

POLYMER INSULATOR TESTER

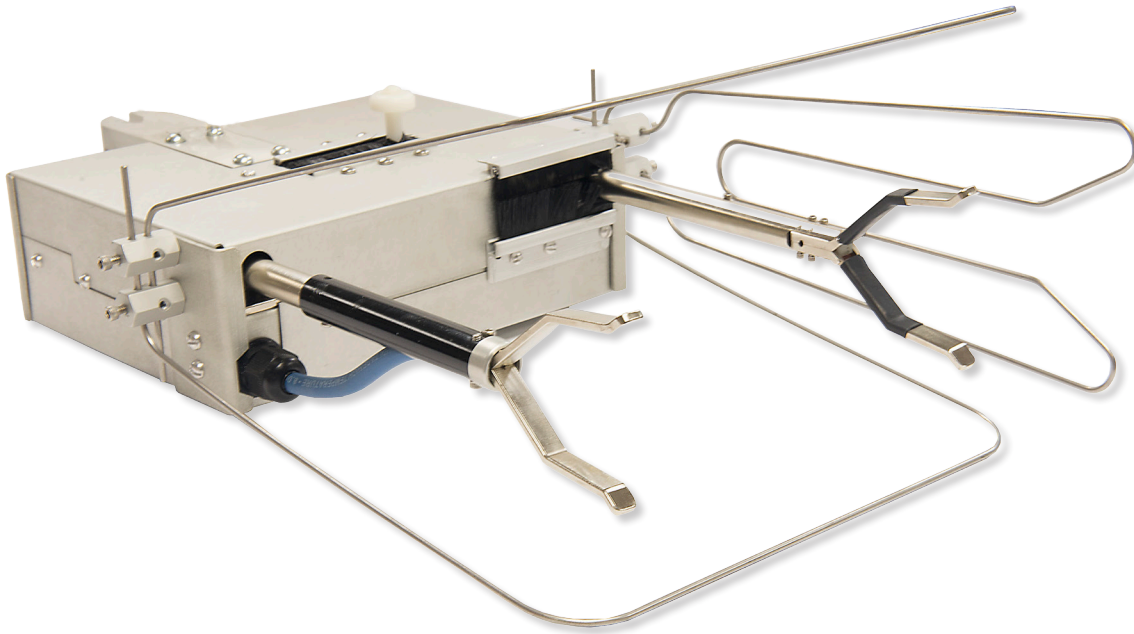

FOR TRANSMISSION SUSPENSION INSULATORS

FEATURES

- Measures electrical integrity of polymer insulator
- Can be used on energized line or de-energized
- Data can be viewed and downloaded to Wi-Fi enabled device
- Adjustable probe spacing to fit most suspension insulators

APPLICATIONS

- Can be used to collect data on energized line without interrupting service
- Use to test insulators before installation for added security
- Used on transmission suspension insulators 69kV and above up to 1.8" in diameter

PART NUMBER

PSC403-3679

DESCRIPTION

Polymer Insulator Tester

APPLICATION

Transmission Suspensions 69 kV thru 500 kV

WEIGHT

4.2 lbs.
