

Pole-Mounting Kits

Models 230-001, 231-002, 232-001, and 231-001FS

Model 231-002

Model 230-001

Model 232-001

Model 231-001FS

GAI-TRONICS' Pole Mount brackets provide a suitable mounting surface for a variety of pole shapes. The universal bands are capable of securing the bracket to poles that are between 2.5 inches and 15 inches in diameter.

For additional support or for poles less than five inches in diameter, center mounting holes are provided for lag or machine bolts. These holes can also be utilized to surface-mount a telephone using only two lag bolts (surface mounting a telephone typically requires four bolts)

Pole mount brackets are manufactured using 14-gauge cold-rolled steel. All kits include either u-bolts or banding strips and also the telephone mounting hardware.

Model 231-002 and 232-001 utilize captive screw mounting holes to prevent unauthorized removal of equipment.
