## Galvanised Steel Post

The 2m galvanised post provides a secure post mount option for Telephone Hoods.

The post can be anchored to any solid flat surface; there are 4 x 14mm fixing holes in the base plate that is welded to the bottom of the post.

The Hood is securely fixed to the post at the required fixing height by means of the post fixing kit. (Please request this option when placing your order)

Cable entry is up through the centre of the base plate and 30mm access holes are found at 860mm and at 1200mm to feed the phone fitted in the hood, also there is a 30mm hole 50mm down from the top of the post, this can be used to feed a beacon or sounder if required.

## Specifications
