WARNING – This product contains chemicals known to the State of California to cause cancer, birth defects and/or other reproductive harm. Thoroughly wash hands after installing, handling, cleaning, or otherwise touching this product.
J-Box Mounting
1. Feed fixture leads through back plate and connect AC power supply (Fig A).
2. Connect wires through J-Box. Secure back plate on to J-Box with screws.
3. Connect battery only after AC power can be provided to the unit (Fig. B).
4. Align snaps and push housing directly onto back plate (Fig. C). Supply AC power and press “TEST” button to check light.

Conduit Mounting
1. Secure back plate to wall surface. Route wires through hole in conduit flange and make conduit connection.
2. Connect battery only after AC power can be provided to the unit (Fig. B).
3. Align snaps and push housing directly onto back plate (Fig. C). Supply AC power and press “TEST” button to check light.

Warning:
Unused wires must be capped using enclosed wire nuts.

OPERATION
1. During an electrical power failure, the lamps on the unit will automatically come ON for a minimum of 90 minutes.
2. To test this unit, let it charge correctly with AC power supply for a minimum of 24 hours after its first installation and then depress the “TEST” switch, the emergency lamps will illuminate. When the switch is released, the lamps will turn OFF.
3. For the unit with Self-Diagnostic, must connect as below:
   1) When customer doesn’t need remote lamp, please insert terminal to N. (See Figure 1 below)
   2) When customer needs remote lamp, please insert terminal to Y. (See Figure 2 below)
