

# Manifolds

## Multi-Unit Residential/Commercial

We offer a variety of multi meter manifold options. From straight sticks to completely assembled turnkey solutions. Many customers choose to have standard split 2, 3, 4 and even 8 meter manifolds readily available on their shelves as a complete assembly where they can couple the units together if needed and others ask us to build to order. In either case, AEC is available to provide a solution for all applications. As always, we recommend but do not insist on a complete assembly that is tested and factory coated for complete corrosion control. We would like to see in all cases whether it be a single residential, single commercial or a multiple manifold situation to minimize the field attachment. We are always looking to provide these concepts for field installation.

- Custom Built To Your Specification
- Bent/Straight/Multiple Levels
- Bubble Tested at 100 PSI
- Close Tolerance Threads (ANPT) For Better Sealing
- Tested and Factory Coated for Corrosion Control
- Complete Turn Key Assembly
