

8/10-Gang Floor Boxes, for Concrete and Raised Access or Wood Floors

Hubbell's CFB10G and AFB10G Series 10-gang boxes can be utilized as 8-gang boxes by using Hubbell's NEMA mounting plates. The plates allow for an open system wiring, which means the boxes and mounting plates can be used with all NEMA spaced Data/AV devices.

FB10MPNEMA4G is a single service 4-gang mounting plate with NEMA spacing and can be used with all power devices or all Data/AV devices.

FB10MPNEMA2XG is a double 2-gang mounting plate with NEMA spacing on each of the 2-gang openings that ships with a low voltage divider and is well suited for mixing 2-gang active AV modules and 2-gang power. Ideal for Crestron[®] DM-TX style products.

FEATURES

- NEMA mounting plates allow for custom device configurations
- FB10MPNEMA4G; 4-gang single service NEMA spaced mounting plate
- FB10MPNEMA2XG; double 2-gang NEMA spaced mounting plate includes low voltage divider
- Standard metallic or non-metallic wallplates can be used with NEMA mounting plates
- Boxes, covers and mounting plates are cULus listed
- NEMA mounting plates can be used with concrete and access/wooden floor boxes
- Standard concrete and access/wooden floor boxes include NPT knockouts ranging from 1/2" to 2"
- Industry metallic or non-metallic wallplates to be used with NEMA mounting plates
