MC, MCX & TCX Series
ARMORED & UNARMORED CABLE GLANDS
Innovated Reliable Connectivity
**MC SERIES**

**ALUMINUM CABLE CONNECTORS**

**FEATURES-SPECIFICATIONS**

**Applications**
Designed for use with jacketed interlocked, continuously corrugated and welded armor cable (all types shown in chart below). Install where it is essential to provide positive grounding to the cable and for a Type 3,4 connection.

**Features**
- 360° armor grounding spring is **reusable**.
- Robust threads and world class seal enables easy installation with minimal torque required.
- Design meets and exceeds third party requirements for **cable retention**.
- Provides sealing back nut plus inner O-ring seal to prevent moisture ingress to the cable armor and enclosure.
- Copper free aluminum construction for hostile, corrosive and certain hazardous locations

**Materials**
- Body – Copper free aluminum (less than 4/10 of 1%)  
- Ground Spring – Stainless Steel  
- Backnut Seal – Thermoplastic elastomer (silicone)  
- Backnut Clamp – Nylon  
- Inner and Outer O-rings – Nitrile

**Operating Temperature Range**
- -50°C to +60°C

**Construction Details**

Cable armor diameter and cable jacket diameter refer to the dimensions across the crest.

† Where explosion proof/flameproof enclosures are being used the MC must be installed in conjunction with an approved sealing fitting. In Division 2 areas the MC can be fitted directly to an enclosure which has no source of ignition.
ALUMINUM CABLE CONNECTORS

FEATURES-SPECIFICATIONS

Applications
Designed for use with jacketed interlocked, continuously corrugated and welded armor cable (all types shown in chart below). Install where it is essential to provide positive grounding to the cable with a complete gas block/explosion proof seal. Also for a Type 3, 4X connection.

Features
- **360° armor grounding spring is reusable.**
- Robust threads and world class seal enables easy installation with minimal torque required.
- Provides a barrier seal between the individual insulated cores within the cable and prevents entry of the products of an explosion into the cable.
- Assembly of the cable gland compresses and distributes the compound evenly to create a barrier seal at the point of entry into the enclosure.

Materials
- Body – Copper free aluminum (less than 4/10 of 1%)
- Ground Spring – Stainless Steel
- Backnut Seal – Thermoplastic elastomer (silicone)
- Backnut Clamp – Nylon
- Inner and Outer O-rings – Nitrile
- Copper free aluminum construction for harsh, corrosive and hazardous duty
- Back nut is RED to indicate HAZARDOUS area product

Operating Temperature Range
- -50°C to +60°C

ALUMINUM CABLE CONNECTORS

FEATURES-SPECIFICATIONS

Applications:
Designed for use with jacketed interlock, continuously corrugated and welded armor cable. Rated for indoor and outdoor use and allows for a 45 and 90 degree bend where space is limited.

Features:
• 360° armor grounding spring is reusable
• Provides sealing backnut plus inner O-ring seal to prevent moisture ingress to the cable armor and enclosure
• Copper-free aluminum construction for harsh, corrosive and hazardous duty
• Patent pending combination union elbow that allows proper 360° alignment where space is limited
• Compact 45° & 90° bends for optimized wiring configurations
• Armor is terminated prior to bend allowing for minimal bending radius

Operating Temperature:
• -50°C to +60°C

Materials:
• Body: Copper-free aluminum (less than 4/10 of 1%)
• Backnut Seal: Thermoplastic elastomer (silicone)
• Backnut Clamp: Nylon
• Inner and Outer O-rings: Nitrile

**ALUMINUM CABLE CONNECTORS**

**FEATURES-SPECIFICATIONS**

**Applications:**
Designed for use with jacketed interlock, continuously corrugated and welded armor cable where it is essential to prevent explosive vapors from passing through electrical devices. This series provides a 45 and 90 degree bend for the most compact space. It is rated for indoor and outdoor use.

