WARNINGS:

Dangerous voltage exist within the unit and all precautions usually observed in handling high voltage equipment should be observed when replacing light engine or otherwise servicing luminaires. Disregarding this warning could result in electrical shock and possible injury to the individual installing or servicing this equipment. Installation and servicing should be done by qualified personnel.

Tools Required:

• #2 Phillips Head Screwdriver
• 7/16in. Nut Driver, Wrench, or Socket
Electrical Connections
• RISK OF SHOCK
• POWER MUST BE OFF

Trunnion Installation
1. If mounting hardware is present, remove from luminaire fixture.
2. Remove the trunnion cover from the housing by loosening the three screws on the cover.
3. Route black, white, and green wire leads from luminaire through the open trunnion housing. (See Fig. 1)
4. Loosely attach trunnion housing to luminaire with provided fastener. (Be careful not to pinch any wires during attachment.)
5. Set the luminaire to the desired mounting angle by rotating the trunnion housing.
6. Tighten the provided fastener to lock the luminaire at the desired angle.
7. Splice the branch circuit power leads to the fixture power leads, black to black (hot), white to white (neutral), and green to green (ground). SO Cord size 16/3. (Fig. 1)
8. Replace the trunnion cover to the trunnion housing and tighten screws. (Fig. 2) (Be careful not to pinch any wires.)

NOTES:
Contact Hubbell Lighting for any replacement parts.
Contact your local distributor or agent to confirm parts availability prior to ordering replacement parts.
