

LIGHT KIT

INSTALLATION INSTRUCTIONS

Model No.: _____ P2601
Vendor No.: _____ 11221
□ 785247260119 (WH)
UPC# _____ □ 785247120833 (CS)

1. Remove the plug in bottom of fan's switch housing cover. Feed 2 wires from top of light kit fitter through the hole in bottom of fan's switch housing cover. Fitter's threaded conduit should screw into the switch housing cover, then secure the light kit onto the detachable switch housing cover with lock washer and nut provided. (Figure 1)
2. Make polarized wire connection for 2 light kit wires to 2 wires inside the switch housing that are marked "FOR LIGHT", connect white to white wires and black to blue wires.(Figure 1)
3. Install the detachable switch housing cover to the switch housing with 3 screws provided. (Figure 1)
4. Install light bulbs (not included) into the light kit sockets. Max. 60 watts. (Figure 2)
5. Install the glass shade by 3 screws provided. **DO NOT OVERTIGHTEN.**
6. Restore power only after installation is completed.
