

Universal Recloser Guard Kits

(for reclosers with external voltage monitors)

Reclosers are a common piece of equipment on electric distribution systems. They can present significant wildlife contact risk due to their relatively short insulators and close proximity to grounded support/mounting structures. The innovative Reliaguard Universal Recloser Guard kits solve this problem, protect these energized risk points and prevent wildlife caused flashovers and power outages. The vertical insulator guards are designed with unique side inserts to fit external voltage monitors without any trimming. Each kit includes six guards (three for vertical insulators and three for horizontal insulators).

Features

- 180 degree cable exit to accomodate a wide range of lead exit angles
- Overlapping fingers on cable exits to prevent insect and wildlife ingress
- Encloses the top insulator skirt to achieve appropriate air gap
- Fits factory installed voltage monitors without trimming
- Robust loop latches that can be operated with gloved hands
- Wind retention to 90+ MPH
- UL94 V-0 flame retardant

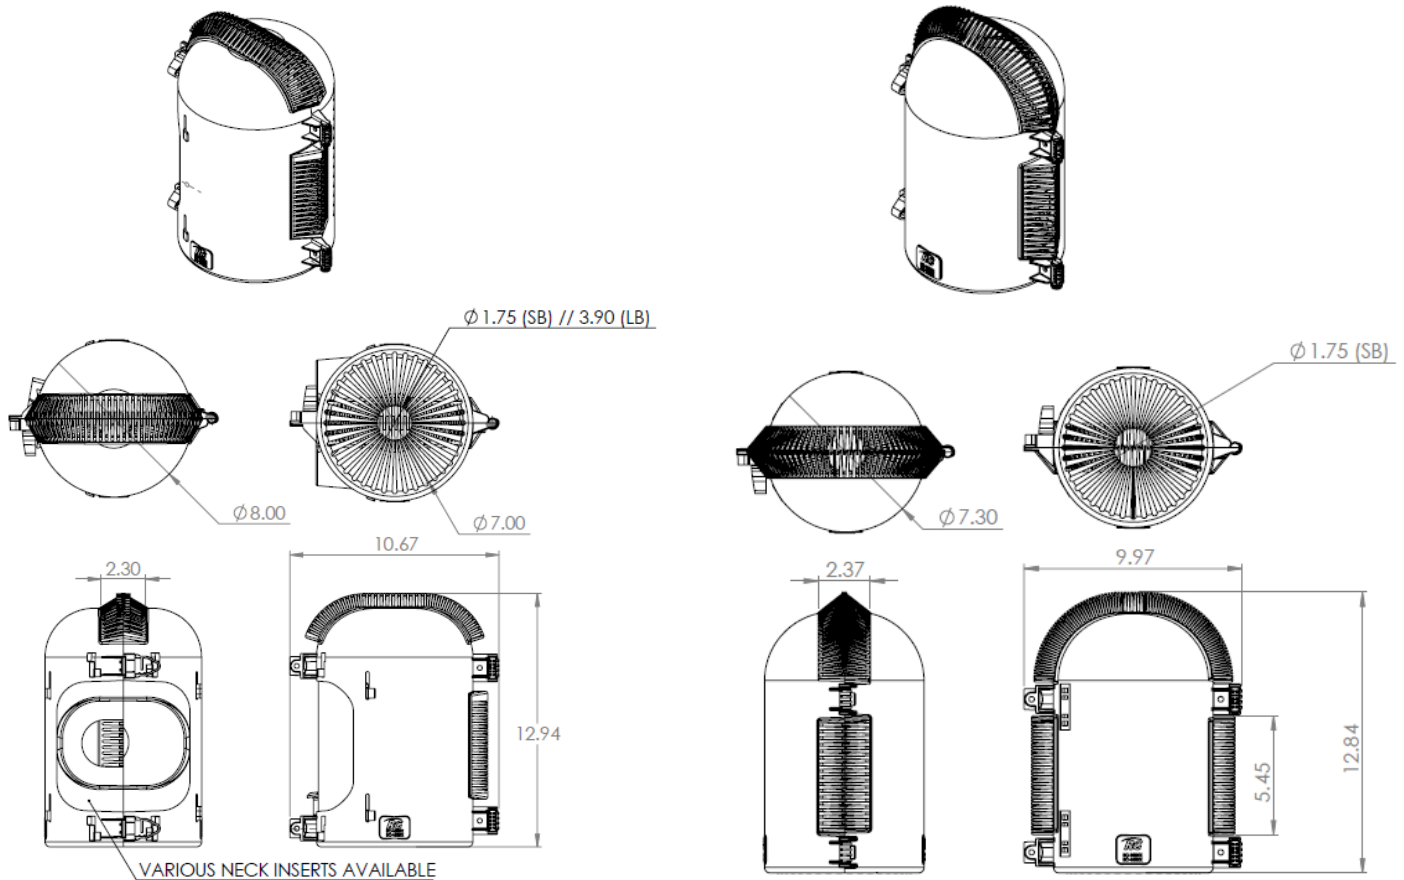

Ordering Information

(for reclosers with external voltage monitors only)

Part Number	Description
RCK14001K	Recloser Kit Elastimold MVR 4 6 Hole Spade Solid Kit
RCK14002K	Recloser Kit Elastimold MVR 4 6 Hole Spade Mesh Kit
RCK14003K	Recloser Kit Elastimold MVR 2 Hole Spade Solid Kit
RCK14004K	Recloser Kit Elastimold MVR 2 Hole Spade Mesh Kit
RCK14005K	Recloser Kit Cooper Nova NXT Solid Kit
RCK14006K	Recloser Kit Cooper Nova NXT Mesh Kit
