

HSE22 IS COMPATIBLE WITH HUBBELL HHR4510 AND HHR4516 RELAY RACKS

STEP 1

Locate the four belt loops on HSE22 into the tab slots on HHR45xx rack.

Lower the HSE22 onto the tabs by applying downward force until belt loops are sitting firmly on the tab.

STEP 2

Secure the HSE22 to the HHR45xx rack with the two #12-24 tamper resistant screws. Install in the hole located above the upper mounting belt loop on the HSE22.

NOTE:

When installing more than one HSE22 enclosure to the same side of a rack, the lower unit must be installed first.
