

TERMINATOR COVER TYPICAL APPLICATION

UTC-750MX0600

Before adapting covers to fit components, read the Installation Basics & Best Practices carefully

A CORRECT FIT

- Fully isolates underlying component
- No gaps/holes - no access for wildlife
- Fully secured and can't be dislodged
- Does not compromise insulation
- Minimum 2" air gap is maintained between all openings and components

FITMENT ISSUES

For tips on fixing gaps and addressing poor fitment, refer to Installation Basics & Best Practices

Compromised Insulation

DISCLAIMER

These products should only be installed, used, or serviced by adequately trained personnel. These instructions are not a substitute for adequate training in the safe use of these products, and they do not address all situations that may be encountered when using these products. When using any product, always read and follow the installation and operating instructions and warnings for the product, all applicable federal, state, and local safety regulations, industry standards, and your employer's internal safety guidelines and operating instructions. Failure to follow applicable safety rules and instructions may result in serious injury, death, and property damage.

The user is responsible for the safe installation and use of any product and must evaluate the conditions at the time of use and consult with their employer's internal safety guidelines or safety experts hired by your employer, as needed. Hubbell Power Systems, Inc. is not liable for death, serious injury, or property damage resulting from the use of these products in any manner that is inconsistent with the product installation and operating instructions, your employer's internal safety guidelines, or recommendations from safety experts hired by your company.
