

THERE'S NO BETTER FIT THAN LYCOFIT®

**PIPE ON. SLEEVE ON.
LEAKS GONE.**

LYCOFIT® is a mechanical fitting for connecting underground polyethylene (PE) gas piping systems. With over 900 configurations, LYCOFIT® is the best choice for nearly all your fittings installation requirements.

Innovative Design, Engineered Performance

Superior engineering. That's the Lyall difference. LYCOFIT® fittings are stronger than the pipes they join together and are the economical solution for below ground, polyethylene (PE) gas pipe connections.

Eliminates Pull-Out

LYCOFIT® products are designed for maximum gripping power. With a connection so strong that the risk of pull-out is eliminated 100%, ASTM Quick Burst and Tensile Testing reveal that the PE pipe will fail before the LYCOFIT® coupling does every single time!

Instant Visual Check

LYCOFIT® fittings allow for an instant "full-visual" quality check—first "pipe on" and then "sleeve on" in each installation for a gas tight connection.

Product Benefits:

- 100% Leak-proof, Easy to Install
- Cost-effective, Maintenance-free Joining System
- Unprecedented Performance Levels and Proven Reliability
- Excellent Durability
- Resistant to Harsh Chemicals and Cracking
- Simple Installation, No Fusion Equipment Required
- No Measuring or Calculating Required
- Absolutely No Slippage or Pull-out

LYCOFIT® Mechanical Tapping Tees

With a clean installation and no fusion equipment required, LYCOFIT® Mechanical Tapping Tees are the safe, economical and maintenance-free solution for main to service-line connections.

Specifications

- Meets or exceeds all requirements for the Categorization of Mechanical Fittings within ASTM D2513-90c Category 1, and requirements from the Code of Federal Regulations, Title 49, Parts 192.281 and 192.283
- Meets or exceeds NFPA-58 - 1992, DOT and ISO requirements
- Listed with IAPMO/UPC and CSA
- Conforms to the Mechanical Fitting Specification as defined in ASTM F 1924

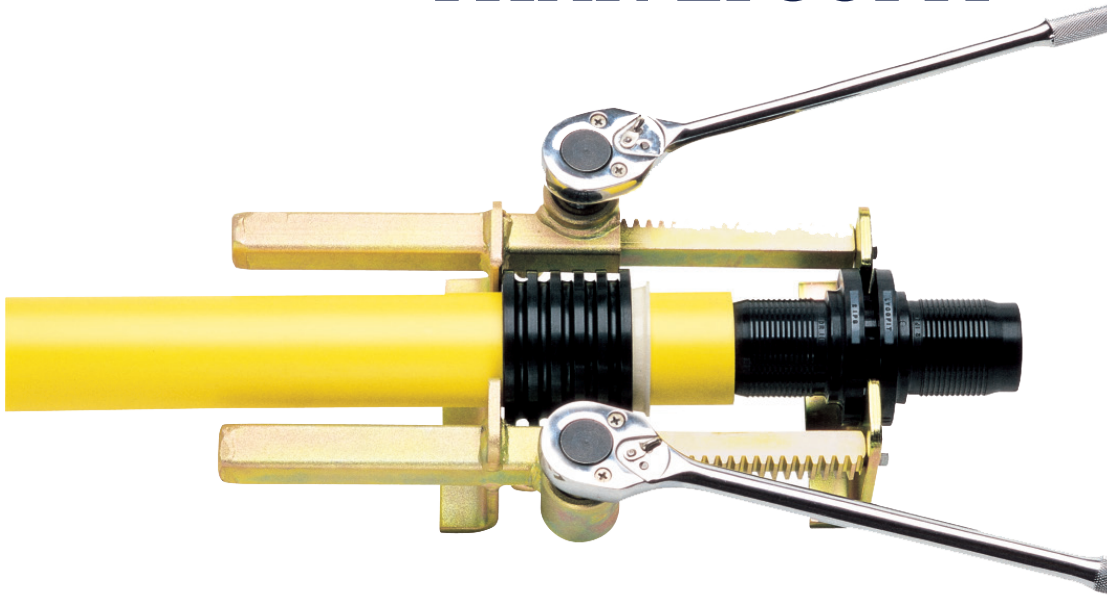

A complete set of specifications and test results for this product is available upon request.

Assembly Tools

Tools are available for every LYCOFIT® coupling and size. LYCOFIT® tools are designed for quick, easy and proper installation. Contact your Lyall sales representative for a demonstration.

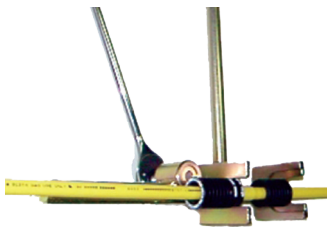

THERE'S NO BETTER FIT THAN LYCOFIT®

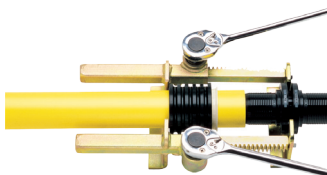

**PIPE ON. SLEEVE ON.
LEAKS GONE.**

Time is money. The LYCOFIT® mechanical fitting product line was developed on this principal. The QRP and LHP line of assembly tools are designed specifically for use with LYCOFIT® mechanical fittings to perform each operation quickly, easily and properly, every time. Ask your Lyall sales representative or call Customer to arrange a demonstration and you'll see how LYCOFIT® can help you save time and money in the field.

The QRP-100 is a lightweight, durable single ratchet assembly tool designed for use with 1/2" CTS through 1 IPS LYCOFIT® couplings.

The dual ratchet QRP-200 is designed for manual assembly of 1/2" CTS through 2 IPS LYCOFIT® couplings.

The LHP-200 hydraulic assembly tool is designed for use with of 1-1/4", 1-1/2" and 2 IPS LYCOFIT® couplings.
