

Transform Your Water Utility Management

In the water industry, the utility is the gatekeeper of our essential resources. Our platform enhancements, driven by customer feedback and market needs, aim to improve your existing software platform's safety, accuracy, and reliability of data. AclaraONE® software will enhance your water utility by unlocking and analyzing critical meter and device data through a single, customizable interface.

AclaraONE is more than just software; it's a comprehensive tool that transforms how water utilities operate, making them safer, more accurate, and reliable. By providing a flexible, personalized, and user-friendly platform, Aclara ensures that you are equipped to meet today's challenges and tomorrow's opportunities. Our AclaraONE software solution will enhance network reliability and drive down costs, leading to improved performance across all operations.

Why AclaraONE?

- **Customizable Interface:** Adapt the UI to your preferences, ensuring a personalized experience that fits your unique requirements.
- Advanced Data Monitoring and Analytics: With advancements in consumption tracking, leak detection, and configurable alarms, AclaraONE® software not only delivers actionable insights and analytics for more efficient network management, but also supports network metering and sensors. It is designed to derive data from devices beyond meter alarms to ensure optimal performance and more efficient network management.
- Continuous Innovation: AclaraONE software is not just a product; it's a
 continuously evolving solution designed to grow and adapt to the
 ever-changing needs of the water industry.

Ready to Revolutionize Your Water Utility Operations?

Discover how AclaraONE software can make a difference in your organization. Visit www.hubbell.com/aclara to learn more or to schedule a demo.

Flexible Deployment

Choose between cloud-based for scalability and less IT and security responsibility on your organization, or on-premises setups for more control. AclaraONE is designed to adapt seamlessly to your business model.

Enhanced Workflow Operations

Streamline your customer service and operational workflows for increased efficiency and reduced handling times. Personalized dashboards keep critical information at your fingertips.

Comprehensive Audit Log

Maintain transparency and control with a detailed history of every change and activity within your network, enabling effective management and oversight.
