| Catalog Numbers | Page(s) | Description |
| :--- | :--- | :--- |
| 30003FG | 3,8 | Finger guard for 30, 40 and 50A Switches (set/2) |
| 6610MK | $3-4$ | Handle Kit for Rotary Switch |
| 664XWP | 3 | Weatherproofing Kit for Rotary Switch |
| 660AC | $3,8,9$ | Auxiliary Contact NO/NC |
| 664XFT | 9 | Mounting Feet for NEMA 4X Enclosure |
| 6603N | 9 | Neutral Buss Connector for NEMA 4X Enclosure |

## Safety is our primary concern.

Bryant motor controllers are "suitable as motor disconnects," which means that every motor controller can also be used as a motor disconnect. From a safety perspective, this means a motor load can now be isolated and locked-out in one convenient location. By utilizing Bryant's compact motor controllers and disconnects, you enhance the convenience of your application with one device fulfilling two needs. Bryant offers flexibility, strict compliance to UL standards and the high quality to advance productivity and safety to your particular application.

## All Bryant controllers can be used as disconnects.

In order to understand the benefits of the Bryant design, it is important to understand the difference between a motor controller and a motor disconnect. A motor controller is simply
used to activate a motor load "on" or "off" and perform this function thousands of times. A motor disconnect however, is designed and tested to withstand motor overloads and high shortcircuit fault currents while maintaining the ability to disconnect the motor for service or maintenance.

According to the 2005 National Electric Code (NEC) article 430.102, all motor controllers must have a disconnecting means located within the line of sight of the controller. Because the NEC recognizes a controller and disconnect can be the same unit (article 430.109), Bryant has taken the opportunity to design a compact controller that will also meet the rigorous demands of a motor disconnect. Bryant's controllers are listed "Suitable as Motor Disconnect" under UL standard 508 - Industrial Control Equipment - qualifying them to perform both operations in one compact package.

## Bryant provides the products you need, with the quality you expect.

Exceeding quality and performance expectations is one of the things Bryant does best. Our line of controllers/disconnects is certainly no exception. Our patented technology has been crafted into a compact, efficient design which is available in pre-assembled NEMA enclosure types or as a component switch giving you the options needed to meet your specific application requirements.

# AC Manual Toggle and Rotary Controllers/Disconnects 

30, 40, 50, 60 and 85A 600V AC

## FEATURES

## 600V AC Manual Motor Toggle and Rotary Controllers

## Order Information

For use in any industrial environment. Ideal component switch for motor control and as a disconnect. Toggle controllers can be built into equipment and enclosures for either box or panel-mount installation.

Accessories - Description
Catalog Numbers
Finger Guards (red) for use with 30, 40 and 50A switches (set/2) 30003FG

Handle Kit for rotary: includes handle, shaft, mounting brackets and required screws
Weatherproofing kit: includes 4 seals, neoprene bushing and 3 "O" rings 6610MK 664XWP
Auxiliary Contact N.O./N.C.: includes 1 contact for use with push-on terminals
660AC
660AC

## AC Manual Toggle and Rotary Controllers/Disconnects

30, 40, 50, 60 and 85A 600V AC

100\% copper contact arm.

- High heat management.

Lubrication-free controller:

- Continued on/off cycling even in harsh, dust and high heat environments.

Handle Kit for Rotary
Devices

- One-way, keyed mounting assembly to facilitate installation.
- Impact and chemical resistant Valox ${ }^{\circledR}$ handle.
