HUBBELL®
HUBBELL CANADA

hubbell residential
wiring device catalog

WELCOME TO HUBBELL RESIDENTIAL

Hubbell offers a complete line of high-performance wiring products designed to meet the needs of homebuilders, architects and designers alike. Our residential devices and advanced communication products are built with all the innovation and advantages you've come to expect from Hubbell.

WHY HUBBELL?

We are a company committed to redefining the devices that provide the essentials of power, voice and data in the home.

SERVING YOU EFFICIENTLY

Hubbell is committed to being your single quality source for residential wiring devices for years to come. As always, innovation goes far beyond our products. You now get the most complete residential, commercial and industrial product offering in the industry from one source. You can enjoy all the benefits of reduced transaction costs and improved fulfillment accuracy with our leading electronic ordering, inventory tracking and invoicing systems.

OUR COMMITMENT TO EXCELLENCE

Hubbell continues to provide you with the products and product features you desire – all designed, built and delivered with the quality you have come to expect.

The quality you expect from a name you can trust.

TABLE OF CONTENTS

CONVENIENCE
Add comfort, connectivity, and accessibility to any living space.

2

ENERGY EFFICIENCY
Bring energy savings and efficiency to the forefront.

SAFETY & SECURITY
Make home safety a priority without sacrificing style.

HOME ROUTINE
Upgrade the work from home experience with cutting-edge technology.

iDevices

Make the Everyday Extraordinary

A truly smart home does more than connect homeowners — it works for them. With iDevices' advanced smart home products, homeowners experience an unparalleled level of comfort, convenience, and security every day. iDevices products give homeowners the power to control their entire living space with the iDevices Connected app, or their voice using Siri®, Amazon Alexa, and the Google Assistant.

- **WiFi & Bluetooth enabled**
- **Guided in-app setup**
- **Control through the Connected app or voice control with Siri,® Amazon Alexa or the Google Assistant**
- **iDevices connect to home Wi-Fi networks; no separate hub required**

EVERYTHING YOU LOVE ABOUT YOUR HOME, IN ONE APP®

Designed from the perspective of the user, the iDevices Connected app provides simple navigation that feels just like moving through your home. Control and schedule your iDevices products with any iOS or Android™ device.

For a complete listing of Hubbell Wiring and Premise products, see our full line catalogs.

Z-Wave

Alongside the WiFi based iDevices line we offer a broad range of Z-Wave smart products that offer convenience and more integrations—like Alarm.com, ADT, Ring, and vivint—at a lower cost. Z-Wave is a different wireless system that creates a mesh network between your products to enhance communications and uses a hub to then communicate back to your home WiFi. With these products you can diversify your smart home with dimmers, switches, receptacles, sensors, and plugs.

- **Wirelessly control and schedule your smart home products**
- **All products Z-wave Plus certified**
- **Control through partner app and enable voice control with Amazon Alexa or the Google Assistant**
- **Connect to home Wifi networks through partner hub**

LIGHTING CONTROLS

Saving energy has never been so easy. Sensors control the lights automatically. Occupancy sensors are designed to turn on when you are there, and off when you're not. All are adjustable for delayed off. Vacancy sensors are turned on like an ordinary switch, but automatically turn lights off.

- **Occupancy or time-based controls**
- **Integration with third party energy management**
- **Daylight harvesting sensors for dimming or to keep lights off when natural light is sensed**
- **Automatic receptacle control**

THE RIGHT TECHNOLOGY FOR THE RIGHT APPLICATION

PASSIVE INFRARED requires a clear, unobstructed line of sight to detect occupancy.

Energy efficiency isn't just good for the environment—it's good for homeowners, too. Dimmers and timers offer real energy savings so you can enjoy significant long-term, ongoing reductions in electric bills. Hubbell offers a range of options for controlling residential energy use. Digital timers provide economic lighting and fan control with just the touch of a finger. LED-compatible dimmers allow you to control lighting levels, offering just the right atmosphere with comfort and convenience.

- **Steel mounting strap**
- **Compatible with most LED and CFL**
- **CEC Title 24 and ASHRAE 90.1 compliant**

TAMPER-RESISTANT RECEPTACLES

Put power where you need it, in style with decorator receptacles. The same quality and performance as standard devices, but with a contemporary style. Tamper-resistant devices prevent accidental insertion of a single item, like pins and keys to help keep children safe. The tamper-resistant mechanism is cam action for smooth insertion of plugs, like it is not even there.

- **Patented best-in-class mechanism eliminates plug-in difficulty and TR complaints**
- **Perfect for residential TR applications involving tenants with limited dexterity or hand strength**
- **For use in locations requiring tamper-resistant receptacles**

XCLAMP
FAST & SECURE TERMINATIONS
The XClamp eliminates the need to loop the wire, making it the best solution for either 15 or 20 amp branch circuits.

1 Strip the wire
2 Insert the wire
3 Clamp the connection

SPECIALTY RECEPTACLES

More power, better performance for appliances and heavy duty connections.

Recessed receptacles allow you to mount TVs flush or push furniture up against the wall without having to worry about the plug getting damaged or dislodged.

