

EZPage Common Intercom

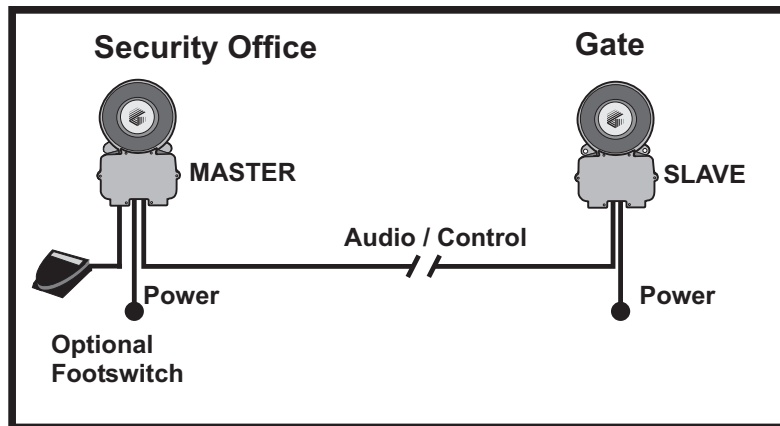

The Common Intercom System allows the user to call everywhere simultaneously. All stations are on a common-talking path and are in listen mode until a page is announced.

- * Automotive
- * Steel
- * Assembly Lines
- * Paper Machines
- * Canning Plant
- * Greenhouses

EZPage Master/Slave System

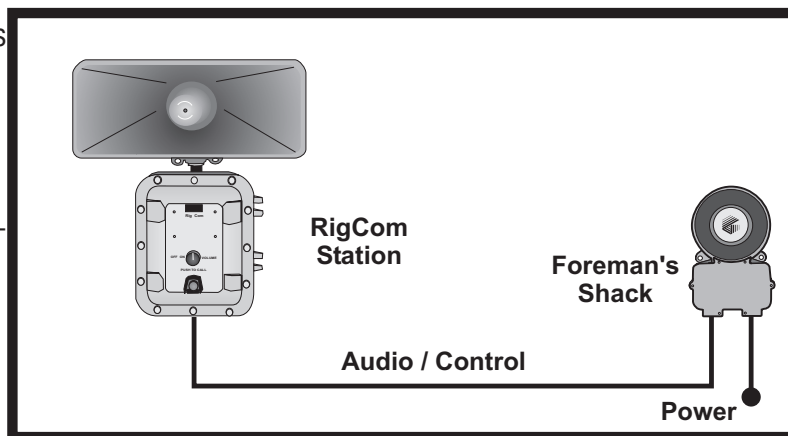

In the Master/Slave system, the Master station controls the talk/listen function of the Slave, which is normally in transmit mode to allow the Master to monitor the slave speaker.

- * Gate Talkback
- * Fire Truck
- * Coast Guard Vessel
- * Warehouse
- * Loading Dock

EZPage RigCom Interface

EZPage interfaces directly with RigCom systems, providing lower cost units for installation in non-hazardous areas. EZPage functions like RigCom: push-to-talk / release-to-listen.

- * Oil Rigs
- * Paint Shops
- * Any facility with a mix of hazardous / non-hazardous areas
