each junction box covered by this certificate.
13. When connecting conductors of cross section below the maximum allowed for the particular terminal then the maximum amps per pole must be reduced in line with the maximum amps permitted for a terminal equivalent to the conductor size fitted e.g. If a terminal that can take a 6mm² conductor at 29Amps is fitted with a 2.5mm² conductor then the current shall be reduced to a maximum of 17 Amps, or the rating marked on the apparatus label, whichever is the lower.
14. When a self-adhesive certification label is fitted, the minimum ambient temperature shall be -40°C.

APPLICABLE REQUIREMENTS

CAN/CSA-C22.2 No. 60079-0-2015 IEC 6 th Ed	Electrical Apparatus for Explosive Gas Atmospheres Part 0 : General Requirements
CAN/CSA-C22.2 No. 60079-7-2012 IEC 4 th Ed	Electrical Apparatus for Explosive Gas Atmospheres Part 7 : Increased Safety "e"
CAN/CSA-C22.2 No. 60079-31-2015 IEC 2 nd Ed	Electrical Apparatus for Explosive Gas Atmospheres Part 31: Dust Safety "t"
CAN/CSA-C22.2 No. 94-M91	Special Purpose Enclosures
CAN/CSA-C22.2 No. 14-M91	Industrial Control Equipment
CAN/CSA-C22.2 N0 213-17	Nonincendive electrical equipment for use in Class I and II, Division 2 and Class III, Divisions 1 and 2 hazardous (classified) locations
UL 60079-0- 6 th Ed -IEC 6 th Ed	Electrical Apparatus for Explosive Gas Atmospheres Part 0 : General Requirements
UL 60079-7- 2004 – IEC 4 th Ed	Electrical Apparatus for Explosive Gas Atmospheres Part 7 : Increased Safety "e"
UL60079-31-2 nd Ed – IEC 2 nd Ed	Electrical Apparatus for Explosive Gas Atmospheres--Part 31: Dust Safety "t"
UL 50E- 3 rd Ed	Special Purpose Enclosures
UL 508-2013 7 th Ed.	Industrial Control Equipment
UL 12.12.01- 9 th Ed	Nonincendive electrical equipment for use in Class I & II, Division 2 and Class III, Divisions 1 & 2 hazardous (classified) locations

MARKINGS

The manufacturer is required to apply the following markings:

- Products shall be marked with the markings specified by the particular product standard.
- Products certified for Canada shall have all Caution and Warning markings in both English and French.

Additional bilingual markings not covered by the product standard(s) may be required by the authorities having Jurisdiction. It is the responsibility of the manufacturer to provide and apply these additional markings, where applicable, in accordance with the requirements of those authorities.

The products listed are eligible to bear the CSA Mark shown with adjacent indicators 'C' and 'US' for Canada and US (indicating that products have been manufactured to the requirements of both Canadian and U.S. Standards) or with adjacent indicator 'US' for US only or without either indicator for Canada only.

Nameplate adhesive label material approval information:

Markings are etched/ engraved on name plates are constructed from stainless steel plate and riveted in place or printed on an adhesive nameplate examined and approved by CSA nameplate See drawing C2542

Certificate: 70039997

Project: 70182522

Master Contract: 178267

Date Issued: 2018-10-25

- Manufacturer's name or trade mark;
- Manufacturer's Type identification;
- Hazardous location ratings
- Operating temperature or temperature code;
- Type 4X Designation (where applicable);
- Electrical ratings: Volts , Amps
- The permissible maximum dissipated power;
- IP rating (where applicable) - optional;
- The letter "X" after the Certificate reference;
- cCSAus Monogram along with the year of Certification followed by serial number of the Certificate (e.g. CSA17CA7003997X);
- "Keep Assembly tightly closed when in operation" or equivalent;
- For polymeric enclosures where bonding means is field installed, the words:
"CAUTION: NON-METALLIC ENCLOSURE DOES NOT PROVIDE GROUNDING BETWEEN CONDUIT CONNECTION. USE GROUNDING BUSHINGS AND JUMPER WIRE".
- Installation instruction sheets are provided with each Terminal Box. (Refer to documentation drawing package for enclosure Type and Size cross reference).
- WARNING: Potential Electrostatic Hazard, clean only with a damp cloth.
- Warning 'DO NOT OPEN WHEN ENERGIZED
- Warning: Minimum Supply Wire rating__°C

Supplement to Certificate of Compliance

Certificate: 70039997

Master Contract: 178267 (078713_0_000)

The products listed, including the latest revision described below, are eligible to be marked in accordance with the referenced Certificate.

Product Certification History

Project	Date	Description
70182522	2018-10-25	Update certificate 70039997 to Add PL511, ZPL511, PL514 and ZPL514 enclosures to the report. Corrected the temperature rating of table in part A for all "B" material. Update descriptive documents in accordance with change. Add Standard UL 508 missed from previous report edition. Upgrade standards in accordance with submitted information
70163390	2017-12-07	Update report 70039997 to include new enclosure series & addition of Class1 Div 2:
70039997	2015-10-22	Upgrade report LR78713-8 product listing to match iecex / atex certificate supplied by the client and add new box sizes. - Re-assess product to the latest IEC standards and National deviations - Assess dust marking for Canadian and USA national deviations # new qualification - Create new report and certificate to supercede old LR78713-8 report - Includes update to existing documents - Includes addition of new sizes - No Testing included# based on information provided is satisfactory for CSA certification
