

Washer, Electrical Equipment Bond

WEEB® WASHER

INSTALLATION INSTRUCTIONS For SunEdison AP90 Tracker Mounting System Only

BURNDY recommends that the sufficient details of the installation be submitted to the AHJ for approval before any work is started.

WEEB-STC

Products are tested to UL 467, CAN/CSA-C22.2 No. 41 US/ Canadian standards for safety grounding and bonding equipment.

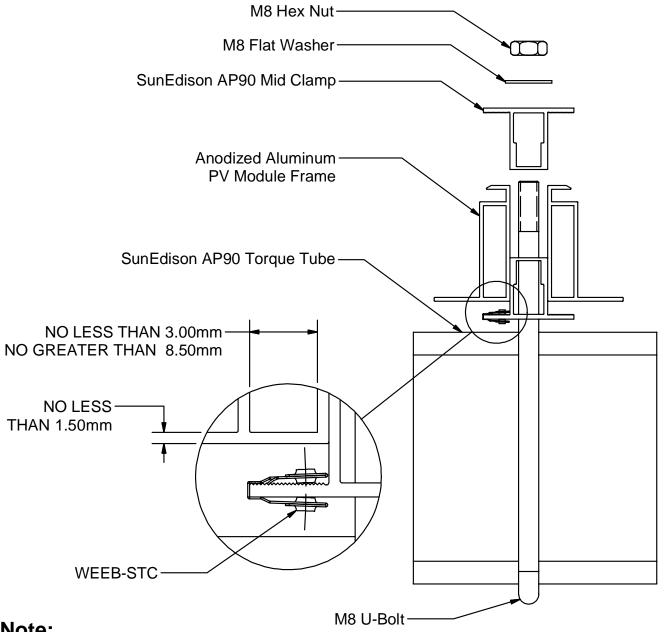

WEEB® WASHER COMPATIBILITY

The WEEB® washer family of products can be used to bond anodized aluminum, galvanized steel, steel and other electrically conductive metal structures. All installations shall be in accordance with NEC requirements in the USA and with CSA C22.1 in Canada. The WEEB® washers are for use with modules that have a maximum fuse rating of less than 25A.

Certain module frames do not have enough structural strength to withstand the force required to embed a WEEB® washer. These frames will deform and therefore not allow sufficient penetration of the WEEB® washer teeth. The general requirements for minimum module frame thickness of "boxed" type module frames are illustrated below. For more information regarding module compatibility, please see the technical documents section of our website.

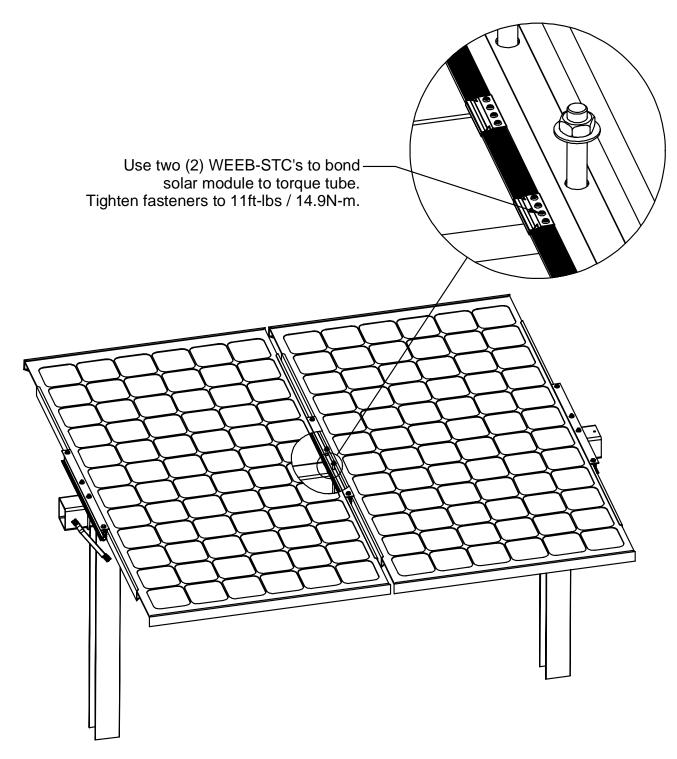

Note:

Inspect each module frame used with a WEEB® device to ensure that the bottom mounting face of the frame is flat, and that there are no hindrances to embedding WEEB® washer teeth. Do not use a module with a frame that prevents the WEEB® washer teeth from embedding fully.

SYSTEM OVERVIEW

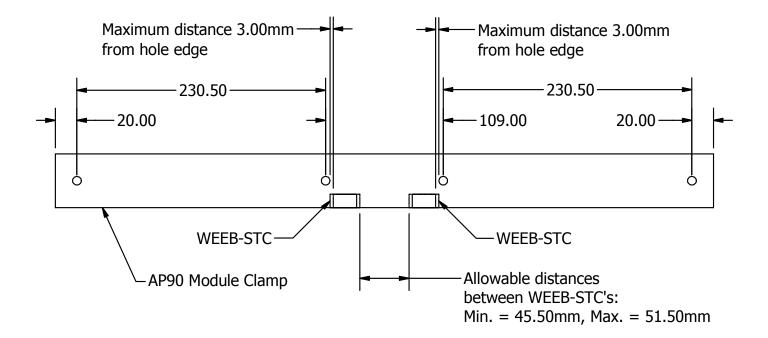

Important notes:

- 1. Anti-Seize or BURNDY PENETROX™ oxide inhibitor is not required on mounting hardware.
- 2. Secure PV cables and reliably route cables using Wiley ACC cable clips for proper wire management.
- 3. The NEC section 690.43 states "Exposed non-current carrying metal parts of module frames, equipment, and conductor enclosures shall be grounded in accordance with 250.134 or 250.136(A) regardless of voltage".

WEEB® WASHER INSTALLATION

Notes:

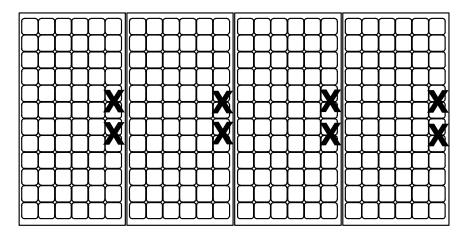

- 1. WEEB-STC must be installed at a distance no greater than 3mm from hole edge.
- 2. Minimum allowable distance between WEEB-STC clips to be 45.50mm
- 3. Maximum allowable distance between WEEB-STC clips to be 51.50mm
- 4. WEEB-STC must be fully inserted into clamp.
- 5. All dimensions are given in millimeters (mm).

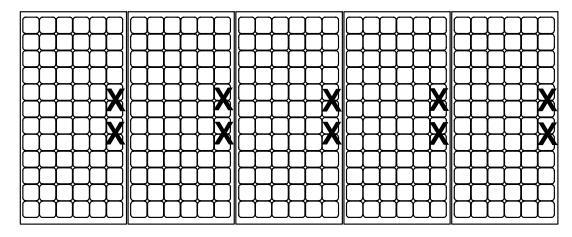

WEEB® WASHER LAYOUT

EVEN NUMBER OF MODULES IN ROW

X DENOTES PLACES TO INSTALL WEEB-STC 2 X COLUMN X ROW = 2 X C X R = 2 X 4 X 1 = 8 WEEB-STC NEEDED = 8

ODD NUMBER OF MODULES IN ROW

X DENOTES PLACES TO INSTALL WEEB-STC 2 X COLUMN X ROW = 2 X C X R = 2 X 5 X 1 = 10 WEEB-STC NEEDED = 10