- **Range & dryer power receptacle terminals accept up to #4 AWG conductors**
- **Power outlets are suitable for copper or aluminum conductors**
- **Wires hidden with clean flush look**
- **UL Listed and CSA Certified**

HUBBELL
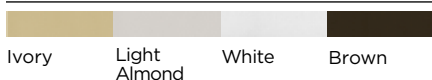

GFCI & AFCI RECEPTACLES

Safety plus more. Tamper-resistant and self-testing for the utmost in protection. GFCIs are people protection, eliminating power when there is an unintended path to ground. Required in most areas of the home where water may be present.

AFCIs help protect against fire, eliminating power when it senses an arc, occurring when there is a damaged wire or cord set inserted into the outlet. Easily added to most living areas and bedrooms in the home for added protection.

GFCI and AFCI receptacles are required by the NEC in specific rooms in the home. They are great for providing added safety and protection with point of use test and reset.

- **GFCI devices feature patented AUTOGUARD® technology**
- **Thermoplastic nylon housing**
- **Clear visual indication of status**
- **Protection against line and load reversal**

SURGE PROTECTION

Surge devices manage power quality and help protect electronics. Receptacles give you point of use protection, while panel protection is specifically designed to catch incoming power variations from outside the home.

- **Thermoplastic component shield protects the printed circuit board from contaminants**
- **All glass, conformal coated PC board provides superior moisture immunity for longer life in humid environments**
- **Distinctive surge symbol provides quick visual identification**
- **Surge protection indicator light**
- **Muting screw allows damage-alert alarm to be silenced until device is replaced**
- **Alarmed and non-alarmed versions**

CHARGING SOLUTIONS

Qi certified

Wireless Chargers

Hubbell's line of wireless wall mount chargers provide more ways to charge faster. Available in single and in combination with a high power Type A&C USB, Hubbell provides both USB and electrical power in a standard single gang opening. Designed to provide maximum charging for portable electronics, the USB ports are capable of charging two tablets simultaneously.

- **Flexible holder to hold phone firmly in place**
- **Phone can be inserted vertically or horizontally**
- **Green LED indicates power available and blue LED indicates wireless charging**
- **Available in combination with 15A or 20A 125V tamper-resistant receptacle with USB**

Two inductive coils for optimum target area and charging

USB Charging Receptacles

More ways to charge faster with Hubbell's line of USB chargers, available in Type C, Type A&C or the legacy Type A, all with a USB power output from 2 to 5 amps. Hubbell's USB charger duplex receptacle provides both USB and electrical power in a standard single gang opening. Designed to provide maximum charging for portable electronics, the USB ports are capable of charging two tablets simultaneously.

The 4 port charger outlets feature a USB port door, which enables power when open. When closed, all power is switched off. This eliminates all current flow for a "zero" no-load draw. Buildings looking to provide 100% green efficiency in power delivery will maximize LEED and energy efficiency design.

- **LED indicator light for available USB and line voltage power**
- **USB stainless steel ports rated for minimum 10,000 insertions and removals**
- **Complies with battery charging specification BC1.2**

Residential Floor Boxes

Residential floor box receptacles offer an economical solution to bring power where you need it. Available in configurations for either slab on grade or wood subflooring, they come in multiple finishes to blend in.

- **Available in surface mount or flush fit**
- **Pre-assembled flange and cover for fast installation**
- **Removable neoprene gaskets allow for independent use of either side of the receptacle with the cover closed**
- **Optional low voltage divider provides for power and voice/data in a compact space**
- **Back and side knockouts for proper wiring access**
- **Recessed receptacle minimizes plug protrusion; allowing furniture to be located over the plug**
- **Top screw fastening or side joist mounting options**

Non-Metallic Enclosures

The network solution that satisfies the need for dependable and flexible management of your voice/data and entertainment multimedia systems. This modular system makes it easy to upgrade, and keep pace with evolving technologies. Cabinets mount surface or recessed, between 16" studs. All are manufactured from a high impact thermoplastic that virtually eliminates the signal attenuation associated with traditional metal residential enclosures. Hinged cover can be mounted to swing from either side. Provisions to mount optional power outlets and lock kits.

- Hinged cover can be mounted to swing from either side
- Horizontal and vertical module mounting holes provide maximum flexibility
- Additional nylon push pins assist module mounting
- High-impact thermoplastic to minimize WiFi degradation

Network Modules

Modular components enable your design to match your performance requirements. Modules snap horizontally or vertically into the enclosures for optimum space management.