**Features:**
- 360° armor grounding spring is reusable
- Provides a barrier seal between the individual insulated cores within the cable
- Assembly of the cable gland compresses and distributes the compound evenly to create a barrier seal at the point of entry into the enclosure.
- Provides a cable retention and low smoke fume, zero halogen seal onto the cables outer sheath
- Copper-free aluminum construction for harsh, corrosive and hazardous areas
- Patent pending combination union elbow that allows proper 360° alignment where space is limited
- Compact 45° & 90° bends for optimized wiring configurations
- Armor is terminated prior to bend allowing for minimal bending radius
- Backnut is anodized RED to indicate HAZARDOUS area product

**Materials:**
- Body: Copper-free aluminum (less than 4/10 of 1%)
- Backnut Seal: Thermoplastic elastomer (silicone)
- Backnut Clamp: Nylon
- Inner and Outer O-rings: Nitrile

**Operating Temperature:**
- -50°C to +60°C

TCX SERIES

ALUMINUM UNARMORED CABLE CONNECTORS

FEATURES-SPECIFICATIONS

Applications:
Designed for use with non-armored cable where it is essential to prevent explosive vapors from passing through electrical devices. It is rated for indoor and outdoor use and integrally sealed with straight, 45° and 90° cable glands for use with non-armored cable permitted by the NEC. These series glands are for use with certified cables: TC-ER-HL

Note: these glands are also for use with TC, TC-ER, PLTC-ER, ITC, ITC-ER, MV and Marine Shipboard Cable

Features:
• Provides a barrier seal between the individual insulated conductors within the cable and prevents entry of the products of an explosion into the cable
• Assembly of the cable gland compresses and distributes the compound evenly to create a barrier seal at the point of entry into the enclosure.
• Provides a cable retention and low smoke and fume, zero halogen seal onto the cables outer sheath
• Copper-free aluminum construction for harsh, corrosive and hazardous duty
• Patent pending combination union elbow that allows proper 360° alignment where space is limited
• Compact sizing and 45° & 90° Bends for optimized wiring configurations
• Backnut is anodized RED to indicate HAZARDOUS area product

Materials:
• Body: Copper-free aluminum (less than 4/10 of 1%)
• Backnut Seal: Thermoplastic elastomer (silicone)
• Backnut Clamp: Nylon
• Inner and Outer O-rings: Nitrile

Operating Temperature:
• -50°C to +60°C

max

NPT threads for better sealing

Anodized backnut to indicate hazard

Features include:
- NPT threads for better sealing
- Silicone O-ring gasket for moisture protection
- Cast Aluminum Body
- Clencher® Seal for superior grip
- Tapered potting chamber
- Locking nut allows for 360° swivel
- Tapered potting chamber

Class II, Div. 1, Groups E, F, G
Class III, CL. I Zone 1 GR. IIIC. Zone 20
Types 3, 4X
Z SERIES – ALUMINUM CORD CONNECTORS

Applications
Use to secure and seal cords or cables entering enclosures or race-ways.
Z Series connectors are also suitable for use in hazardous locations per National Electrical Code (Articles 501-4(b), 502-4(a&b), 503-3(a&b)). Consult these articles for sealing requirements that may apply.

Materials/Finish
• Copper-free aluminum (less than 4/10 of 1%)
• Natural finish

Features
• Aluminum construction resists corrosion
• Neoprene grommet seals out oil and moisture
• Nylon retention ring ensures superior holding power
• Wide range of sizes and configurations

Z SERIES – STRAIGHT STEEL CORD CONNECTORS

Applications
Z Series Steel Cord Connectors are used to secure and seal cords or cables entering enclosures or race-ways. Z Series connectors are also suitable for use in hazardous locations per National Electrical Code (Articles 501.10(B), 502.10(A)(B) and 505.15(C)). Consult these articles for sealing requirements that may apply.

Materials/Finish
• Steel/malleable iron
• Zinc electro-plated
• Natural Finish

Features
• Neoprene grommet seals out oil and moisture
• Nylon retention ring incorporates a split hinge design to prevent friction and provide strain relief, also color-coded for sizing identification
• These heavy-duty connectors hold up to most manufacturing chemicals including, acid solutions, solvents and other corrosive materials
• Machined steel nut and body allows for tightening the compression nut and NPT hub without worrying about stripping the threads
• Wide range of sizes and configurations

Z SERIES – CORROSION RESISTANT NYLON CORD CONNECTORS

Applications
Durable nylon construction makes these connectors perfectly suited to corrosive environments.
Typical applications for nylon cord connectors include food processing facilities, chemical and sewage treatment plants and off-shore and dockside installations.

Features
• Nylon retention ring for increased holding power
• Neoprene bushing seals against moisture
• Nylon connectors obtain approximately the same cord retention values with hand tightening that can be produced only by wrench tightening of metal cord connectors

Material
• Nylon
