NOT Plug
Resistant™

LED Power Indicators

Used most often to identify emergency circuits in hospitals, the two LED power indicators are bright enough to be visible in low light and bright daylight conditions and identify Boss with power.

Tamper-Resistant

Compliant with NEC® 406.12 and NEC® 517-18(c), SNAPConnect® Tamper-Resistant Receptacles are acceptable for use in residential dwellings and pediatric locations.

HUBBELL-PRO

Hospital Grade Receptacles

Healthcare eTour

This interactive, virtual tour of a healthcare facility takes visitors through a healthcare setting. As users navigate their way through the virtual hospital, the Healthcare eTour demonstrates where and how Hubbell products can be deployed to offer safety, efficiency, performance, and durability solutions in these spaces.

Visit www.hubbell-wiring.com to take the tour.