- **Completely enclosed high-impact thermoplastic housing**
- **High performance Cat6 supports up to 5GBASE-T speeds**
- **UL and cULus Listed 1863**
- **All data and phone modules**
- **TIA-568A wired**

Network Modules

Description	Catalog Number	
Combination Module 6-port telephone panel, 6-port coaxial splitter, and 6-port Category 5e panel; provides voice, video, and data distribution in a space efficient package; perfect for use with NSOBOX10 and NS790xx plates to quickly establish a comprehensive home network	**NSOTVDM6**	
Primary Telephone Module 8-port phone outlets to manage up to (4) incoming lines for voice or accessory applications in a protected PCB module; RJ31X interface jack included for security system connection; RJ45 jack interfaces with optional NSOETM8 telephone expansion module for additional extensions.	**NSOPTM8**	
Data Module Category 6 data module, 8-port supports enhanced transmission speeds beyond Gigabit Ethernet; future-proof for tomorrow's applications	**NSODM8C6**	
6-Way Coaxial Splitter Module 1GHz, basic unit with one incoming line and six outgoing	**NSOVM6**	
Fixed Video Amplifier Module Provides 10dB video signal amplification for incoming cable feeds; recommended for use when more than four outputs are installed or when signal level is low; provides 10dB forward path gain and supports current digital cable systems and modems with a passive return; pre-mounted push pins snap the module quickly into place; includes RG-59 cable jumper to connect amplifier to passive video splitter	**NSOVAMP**	
Blank Module Bracket Allows mounting of active components (i.e. switches, routers) or other devices onto a modular platform; (2) VELCRO® brand fasteners included to mount components onto module; pre-mounted push pins snap the module quickly into place; 2-pack	**NSOBM2**	
Multi-Provider Patchable Telecom Module 12-port telephone module distributes 4 incoming lines out to 12 locations through RJ-45 jacks; allows data lines to be converted to voice with the move of a patch cord; RJ31X interface jack is included for security system connection	**NSOMTM12**

ENTERTAINMENT SYSTEMS

Flat panel TV installations demand the best connections to assure optimum image quality. Hubbell has engineered a metal recessed enclosure that accommodates connections for HDMI, DVI, RG6/UQ and VGA, allowing large, high density cables to fit in the smallest footprint possible. Compatible with a wide variety of TV mounts, this FPTV enclosure provides an in-wall, structured network for multimedia connections and cables.

- **Optimal screw-on cover reduces tampering and protects connections**
- **Mounts to sheetrock or studs**

IN-WALL DELIVERY OF MULTIMEDIA & POWER

Enclosure with 15 amp duplex receptacle kit for power

Enclosure scenarios:
- Cat 6 jack for smart TV
- Double HDMI with wallplate

Cabling
- Device-to-device HDMI cable
- Two HDMI in-wall cables

Alternate output available for connection to other equipment (computers, gaming systems, etc.)

Connection scenarios:
- Coax cable in from provider
- Dual HDMI
- RCA component video from source electronics and auxiliary equipment

WALLPLATES

Polycarbonate Wallplates

Made of polycarbonate thermoplastic, the wallplates start out as a clear material, offering excellent color matching—with 375 color and size configurations to choose from. The material is nearly unbreakable and tough enough to withstand repeated high impact and also flexible enough to compensate for wall irregularities during installation.

- **Smooth satin finish**
- **Pre-inserted captive screws for faster assembly**
- **Enhanced resistance to heat, humidity, and chemicals**

Snap-on Wallplates

Snap-on wallplates offer a clean, elegant look that can be installed in seconds. The two piece construction includes a subplate that attaches to the device and a screwless cover plate securely held by four snaps. For multiple gang configurations, the subplate aligns the device so that the coverplate matches perfectly.

- **Smooth satin finish**
- **Virtually unbreakable**
- **Easy to snap-on**

OUTDOOR SOLUTIONS

Weather Resistant Devices

Hubbell Wiring Device-Kellems has unveiled another industry first: its weatherproof switch, available in three colors, to ensure built-in performance and style in any new or updated outdoor living environment. Unsightly weatherproof covers are no longer needed to protect switches from the elements. A snap-on wallplate provides additional protection with an aesthetically pleasing finish. The result is a device that's meant to get wet and withstand cleaning.

- **Rated 3R for outdoor exposed environments***
- **Complies with NEC wet and damp installations**
- **Internal bellows system seals out water**

Weather resistant USB devices require the use of an outdoor/while-in-use cover to maintain 3R rating.

Weather Resistant Covers

NEMA 3R rated Extra Duty non-metallic while-in-use covers offer weather protection for outlets when they are in use. High impact polycarbonate construction provides maximum durability and longevity. Available in aesthetically pleasing low profile.

- **Meets the Extra Duty rating**
- **Can be installed for new or old work**
- **Compatible with common siding types and materials**
- **Mounts horizontally or vertically**

ELECTRIC VEHICLE CHARGING STATION

The HBLEV30B Electric Vehicle Charging Station enables fast level 2 charging of any SAE J1772 compatible electric vehicle. This new EV charger delivers power and offers a more compact, easy to use and easy to install solution to electric vehicle charging.

Compatible with all Electric Vehicle Supply Equipment (EVSE) Codes, Standards and Recommended Practices, including SAE J1772, NEC 625, UL 2231 and UL 2594.

- Water-resistant enclosure is rated UL Type 3R/S for indoor and outdoor use
- Amperage selector (15A, 20A, 30A) to meet charging needs
- Time delay feature to delay charge times for more economical rates
- Auto-reset feature enables charging to restart following a minor fault, reducing the chance of having an undercharged battery
- Status indicator light alerts for power, charging status, and faults
