IEC Pin and Sleeve Devices

The Best Just Got Better

Superior Performance

Improved Durability

Increased Installation Efficiency

- UL witnessed IP69k and UL Type 4X and 12, built to withstand wet and harsh environments
- Increased horsepower ratings now on all amperages expands the number of applications where the devices can be used
- All devices now have a V0 flammability rating, improving safety
- Compact and durable internal swing arm is fully shrouded, protecting it from damage
- Integral torque tabs on the locking ring help facilitate proper engagement of the gasket for maximum environmental protection
- UV-stabilized, impact and chemical-resistant PBT housing is designed to withstand harsh industrial environments
- HBL catalog number is unchanged, and permanently molded into the housing

APPLICATIONS

- Food Processing
- Manufacturing
- Entertainment
- Data Center
- Water Processing
- Convention Center
- Fast Food
- Construction
- Dairy
- Shipyard
- Military
- Beverage and Bottling
**IEC Pin and Sleeve Devices**

**Differentiating Features**

- Compact and durable internal swing arm on female devices is fully shrouded, protecting it from damage.
- Pocketed recessed screws deter screwdriver slippage and are conveniently located on the same side for easy installation.
- Thermoset contact carrier withstands higher temperatures for superior dimensional stability.
- Male locking rings include torque tabs to help facilitate proper engagement of the gasket for maximum environmental protection.
- UV-stabilized, impact and chemical-resistant PBT housing.
- Gland cap and strain relief shipped installation-ready, improving installation efficiency.

**Rating Information**

**Water & Dust Ingress Protection:**

**IP69k Water Test**
Extremely Hot (176°F) and High Pressure Water (1450 psi) sprayed from various angles.

**IP69k Dust Test**
Sealed device is placed in a dust chamber with varying sized circulating particles. Vacuum is affixed to cord end of the device attempts to pull in dust through the gasket end of the device. At the end of 8 hours of testing no dust can be present within the device.
