# INTELLIGENT DOCKSIDE POWER PEDESTALS

Uncompromising Features for Marina Operators & Captains/Owners

**Offer your guests an exceptional dockside experience. Our intelligent solutions are powered by a 132-year legacy of expertise and innovation.**

# WELCOME TO THE FUTURE OF MARINA POWER

Marinas and boat owners demand more than ever before when it comes to delivering reliable power and communications. That is why Hubbell has developed an entire integrated family of pedestals, monitoring software, built-in networking, and an industry first installation and maintenance program.

The Wi-Fi mesh network built into each of the four units serves as the communications infrastructure from the pedestal back to the portal, app and ultimately to your marina staff. Maintain constant visibility into power usage, water usage, and alerts directly to your boat owners. The mesh network also extends Wi-Fi service to your boat owners, eliminating the need for any additional Wi-Fi network at your marina.

A longer useful life is ensured by the removable top. Easily disconnect and store the unit when preparing for a severe storm or at the end of season. The specialized surface coating provides additional durability to help keep your marina looking clean.

The 100A/400A model provides marina owners with an industry-first opportunity to turn power pedestals from a cost center to an additional revenue center. The high-resolution digital display allows custom messages and advertising content delivery at each slip.

Enjoy peace of mind with our best-in-class installation and maintenance program. All models include the following certifications: NEMA 3R, cULus 50E, NPFA303 pedestal requirements and FCC part 15.

# ADMIN PLATFORM & DOCKMASTER MOBILE APP

The screenshot shows the 'Anchor Marina' admin platform interface. At the top, there is a navigation menu, the 'Marine' logo, a search bar for slips, docks, and boats, and a user profile icon with a notification badge. The main content area features a header for 'Anchor Marina' with its address: '50 Victory St, Shelton, CT 06484'. Below this are three main categories: 'Groups' (3 items), 'Docks' (12 items), and 'Pedestals' (48 items). Each category includes a brief description and a 'View all' link. At the bottom, there are four performance metrics: 'Visitors' (24 today, +32% since yesterday), 'Water pumped' (12.6K Gallons / slip weekly avg, -24% since last week), 'Power draw' (64.8K Watts / slip today's avg, +16% since yesterday), and 'Avg. runtime' (4.56 Hours / slip monthly, -21% since last month).

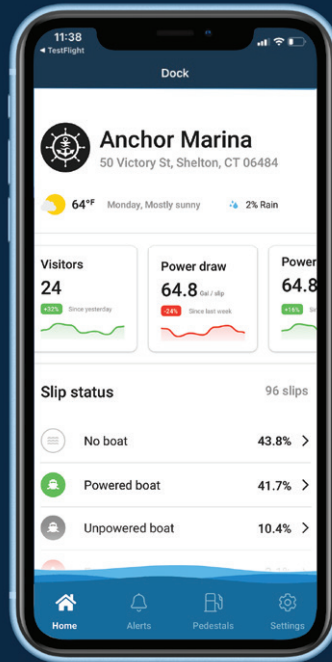

- Monitor visitors, view slip status, view power and water usage by pedestal, or groups of pedestals, receive alerts and notifications via app and admin platform directly to boat owners. Pull reporting and historical data for your marina.
- Update the ad scheduler by hour/day on the 100A & 400A power pedestals.

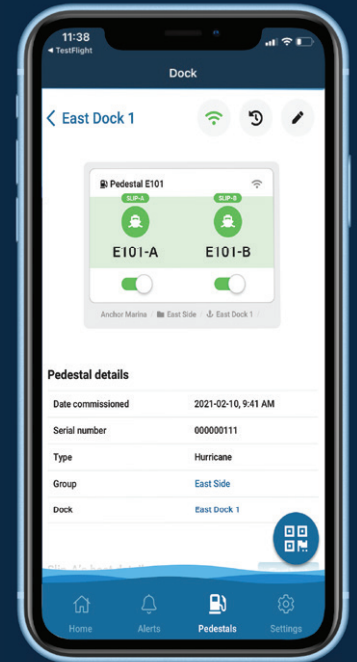

Reporting of power usage and power alerts

View updates and important info from the Marina

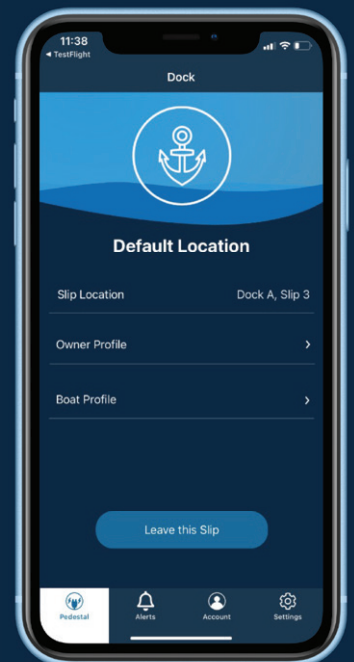

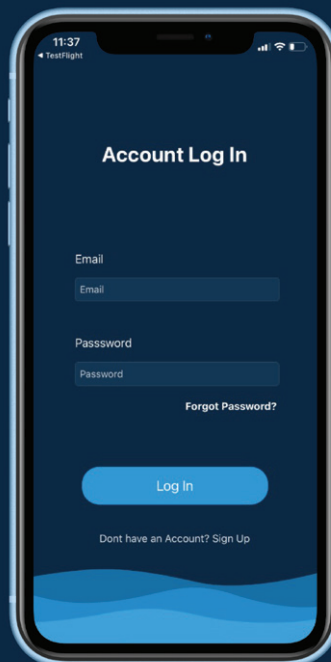

Retains pedestal preferences through cloud-based database

## CAPTAIN/OWNER MOBILE APP

The Captain/Owner App provides reporting and power condition alerts. It retains Pedestal preferences through the cloud-based database, which can then be downloaded to their slip Pedestal.
