

Gas Connectors & Accessories

Continental Industries

Tracking & Traceability

Continental Industries has the ability to provide the ASTM F2897 bar code with gas products.

GasOps IQ software has been purchased and is being used to generate the ASTM F2897 bar code. In March 2014, Continental started supplying Code 128 bar codes. Implementation of the bar code will continue throughout the year.

- March 2014 — Steel Tees & PA Compression Fittings
- June 2014 — Steel Saddles & Con-Stab Fittings
- September 2014 — Steel Couplings
- December 2014 — Anodeless Risers, Flex Risers & Steel x PE Transitions

We are supplying the bar code printed on a label. The label is placed in the poly bag with the instructions and product. The installer can apply the label to the pipe, the product, or the paperwork when the product is installed.

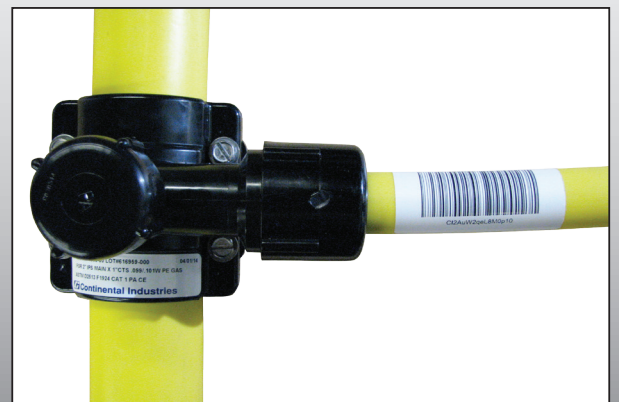

ASTM F2897 Code 128 Bar Code Example Generated by GasOps IQ

Part #	Size Description	Production Lot #	End Use Application	Date Manufactured
5864-17-1008-00	FOR 2" IPS MAIN X 1" CTS .099/.101W PE GAS	LOT #616959-000	PE GAS	04/01/14
Standard Specifications: ASTM D2513 F1924 CAT 1 PA CE				
Continental Industries				
Joint Classification		Hydrostatic Design Of 1000 PSI @ 140°F		
Material Designation				

Product Label Example

Products are shipped with Bar Code Label placed loose in Shipping Bag

After installation, Bar Code Label may be placed on the Fitting, the Pipe or kept with your Paper Work
