

Every electric vehicle station needs this.

INSTANT FOUNDATIONS® FOR EV CHARGING STATIONS

As we prepare our roadways and neighborhoods for EV technology, Chance® Instant Foundations provide a fast-installing, sustainable foundation solution.

- No concrete required
- Quick and easy site preparation
- Reduces installation time by weeks!
- Lowered mobilization costs
- No excavation or soil removal
- Units can easily be adjusted, extracted and reused
- Made from recycled steel
- Reduced Scope 3 (embedded and A4/A5) emissions
- Dual cableway for daisy-chained wiring

Economical and readily available for a large variety of loading needs, these wire-ready screw anchors provide measurable capacity during installation and offer many installation benefits, including:

No vibrations > Install near existing structures

Screw in with standard construction equipment > Install in limited access areas

No concrete needed > Install and load immediately
