

POLYCAST®

400 Series Drain System for Residential and Athletic Facility Applications

The POLYCAST® 400 Series Drain System is a complete surface drainage system that provides efficient drainage while maximizing life cycle costs because of its exceptional durability.

- The precast polymer trench is three times stronger than ordinary concrete and is resistant to most salts, acids and alkalines.
- The strong polymer concrete construction and smooth interior surface walls make the system virtually maintenance-free.
- The ease of installation and the modular design of the drain system also reduces construction costs, making it an economical solution for track and field applications.

Inexpensive and long-lasting, POLYCAST® 400 Series is the perfect drainage system for tennis courts, swimming pools, walkways, patios, garage doors and many other residential and athletic facility applications.

Benefits and Features:

- **Strong**
- **Lightweight**
- **Easy to Install**
- **Durable**
- **Maintenance-Free**
- **Chemical Resistant**
- **Cost Effective**
