

Conditions of Acceptability:

Use - For use only in (or with) complete equipment where the acceptability of the combination is determined by UL LLC.

1. Rated output loading for these products was achieved using electronic loads.
2. As part of temperature testing, the case temperature at the temperature reference point- identified as Tc on the case- was monitored. During the normal temperature test of the end product, the temperature at the temperature reference point is to be monitored. The absolute value at the temperature reference point cannot exceed 90°C.
3. These products are intended for building in. The case for these products have no openings. Acceptability of the LED driver with respect to mounting, spacing, casualty, temperature and segregation is to be determined as part of the end device evaluation.
4. These products are provided with 18 AWG, stranded, rated 105°C, 600V minimum for input and output connections rated 105°C, 300V. Acceptability of the input lead wire is to be determined as part of the end product evaluation.
5. These products are dimmable using phase cut dimmers.
6. These products are suitable for dry and damp locations.
