

# Identify specialized circuits quickly

## Color-coded SNAPConnect connectors

For specialized circuits, color-coded SNAPConnect® tails help installers identify and terminate dedicated circuits quickly, aiding productivity. No need to label wires to avoid confusion. Perfect for applications such as hospitals.

### Three colors are available:

Red, for emergency circuits

Blue, for surge protected circuits

Orange, for isolated ground circuits

### Features:

- Color-coded terminal housing for fast circuit identification
- Audible snap indicates solid connection
  - Secure, easy grip latch
- Easy to inspect power contacts
  - Clear terminal housing
  - No exposed metal
- Available with solid or stranded wires
- 6" wire leads

### Color-coded right angle connectors for SNAPConnect receptacles

SOLID	PART NO.	STRANDED	PART NO.
