HUBBELL POWER SYSTEMS, INC.
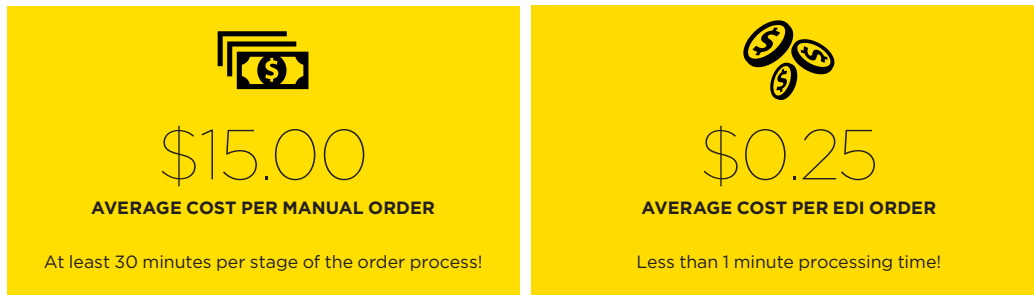

ECOMMERCE WITH HUBBELL
EDI

LIVE UPDATES ON ALL YOUR INFORMATION
EDI allows for real-time transmission of information between Hubbell and your local ERP system

KEY FEATURES
FASTER ORDERS | ERROR REDUCTION | EFFICIENT PROCESSING | PROGRESS TRACKING | GOING GREEN

$15.00
AVERAGE COST PER MANUAL ORDER

At least 30 minutes per stage of the order process!

$0.25
AVERAGE COST PER EDI ORDER

Less than 1 minute processing time!

FASTER ORDERS
Average purchase orders generate within a fraction of the time compared to manual orders.

ERROR REDUCTION
Your ERP system transmits directly to ours, resulting in fewer errors.

EFFICIENT PROCESSING
Rekeying is obsolete, meaning faster turn around and order delivery. Tighter control means better forecasting and planning.

PROGRESS TRACKING
Receive live updates to your ERP system with acknowledgements, shipment notices, and invoices.

GOING GREEN
Save the environment and money by eliminating the need for paper.

3 BENEFITS OF EDI

TIME

- Improved Speed of Communication – Electronic transmission of business data improves cycle times from order processing to invoice payment.
- Increased Turn Around – Improving turn around on orders and processing is an immediate benefit to a business using EDI.
- Automated Tasks – EDI has helped companies automate tasks and gain a productivity edge.
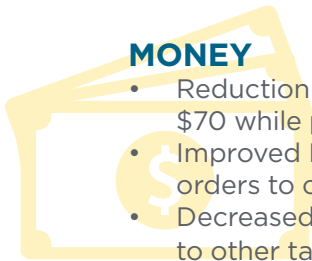

MONEY

- Reduction in Document Processing Costs –A paper-based order can cost as much as $70 while processing an EDI purchase costs less than a dollar.
- Improved Invoicing – Invoices can be automatically compared to your purchase orders to confirm accuracy and lower administrative processing costs.
- Decreased Personnel Costs – Increased automation allows personnel to be relocated to other tasks and be more efficient overall.
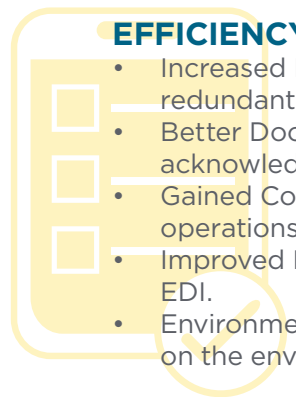

EFFICIENCY

- Increased Data Accuracy – Utilizing EDI eliminates the errors that can occur from redundant manual data entry.
- Better Document Tracking – Stay up-to-date with automatic purchase order acknowledgements and advance ship notices.
- Gained Competitive Advantage – Increasing speed and accuracy of a business' operations will immediately make them more competitive in the market.
- Improved Internal Processes – Internal systems can be fully integrated with the use of EDI.
- Environmentally Friendly – EDI is paperless and therefore provides a positive impact on the environment.
