

# RESIDENTIAL METER SET ASSEMBLIES

Lyall's pre-fabricated Meter Set Assemblies are ideal for residential application. The unique design allows for countless configurations and options for your specific needs. Our "one-piece" design reduces the costs associated with components, installation time and rework.

## Product Features & Benefits:

- Reduced field labor with two joint installation.
- Safety - "one-piece" designs allow for fewer potential leak points, reducing stray emissions.
- Lower inventory costs - less component parts to stock and carry on crew trucks.
- Reduced maintenance - superior coatings applied in a controlled environment provide long lasting corrosion protection.
- Standardized appearance and quality of your meter set configurations.

Standard options include: valves (inlet/outlet), factory installed regulators, inlet/outlet position (top/side/back), union/non-union meter connections (1A, 20LT, etc.), coatings (polyester or zinc plated), packaging, stake support. These are just a sample of the configuration possibilities. Please contact your Lyall sales representative or Customer Service to discuss your specific needs. Custom configurations are our specialty.
